

Statement from the Superintendent

It is an honor to present our first annual report on Measure B to the community. The positive support that we have received from the Placerville Community has allowed PUSD to provide the 21st Century learning environment promised to the community and will sustain it over the next decade. Over the past year with the help of Measure B, PUSD has completely overhauled our technology infrastructure, which has allowed for the integration of a technology rich learning environment in each classroom. With the passage of Measure B we have also been able to provide and will continue to provide the Professional Development necessary to make this transition successful.

Thank you for your trust and support for the students and staff of the Placerville Union School District.

Role of the Bond Oversight Committee

The BOC is ensuring the proper expenditures of bond funding and informing the community of the expenditures. Members of the BOC are appointed by the PUSD Board. The BOC is required for bonds passed under the Prop. 39 provisions. Should you have any questions please contact the PUSD office at 530-622-7216.
