DISCLAIMER

This handbook is not intended to create a contractual relationship with the student; rather, it is intended to describe the school, its current practices, procedures, rules, and regulations (or code of conduct). Membership or participation in a school-sanctioned activity is a privilege and not a property right.

GENERAL INFORMATION

This document includes general information concerning course descriptions and procedures followed relating to the curriculum at Lawrenceville High School. In addition to this document, the school’s website and the student handbook may be sources of additional information. The reader is encouraged to direct specific questions to school personnel.

THE SELECTION OF SUBJECTS

Choosing the right classes is very important. Students are encouraged to discuss course choices with parents, teachers, and students presently taking classes to determine the appropriateness of course selections. Students should keep in mind career goals, personal goals, and college/advanced training options when making their curriculum plans. The academic advisor is also a source of information on college and career requirements and current standings in credits and graduation requirements. With all of this information in mind, students then indicate course selections for the next year using the appropriate forms.

Teacher recommendations are important in assisting students with their choice of courses. More than anyone else, the teacher has worked with the student on an academic level. The advisor will also consider standardized test performance in the determination of class placement.

REGISTRATION PROCEDURE

- The advisor meets with students to distribute registration materials, to discuss courses, and to answer questions.
- The student takes the registration materials home to discuss a tentative course request list with parents/guardians.
- The registration form is turned in to the advisor after being signed by the student and the parents/guardians.
- Students enter requests into the computer.

GRADE CLASSIFICATION

Students at the high school level are promoted based on the number of credits earned.

Grade Classification is as follows:

- Grade 10: 6 credits
- Grade 11: 12 credits
- Grade 12: 20 credits

TRANSFER CREDIT REQUIREMENT

Effective 2017-2018

- Freshman Enrollment: Sem. 1 or 2 -28 credits
- Sophomore Enrollment: 27 credits
- Junior Enrollment: 26 credits
- Senior Enrollment: 25 credits

CREDIT ADJUSTMENT

Adopted August 2020

Lawrenceville High school students placed at a different serving school will have total graduation credits according to the total number of possible credits earned at the serving school by subtracting one credit for each year of school. For example, if a student can earn a total of 28 credits at the serving school over the course of 4 years, the graduation total credit requirement for a Lawrenceville High school student is 24. (This is in line with LHS total credits; a student may earn 32 credits over the course of 4 years and the total graduation credit requirement is 28.) Students placed at the serving school shall meet all other LHS graduation requirements.

ILLINOIS EASTERN COMMUNITY COLLEGE—DUAL CREDIT COURSES

Depending on grade level, students may receive college credit through Dual Credit arrangement with IECC upon successful completion of the requirements of the course.

A rate of \$40 per credit hour of course is charged by IECC for dual credit courses. This fee is not covered by school fee waivers.

POLICY CONCERNING STANDARDIZED ACHIEVEMENT TESTS AND SCHOOL-WIDE ASSESSMENTS

Community Unit School District #20 is required to administer standardized achievement tests and school-wide assessments to its students. The Board of Education finds and determines that results of those tests are extremely important to both the school district and to the students taking those tests. Results of such tests provide critical information concerning the effectiveness of the school district's academic program and assist school personnel in determining the correct educational placement of students. The Board further finds and determines that a small number of students have in the past not put forth proper effort to ensure maximum achievement on those tests, which has caused a detrimental effect on those students and on the school district as a whole. Therefore, it is the intent of this policy to set forth procedures governing students taking standardized achievement tests and school-wide assessments and to ensure maximum effort and achievement by all students taking such tests.

