December 22, 2020

Dear Parents/Guardians,

After visiting with the Schuyler County Health Department and looking at the Covid situation the board decided to put a social distancing mandate in effect for K-12. We are implementing this to reduce the number of quarantined students who are missing school. With masks and social distancing we will not have to quarantine staff or students. We are going to make every effort to keep students six feet apart. We believe it is vital to keep students in the classroom. If classrooms are unable to get students six feet apart they will need to wear masks.

It is the decision of the board to revisit this mandate January 21st. At that time we will discuss the county cases and make an appropriate decision for the best interest of our students.

Yours in education,

Rick Roberts, Interim Superintendent
