

## **The Village Charter School No. 473**

### **INSTRUCTION**

**2450**

#### Contracted Student Services

The Board of Directors hereby delegates to the School Administrator the authority to enter into agreements for student services but requires Board approval of such contracts. The reason for Board approval is that Charter School administration has no control over excess spending if contracts are signed without the Board's approval.

#### Special Education

It is the intent of The Village Charter School to provide services required by students' Individualized Educational Programs (IEPs) and develop resources within The Village Charter School to eliminate the need for outside sources for special education services.
