Daily Home Screening Guidelines for Staff and Students

It is the expectation that all staff and students of SavannahR3 undergo a health screening at home each day before coming to school or boarding district transportation.

If a student or staff member experiences one or more of these symptoms, they will need to stay home from school.

- New, persistent cough (for those with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Shortness of breath or difficulty breathing
- New loss of taste or smell
- Vomiting or Diarrhea
- Fever of 100.4℉ or higher. We encourage you to monitor temperatures at home on a daily basis.
- Sore throat
- Unexplained fatigue, muscle soreness, or body aches

If your student has been in contact with someone who tested positive for COVID-19 in the last 14 days, please keep your student home from school and contact the school for details on when your student can return to school.

<u>If your student arrives at school and experiences any of the above symptoms, be aware that the district staff will contact you to follow up for further investigation.</u>

It is imperative that the staff member or student stay home from school if not feeling well.

Before sending a student on district transportation or coming to school; if you are unsure if the individual should be at school, call the school nurse for guidance. Students will not be penalized for their attendance if there is a concern from the parent or guardian on whether a student should be at school or not. After talking with the school nurse, a decision can be made on what is in the best interest for the individual and the school community.

If you are waiting for COVID-19 test results due to illness or exposure, OR have had any symptoms within the last 48 hours that cannot be explained by previously known health conditions, stay home from school.

If you are waiting for COVID-19 test results related to an upcoming procedure or planned testing, please contact your school for instructions on when you are able to return to school.

SR3 follows the guidelines outlined by the Missouri Department of Health and Senior Services (MO DHSS), Missouri Department of Elementary and Secondary Education, Center for Disease Control and Prevention (CDC), Children's Mercy Hospital, and Andrew County Health Department (ACHD) when determining if a student or staff member is able to be at school.

Please sign and return to your school nurse.

By signing below you acknowledge that you have read and understood the above health-related information. Keeping sick children home is an important part of stopping the spread of COVID-19.
