REQUEST FOR PROPOSALS - AG SHOP REWIRE

Iberia R-V School District is accepting proposals for rewiring/upgraded the electric system in the Ag/Industrial Arts Building. This request has been simplified to accommodate contractor creativity and experience, but all proposals will include any and all materials and work needed to make the repairs/installation functional, attractive, and compatible with existing structures or systems in use in the district.

1. The existing electric system is aged and incapable of handling the loads being placed on it. As such, breakers are frequently blown.

2. Proposals should be for upgrading the current system and any rewiring that may be necessary. Additional outlets will also be wired into the system, to include wall, floor, and ceiling-drop outlets to bring the facility in line with current standards.

3. Contractors are asked to review the current load supplied and to estimate and recommend an updated system. Contractors are encouraged to make on-site visits to properly understand the scope of the project.

4. Only appropriately licensed, bonded, and insured contractors may be used on this project.

5. RFP's must be received in the Iberia R-V Central Office no later than 4 p.m. on Tuesday, June 26, 2018.

6. Questions should be directed to Lyndel Whittle, Superintendent - 573-793-6818, lyndelw@iberia.k12.mo.us