CREDIT REQUIREMENTS

LHS GRADUATION REQUIREMENTS

- 4 Credits English
 - 1 credit English I
 - 1 credit English II
 - 1 credit English III
 - 1 credit English IV
- 3 Credits Mathematics
- 3 Credits Science
 - 1 credit in Biology I
 - 2 credits in science electives
- 3 Credits Social Science
 - 1 credit World History
 - 1 credit U.S. History
 - ½ credit Civics
 - ½ credit elective
- 1 Credit Foreign Language, Music, Art, or Vocational
- ½ Credit of Physical Education per semester of attendance unless exempt according to state law*
- ½ Credit Health
- ½ Credit Consumer Education
 - Options also include Economics (may count as Consumer.Ed Credit and Social Studies Credit); Ag Business Management, and Adult Living.
- Pass the US & IL Constitution Exam
- Electives
- Total: 28 Credits (Each Semester = ½ Credit)**

**Special exceptions for PE exemptions can be found in the student handbook.*

COLLEGE ADMISSIONS REQUIREMENTS

- 4 Units English
- 3 Units Math
- 3 Units Lab Science
- 3 Units Social Studies
- 2 Foreign Language* (*Music, Art, or Vocational Sequence may be substituted at some colleges.)

Course requirements vary by institution. Students are encouraged to check with the specific college in order to learn specific requirements. Students interested in participating in college athletics should contact their coach or the guidance counselor for information regarding course and ACT requirements enforced by the NCAA clearinghouse.

Those tests include but are not limited to: PSAT 9, PSAT 10, PSAT/NMSQT, and SAT.

GRADING SCALE

- 90-100 A
- 80-89 B
- 70-79 C
- 60-69 D
- 0-59 F

WEIGHTED GRADES

Effective the 2004-2005 school year, several junior/senior classes became weighted. The following schedule will be used to calculate the grades to determine GPA for honor roll and class rank:

A	5.0
B	4.0
C	3.0
D	2.0
F	0

WEIGHTED COURSES

Enriched English III	Economics
Enriched English IV	Spanish III
Advanced Math	Spanish IV
Calculus	Accounting II
Anatomy & Physiology	Advanced Art I
Biology II	Advanced Art II
Chemistry II	Advanced Band
Chemistry III	Advanced Choir
Physics

AGRICULTURE

Introduction to Agriculture

AGR N 101 (18001A001) G *Intro Ag. Industry**

Length: 1 Semester Periods: 1

Grade: 9-12 Prerequisite: None

Introduction to Agriculture is a beginning course about many different aspects of the agricultural industry. Subjects covered during this course will include but are not limited to FFA, ag leadership, welding, small engines, crop science, companion animal science, production animal science, horticulture, electricity, record keeping, soil science, agriculture history, and agriculture careers. Computers are utilized through written reports and internet research. This class can benefit both students who are from an agricultural background as well as those who have no experience in ag.

Agricultural Science

AGR N 201A&B (18003A001) G *Basic Ag Science**

Length: 2 Semesters Periods: 1

Grade: 10-12 Prerequisite: Intro to Ag

Agricultural Science is a second-year course which explores the scientific nature of agriculture. Topics covered in this course may include Agri-science and its effects on how we live, careers, soil science, forestry, wildlife management, aquaculture, plant science, crop science, ornamental plants, genetics, animal science, small animal care and management, food science, and business opportunities in Agri-science. Hands-on experiments and projects will be utilized for many subject areas. This course may count towards a science credit requirement for graduation with permission from the guidance office.

Horticultural Production and Management

AGR N 303A&B (18051A001) G *Basic Hort and Science**

Length: 2 Semesters Periods: 1

Grade: 10-12 Prerequisite: Intro to Ag
or 1 year of science

Horticulture Production and Management is designed for students interested in horticulture. The class gives a science-based approach to the different areas of horticulture and requires some math, reading, and scientific knowledge. Some of the areas include careers, plant physiology, plant anatomy, plant reproduction, greenhouse management, pest management, container plants, landscape design and construction, turf and grass management, vegetable production, small fruit production, large fruit production, and floral designs.

Agribusiness Management

AGR N 401A&B (18201A001) G *Ag. Business Mgt**

Length: 2 Semesters Periods: 1

Grade: 11-12 Prerequisites: Intro to
Ag and 1 other Ag
course, 2 years of math

Agribusiness Management is a course which focuses on the agriculture service industry, those businesses which supply goods and services to the production phase of agriculture. This course requires a great deal of math and reading. Topics covered may include agriculture history, agriculture's scope, new technology, business planning, business organization, cooperatives, financial and other types of recordkeeping, supply and demand, ag. finances, futures markets, marketing, financial analysis, and communications. This course will benefit students seeking future employment in the agriculture service industry or in any business management field. This course may count as the consumer business graduation requirement.

