

Decision Tree for COVID-19 Response for Students/Staff

Student/Staff Member has COVID-19 Symptoms or a Fever \geq 100.4

Student/Staff received a negative COVID-19 test AND they receive a definitive alternate diagnosis from a physician (e.g. ear infection, strep throat) and have been fever free for 24 hrs. without taking fever reducing medication

They can return to school

Student/Staff is not tested for COVID-19 OR does not have a definitive alternative diagnoses from a physician.

They can return to school when they are fever free for 24 hrs. without taking fever reducing medicines or no longer have symptoms.

Student/Staff Member Test Positive for COVID-19 with Symptoms

Student/Staff should remain isolated until they have recovered. The non-test based method of ending isolation requires a case to meet the 3 following criteria:

1. They have been fever-free for 24 hours without the use of fever-reducing medication **AND**
2. Any respiratory symptoms experienced are improving **AND**
3. It has been at least 10 days since the symptoms started

They can return to school

Student/Staff Member Test Positive for COVID-19 with NO Symptoms

Student/Staff should remain isolated until 10 days after the TEST date. If they develop symptoms at any point during this time, they will need to follow the above symptomatic guidance

They can return to school

Administration will notify the health department and will gather information for the health department contact tracing team. Students/staff who may have come in contact with a person with a positive case will be notified and message will be sent to all parents.

NEW QUARANTINE GUIDANCE IF NO SYMPTOMS

- 14 days if you will be around elderly, people with comorbidities, or those immunocompromised
- 10 days if you have NO symptoms
- 7 days if you have a negative test on or after Day 5 and have NO symptoms

Student Or Staff

With contact to COVID-19 positive Household Member

With close-contact to a Non-Household member (i.e. student) who tested positive for COVID-19

Self-quarantine according to quarantine guidance AFTER the household member is recovered. If household member does not have symptoms self-quarantining begins after positive test date. Recovery requires a case to meet the 3 following criteria:

1. They have been fever-free for 3 days without the use of fever-reducing medication AND
2. Any respiratory symptoms experienced are improving AND
3. It has been at least 10 days since the symptoms started

Close contact is defined within 6 feet of a positive case for 15 minutes or longer regardless of mask use or student/staff. Self-quarantined according to quarantine guidance after their last exposure to the positive case. If symptoms develop follow guidelines above.

If social distancing was maintained throughout the time together, then no need to quarantine

NOTE: Contact earlier than 48 hours before the person tested positive or began developing symptoms will not require quarantine. Monitor for symptoms.
