David Halloran
Superintendent

January 12, 2021

Dear Gloversville School Community:

The Gloversville Enlarged School District became aware of two new COVID-19 cases today. We had a Gloversville Middle School student test positive and as a result, we have ten staff and six students who will need to quarantine through the end of this week. One of our 7th grade teams will be fully remote for the next three days.

Kingsborough Elementary School also had a student test positive. That case resulted in three staff members and nine students needing to quarantine for the next two days. Their quarantine ends Thursday, January 14, 2021.

We became aware of these positive cases over a week after the affected children were last in school, which is the reason the quarantine periods are so short. All impacted students and staff were contacted directly by school officials. As always, we wish a speedy recovery to the affected students and wish continued good health to all who are quarantined. We look forward to all returning to their normal schedule next week.

As stated in my previous letter, we are trying to strike a balance in communicating when appropriate and not over communicating. These scenarios may become routine across our district until the virus abates in our region. Let's all continue to do our part to mitigate the spread and stay focused on the important business of educating children as best we can.

Sincerely,

A handwritten signature in black ink, appearing to read 'D. Halloran', written over a large, stylized flourish that starts under the word 'Sincerely' and extends to the right.

David Halloran
Superintendent of Schools