Agricultural Communications and Leadership

AGR N 404 A& B (18203A002) G
Length: 2 Semesters Periods: 1 Offered
Even-Numbered Years
Grade: 11-12 Prerequisite: Intro to Ag

This course is designed to provide students with the knowledge and leadership experiences to help them to become successful in life and in the workplace. Students will further enhance their potential for leadership development, personal growth, and career success. Students will analyze current agricultural issues and determine how they affect people on all sides of the issue. The students then learn and enhance their written and oral communication skills by presenting their views and opinions to the class. Students learn how to arrange and present debates, speeches, and interviews to be effective leaders in today's society. Participation in FFA student organization activities and Supervised Agricultural Experience (SAE) projects is an integral course component for leadership development, career exploration and reinforcement of academic concepts.

**Twin Rivers Course Name*

ART

Introduction to Art

ART N 1102 A&B (05154A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: None

This course is designed to give students a background in many areas of visual art, including design, drawing, painting, sculpture, ceramics, and art history. This course prepares students who may go on to take other art classes and gives a wide background to those who take only one art class. Students may take Introduction to Art at any time during their high school careers, but it is a prerequisite for all other art classes.

Two-Dimensional Art

ART N 1401 A&B (05155A000) G
Length: 2 Semesters Periods: 1
Grade: 10-12 Prerequisite: Intro to Art

In this course, students will create several types of two-dimensional art, including drawings, paintings, and prints using a variety of media including pencil, colored pencil, pastels, ink, watercolors, acrylics, oils and linoleum. While this is primarily a studio art class, students will also learn about several famous artists and their contributions to the history of art. Students may enroll in this course after passing Introduction to Art.

Three-Dimensional Art

ART N 1402A&B (05158A000) G
Length: 2 Semesters Periods: 1
Grade: 10- 12 Prerequisite: Intro to Art

In this course, students will learn techniques such as casting, construction, hand building, and wheel throwing used to create three dimensional sculptures and ceramics. They will use a variety of media including plaster bandages, plaster, plasticine, wire, and metal to create sculptures. Students will use slab, coil, and modeling techniques to hand build a variety of pieces. They will also learn how to create cylinders, vases, bowls, and plates on the potter's wheel. Students will be introduced to a variety of glazes and glazing techniques and electric kiln firing, as well. In addition to producing works of art, students will learn about several famous artists and their contributions to the history of art.

Ceramics

ART N 1102 (05159A000)

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: Intro to
Art & 3-D Art

This course is an extension of the Three-Dimensional Art course for students who would like to learn more about Ceramics. Students will have the opportunity to work more independently on projects of their choice. While students will work exclusively with clay, they may choose to hand build, wheel throw, or both. While improving these skills, students will also gain a greater understanding of glazing and firing, to create the optimum results in their work. Students must pass Introduction to Art and Three-Dimensional Art before taking this course.

Painting

ART N 202 (05157A000) G

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: Intro to
Art & 2 D Art

This course builds on painting skills and techniques that students were introduced to in Two-Dimensional Art. After discussing ideas and techniques with the teacher, students work independently on paintings of their choice. They may use watercolors, watercolor pencils, acrylics, oils, and/or mixed media. Students must pass Introduction to Art and Two-Dimensional Art before taking this course.

Sculpture

ART N 301 (05158A000) GF

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: Intro to
Art & 3-D Art

This course, which is an extension of Three-Dimensional Art, introduces students to a variety of media used to create sculptures. Students will also learn how to create interesting three-dimensional compositions and how to expand

their creativity based on their own ideas and interests. Various media will be used, including: wood, Plasticine, cardboard, wax, plaster, plastic, metal and found objects. Students will also explore the history of three-dimensional art and how art and society influence each other. Students must pass Introduction to Art and Three-Dimensional Art before taking this course.

