

Tecumseh Public Schools utilizes SCHOOL MESSENGER, a district wide parent notification system to provide important information to our parents. You may have already received a notification from SCHOOL MESSENGER and will be familiar with how the system works. This is our district wide solution to provide information to our parents in a timely fashion. SCHOOL MESSENGER will contact all of the main contact phone numbers we have on file for each student at each site or in the district as appropriate. The system will be used to inform you of school closings in case of bad weather, important upcoming events, or other information that may be beneficial to you as a parent. In order to make the system as effective as possible it is important that you make sure you have a current home or cell number on file at each of the site(s) where your children attend.
