

E-Learning Day Reminders:

1. An e-learning day is an asynchronous learning day. There is no scheduled live instruction schedule to follow. Students must login to each of their Google Classroom pages for each of their classes to get their assignments/work for the day. At the elementary e-learning is a hybrid with some students doing **packet/choice boards** work and others using computers to log in to Google Classroom
2. If a student forgets to bring their computer home/ their internet or power goes out/ or they cannot complete the work that was assigned for the day for some reason- they must make up the work **by the end of the second school day after the e-learning day** in order to receive credit and be marked "present."
3. Teachers will be available to help students with their assignments primarily via Google Classroom/ Meet or email from the hours of 9am-12pm and 12:30pm-3:00pm. Your teacher will communicate with you the best way to reach them.
4. As a side note, students with computers should be in the habit of bringing them home in the event that winter weather is forecasted.
5. **Most elementary grade levels did not send their iPad or Chromebook home with students as it is not needed for students to complete their assignments for e-learning day.**
