

# Math Tips for Parents

## Message from Mrs. Budd

Hello!

It's been wonderful to see and hear all of the math that has been happening in the classrooms around the district! As we all know though, we use math every where. This newsletter is to give you imore deas and activities of how to have your child use and practice math outside of school.

Just like November's newsletter, this month's resource also has A LOT of activities. I'm sharing the entire resource which has activities for kindergarteners through 6th graders because it's organized by the math strands. This means you will find age-appropriate activities in 5 different parts of this guide. Page 3 in the guide (page 5 on the presentation) explains how each strand has a different colored tab on the right side. The grade levels are found on the right-side tab as well.

Please continue to encourage a growth mindset with your family! Episode 3 is linked below.
