- KINDERGARTEN HOLIDAY CONCERT
- PRE-K SPRING FAMILY ACTIVITY
- KINDERGARTEN MOVING UP CEREMONY
- QUARLES PRESENTATION TO THE NJ DEPARTMENT OF EDUCATION*

EPSD Goal #2: Leadership and District Culture

PRE-K SPOTLIGHT BERGEN FAMILY CENTER

Prek 3 CLASSROOMS INVESTIGATED BUILDINGS AND RECYCLING

Young children are very curious about buildings. They want to know how they are constructed and what people do inside them. Buildings are everywhere in our community. They vary in size, color, construction material, function, and location. This study offered many opportunities in the classroom to explore buildings and expand children's knowledge of building materials and physical forces. Children also explored concepts in social studies related to jobs and the purposes of different structures.

Social and Emotional Learning: Strategies for Parents

By Yolanda Salazar, PIRS (Pre-School Intervention & Referral Specialist)

Whether it's called "social and emotional learning" or "emotional intelligence," most people understand it's critical to pay attention to the development of the whole young person, including character education. Parents have a dual role to play in raising a self-aware, respectful child who knows how to manage his or her emotions, make responsible decisions, and resolve conflicts non-violently. At home, you should strive to create an environment of trust, respect, and support. Remember that modeling "emotionally intelligent" behavior at home is the first step in nurturing emotionally intelligent children. At school, you can work with other members of your school community to create a climate that supports social and emotional learning - in and out of the classroom. Here are some specific steps you can take to nurture an emotionally intelligent child.

Strategies At Home

Be a good listener. Listening as a "core competency skill." Unfortunately, it's not always practiced by parents or children. Take the time to have conversations with your child, listen to what they have to say. Discuss feelings that are both positive and negative.

Model the behavior you seek. Whether it's apologizing when you're in the wrong or treating others with respect and kindness, children learn a great deal about relationships from observing the behavior of their parents.

Nurture your child's self-esteem. A child with a good sense of self is happier, more well-adjusted, and does better in school. Strategies for fostering self-esteem include giving your child responsibilities, allowing her to make age-appropriate choices, and showing your appreciation for a job well done.

Respect differences. Every child has his or her own unique talents and abilities. Whether in academics, athletics, or interpersonal relationships, resist the urge to compare your child to friends or siblings. Instead, honor your child's accomplishments and provide support and encouragement for the inevitable challenges he faces.

Take advantage of support services. Seek the advice and support of school counselors or other social services during times of family crisis, such as a divorce or the death of a close friend or family member. Remember that no matter how close you are to your child, she may be more comfortable discussing a troubling family situation with another trusted adult.

KINDERGARTEN SPOTLIGHT MS. BOROWSKI'S CLASS

The students in Mrs. Borowski's Kindergarten had an exciting March! We celebrated Absolutely Incredible Kid Day with videos & letters filled with love from the parents. We stuffed giant goody bags & danced to a song that one of our moms wrote & sang too!

Even though we made & set up traps, the leprechauns STILL made some shenanigans in our classroom. The did leave us a magic rainbow, turned our Kissed green & left us magic beans that grew lollipops!! We also made diagram for & made edible rainbows!

MS. SORIANO & MS. WALKER'S CLASS

E2 has been busy this month learning about amazing women in history. This included Dr. Mae Jemison, Misty Copeland, Michelle Obama, Dr. Jane Goodall, and Eugenie Clark. Eugenie Clark is known as the Shark Lady for her studies on sharks. Our class loved learning about how she fell in love with these interesting animals. We also talked about how brave she was to get in the water with such large animals. E2 has loved learning about these trailblazers of our history. Check out our facts about Eugenie Clark!

Spring is approaching and learning is in full swing here at Quarles! It won't be long before the warm weather arrives, and our end of year activities begin! Quarles students were very busy this March! Many classrooms were visited by leprechauns, some classrooms even designed leprechaun traps! Our Quarles students were celebrated on March 16th for Incredible Kid day! We hope you enjoy all the articles in our newsletter supporting our students' achievements!

Please continue to make school a priority for this is the time which students make the most academic and social improvements. It is important that our students arrive to school on time everyday. Thank you for supporting our teachers and administration!

Best wishes for a wonderful Spring ahead!

28, 2023

NOTES FROM THE SCHOOL NURSE, MRS. JULIE KLAPPER

March is when we "Spring forward" and increase our daylight time by changing the clocks one hour ahead. Makes you wonder about sleep.

Adequate sleep is an essential component of young children growth and development. Sleep is a requisite part of a healthy lifestyle. Studies have shown that children who get an adequate amount of sleep have improved attention, behavior, learning, memory and overall mental and physical health. Not getting enough sleep in childhood has been linked to allergic rhinitis and problems with the immune system. Evidence supports future risks as well such as obesity, heart disease, depression and Type II diabetes (CDC, 2020).

Sleep is not a luxury, it is something we all need for good health. Sleep is a building block for your child's mental and physical health. Children who do not get enough sleep may have more cognitive difficulty in focusing and managing their moods. A well-rested child is available to learn as sleep supports brain retention. Sleep time guidelines depend on the child's age. Every child is different. According to the American Academy of Pediatrics, our students - ages 3 to 5 should sleep 10 to 13 hours per 24-hour period (this may include napping).

The recommended amount sleep is simply a guideline. Maintaining a regular schedule of sleep and wake time is the key, especially during stressful times. Establishing a consistent bedtime routine is important. Sleep routine should ideally start at the same time every night. The following are some suggestions to help "wind down" the household and promote sleep.

- Dim the lights
- Stop use of electronics/screens at least an hour before bed
- Limit caffeine
- Take a warm bath
- Do a quiet family activity such as reading a short book

Consistency of nighttime routine is important for a good night's sleep.

Please reach out to your physician if you have any concerns about your child's sleep pattern.
