

**SCHOOL SYSTEM COMMITMENT TO STANDARDS FOR  
ETHICAL AND RESPONSIBLE BEHAVIOR**

The School Board believes that promoting ethical and responsible behavior is an essential part of the school unit's educational mission. The Board recognizes that ethics, constructive attitudes, responsible behavior, and "character" are important if a student is to leave school as a "responsible and involved citizen," as described in the Guiding Principles of the Maine Learning Results. The Board also recognizes that Maine law requires the adoption of a district-wide student code of conduct consistent with statewide standards for student behavior developed by the Commissioner of the Department of Education in compliance with 20-A MRSA § 254(11).

The Board seeks to create and maintain a school climate in which ethical and responsible behavior can flourish. The Board believes that instilling a sense of ethics and responsibility in students requires setting positive expectations for student behavior as well as establishing disciplinary consequences for behavior that violates Board policy or school rules. Further, the Board believes that in order to teach ethical and responsible behavior, adults who interact with students must strive to model and reinforce ethical and responsible behavior. To that end, the Board supports an active partnership between schools and parents. Please see Policy: JIC-System Wide Student Code of Conduct.

The Board will review the Student Code of Conduct periodically, inviting input from administrators, staff, parents, students and members of the community.

When revising the prescribed consequences for violation of the Student Code of Conduct, the Board shall consider (evaluate and revise, as deemed necessary or desirable) relevant existing district-wide school disciplinary policies and/or consider adoption of new policies that:

- A. Focus on positive interventions and expectations and avoid focusing exclusively on unacceptable student behavior;
- B. Focus on positive and restorative interventions that are consistent with evidence-based practices rather than set punishments for specific behaviors, and avoid "zero tolerance" practices unless specifically required by federal or state laws, rules or regulations;
- C. Allow administrators to use their discretion to fashion appropriate discipline that examines the circumstances pertinent to the case at hand; and
- D. Provide written notice to the parents of a student when a student is suspended from school, regardless of whether the suspension is an in-school or out-of-school suspension.

"Positive interventions" and "restorative interventions" shall have the same meaning as provided in 20-A MRSA § 1001(15).

Students, parents, staff, and the community will be informed of the Student Code of Conduct and relevant district-wide school disciplinary policies through handbooks, the school unit's

website, and/or other means by the Superintendent/designee.

### **Ethics and Curriculum**

The Board encourages the examination and discussion of issues that include ethical questions within content areas of curriculum, as appropriate. The Board also encourages school administration and staff to provide students with meaningful opportunities to apply values and ethical and responsible behavior through activities such as problem-solving, service learning, community service, peer mediation, and student government/leadership development.
