January 25, 2021

Q. Why did we only "go virtual" with Fifth through Twelfth grades?

--Fifth and Sixth grades were together last Thursday and Friday for PE, music, and sack supper time and their exposure came via a student.

(CHROME BOOK PICK UP) Parents of Fifth and Sixth graders who have internet access may begin picking up chrome books today, Monday, beginning at 1pm through 3:30pm in the main office and/or on Tuesday through Thursday between 8am and 3:30pm.

--Seventh through Twelfth graders who have math or athletics with either Mr. or Mrs. Peveler were exposed.

--If your child did not have contact with either Mr. or Mrs. Peveler on Friday of last week, they would not necessarily have to quarantine. If you have further questions, please email Mr. Kelly at jkelly@agra.k12.ok.us

Teachers will be reaching out to their students with assignments. Parents are welcome to reach out to their child's teachers as well.

Q. When can my child come back to school?

Traditional school will be back in session on Monday, February 8.

Q. How long does my child have to quarantine?

There are many variables that affect quarantine. Please see the attached flier that we have obtained from the Health Department.

We truly appreciate your understanding and your support!

Sincerely,

Mr. Kelly and the entire Agra School Community

The Little School That Could

Agra Does!

COVID-19

When Can I Be Around Others?

**FOR ADDITIONAL QUESTIONS CALL YOUR
COUNTY HEALTH DEPARTMENT**

I KNOW/THINK I HAVE COVID-19 WITH SYMPTOMS (ISOLATION)

You can be around others
after -

10 days have passed since your
symptoms first appeared **AND**

You have been fever free for at
least 24 hours (without use of
fever reducing medication) **AND**

Other symptoms of COVID-19
are improving*

*Loss of taste and smell may persist for
weeks or months after recovery and need
not delay the end of isolation.

Individuals with severe or critical illness
may have an extended isolation period.

I TESTED POSITIVE BUT HAVE NO SYMPTOMS (ISOLATION)

If you continue to have no
symptoms, you can be
around others after -

10 days have passed since
you were tested

If you develop symptoms
after testing positive, follow
the guidance for "I know or
think I had COVID-19 AND I
had symptoms".

I WAS A "CLOSE CONTACT" OF SOMEONE WITH COVID-19 (QUARANTINE)

A person can end self-quarantine on **Day 7**
if they test negative and have had no
symptoms. The test can be a PCR or rapid
test (antibody test is not applicable) and
should be taken no earlier than **Day 5**.

Without a test, a person can be released
from quarantine on **Day 10**, if they have had
no symptoms.

Close contact means within 6 feet of the
individual for at least 15 minutes.

However, anyone who has had close
contact with someone with COVID-19 and
who:

developed COVID-19 illness within the previous 3
months and has recovered and remains without
COVID-19 symptoms (for example, cough, shortness
of breath) does not need to stay home.
