

## SCHUYLER COMMUNITY SCHOOLS Technology Replacement Schedule General Guidelines

### General Statement

The purpose of this document is to inform/publicize the technology replacement schedule for Schuyler Community Schools. It should be noted this document serves as a guide for the replacement schedule. There's nothing in the technology replacement schedule that is written in stone. Situations will arise from time to time that will require the Director of Technology to vary from the schedule in order to meet the immediate needs of the district.

The goals of the technology replacement schedule are to:

- \* provide transparency to staff, students, and district patrons
- \* improve budgeting - centralize technology resources to forecast funding required to maintain the replacement plan
- \* assure appropriate technology resources are available throughout the district for students and staff

The IT Department will assess old equipment to determine whether it can be refurbished/cascaded, stored, or recycled.

Typically, staff laptop and iPads are cascaded...re-imaged and repurposed for other users (students or classified staff ) until end of life cycle. End of life cycle meaning...no longer useful for anybody in the district and/or not cost effective to maintain and support.

Typically, student laptops and iPads are maintained and used until end of life and then recycled.

Technology replacement categories and general timeline replacement schedule:

<b>Description</b>	<b>Preferred Replacement</b>	<b>Destination</b>
=====	=====	=====
