New Faces & New Places

Mrs. Catherine Dransfield- 7/8th Science

Mrs. Tracy Dransfield- Middle School Counselor

Mr. Eggleston- Communities in Schools

Mrs. Fowler- Music k-4

Ms. Megan Miller- 5th grade student teacher with Mrs. Jackson

Kudos

We would like to give a shout out to our local fire department for taking the time to put up our school flags that can be seen as you drive up to the school. Adam Jameson, Will Helms, and Thomas Helms did an awesome job! Thank you!

6th Grade Summative Superstars

Mountain View's 2021-2022 6th Grade students performed amazingly on the ELA-WV General Summative Assessment. These students had a 22% growth from 5th grade to the 6th grade and scored 17% above the state average. They were awarded the Student Growth Award "for achieving the largest student growth in Monroe County." We are beyond proud of this amazing group of students!

"These students were a pleasure to have in the classroom and to work with. They came to class with the desire to learn and gave 100% every day. Congratulations and best wishes as you continue your educational journey!"

~Mrs. Wickline

Team USA

MVS staff sporting their Team USA shirts for Sydney Phipps. We are so proud of her and are cheering her on as she competes in Italy at the Terni 2022 Rinehart World Archery 3D Championships. She has made the cut and is moving onto the elimination rounds that begin Thursday!

Bring home the win, Sydney!

Monroe's Agricultural History Transforming MVS

MVS is pleased to announce that after several years of our high tunnel being vacant, it is about to burst into full bloom...fall mums that is. That's right, MVS staff and students collaborated on an idea and turned a vacant structure into a solid green thumb project. Kids and staff have been busy preparing and organizing this summer project with the hopes of selling the mums in early to mid-September. Currently the project is being coordinated by Kim Rodes and her team of dedicated staff and students. Preparing the overgrown tunnel was not easy. Kim Rodes said, "It took one entire day just to clear weeds once the high tunnels interior was mowed and plowed. With summer being rather wet in the beginning, weeds are a never-ending enemy and the kids and adults have worked hard." Team members committed themselves to potting 400 Belgium Mum plugs in late June. Daily water schedules were locked in, materials purchased and some items were borrowed from Monroe County farms. Advice and guidance were sought out from other greenhouses and retailers, wholesalers and from our very own local WVU extension office. Rodes offered a big shout out to Brian Wickline for all of his input and help. Students have already gotten to take little trips to learn about and see the high tunnel. An agricultural club is being organized, as well as future projects. We have big ideas to take this high tunnel and transform it into a modern greenhouse. The possibilities are endless as to how the school and students can benefit in the future, all from this little mum project. "Monroe County is recognized for its deep rich agricultural history and traditions, why not do this? It's the student's legacy from their home county. I'm thrilled to be a part of this and can't wait for what's next." proclaimed Rodes. She says there is much work to be done to make this a solid and successful learning program. The team will be selling the mums and host other fund raisers to get this program where it needs to be; every student having a chance to grow!!
