5th grade Students, Parents, and Families:

First, thank you all for your flexibility, patience, and understanding as we became aware of the two COVID cases on Wednesday afternoon. In my position, I have had several apologize when they have discovered they have tested positive. Some who I personally know had been taking every precaution. I believe in our current situation it could happen to anyone.

The CDC has revised the quarantine period. Please see the link to my letter to all families. Long story short, your child may return to school as long as they do not have symptoms on Wednesday, December 9th, with documentation of a negative test (taken no earlier than Monday) provided to the office, or Monday, December 14th without a test. Please continue to monitor symptoms through the 14th day. The positive cases will be required to isolate until Monday, December 14th.

Please call the office if you have any further questions after reviewing our new quarantine protocol. Again, thank you for your understanding during this unique time.
