

UNIVERSITY PROGRAMS

Lakeland Regional High School

The **UPAL** programs at Lakeland are a specially designed set of curricula for highly-motivated students that seek academic challenges, a specific focus of study and a dedicated faculty that engage students with not only enlightenment, but also real-world relevance.

The **UPAL** curricula are devised around a set of common themes, which are:

- Collaboration
- Problem-solving
- Critical-thinking
- Research
- Technology

These themes represent the hallmarks of a modern, 21st. century education preparing students not just for college, but for life beyond college. With teachers using creative and innovative approaches to lessons, students will be engaged in their studies, analyze the information from multiple perspectives, and be capable of developing solutions to real-world problems.

UPAL Computer Languages Program

The aims of Lakeland's **UPAL** Computer Languages Program are to encourage students to think creatively, to develop problem-solving skills using various computer languages such as SCRATCH, C++, Java and Python, and to produce meaningful projects that test the competency of their skills. During these processes students will be exposed to the ever-changing aspects of programming and interact with professionals in the field to gain insight into potential career pathways. By engaging in these activities students can learn how ideas and innovations are brought to realization. Throughout this program course projects play an integral role in the development of the students' talents and offer experiences to fulfill specified project criteria.

<i>Grade 9</i>
English 9
Physical Education/Health
Mathematics
Science
World History
World Language
Lunch
Study Hall/ Pathways to College & Career