Drawing

ART N 304 (05156A000) G

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: Intro to
Art & 2-D Art

This course expands student knowledge of various drawing media and techniques that were introduced in Two-Dimensional Art. Students will work independently, drawing the subjects of their choice. They will also have the opportunity to use a variety of media, including pencil, ink, colored pencil, chalk, and oil pastels. Students must pass Introduction to Art and Two-Dimensional Art before taking this course.

Advanced Art I

ART N 401 (05197A000) G Weighted

Length: 1 Semester Periods: 1
Grade: 12 Prerequisite: 6
Semesters of Art, C
or better in all
previous art courses

Advanced Art I and II are the final classes in the art curriculum. In order to take these courses, students must show a strong interest in art and be able to work independently. Students may explore a variety of media in drawing, painting, ceramics, sculpture, and graphic design. Through discussion with the teacher, students select most of their projects and work independently in the completion of those projects.

Advanced Art II

ART N 402 (05197A000) G Weighted
Length: 1 Semester Periods: 1
Grade: 12 Prerequisite:
Advanced Art I,
C or better in all
previous art courses

Students enrolled in Advanced Art II work independently on projects of their choice. With guidance from the teacher, students concentrate on their area(s) of interest. They may choose to draw, paint, sculpt, work in clay, or work on the computer. Those students who are interested in studying art in college will develop a portfolio in preparation for college admission.

At many universities, two years in art classes take the place of a foreign language or vocational education requirement for college admission.

BUSINESS

Accounting I

BUS N 301 A&B (12104A001) G *Acct. I**
Length: 2 Semesters Periods: 1
Grade: 10-12 Prerequisite: None

Accounting I is a basic introduction to the study of accounting principles and practices using automated accounting. The complete accounting cycle covering analyzing transactions, journalizing, posting, petty cash, financial statements, and adjusting and closing entries will be studied. Computerized applications will also be incorporated. The general journal method is used.

Accounting II

BUS N 401A&B (12104A002) G Weighted
*Acct. II**
Length: 2 Semesters Periods: 1
Grade: 11-12 Prerequisite: Min.B
2nd Semester in
Accounting I

Accounting II expands on topics introduced in the first-year course while adding new topics about management accounting, cost accounting, not-for-profit accounting, and financial analysis. Accounting concepts are introduced using modern businesses to which students can relate.

Consumer Business

BUSN 403 (2221A000) G
Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: None

Consumer Business teaches the student to make wise decisions in the use of personal and economic resources. Students will learn about making rational buying decisions, their rights and responsibilities, banking and investing, how to purchase insurance, how to set up a budget, and how to apply and interview for a job. This course satisfies the consumer education graduation requirement.

Business Computer Applications

BUS N 101 A&B (10005A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: None

In Business Computer Applications courses, students expand their knowledge of and experience in the proper and efficient use of previously written software packages, particularly those used in business. Generally, these courses explore a wide range of applications including (but not limited to) word processing, spreadsheet, presentation, graphics, and database programs, and they may also cover topics such as electronic mail, desktop publishing, and telecommunications. Advanced topics may include integrated software

applications, including printed, electronic, and Web publications; computer maintenance activities; and website development.

Creating Entrepreneurial Opportunities

BUS N 501 A& B (12053A001)

Length: 2 Semesters

Periods: 2

Grade: 11-12

Prerequisite:

Required Accuplacer Scores, Application, Interview

CEO is a year-long course designed to utilize partnerships that provide an overview of business development and processes. Our local business community partners with area schools to create project-based experiences for students by providing funding, expertise, meeting space, business tours and one-on-one mentoring. Students visit area businesses, learn from guest speakers, participate in a class business, write business plans, and start and operate their own businesses. Business concepts learned through the experiential CEO class are critical; the 21st Century skills of problem-solving, teamwork, self-motivation, responsibility, higher-order thinking, communication and inquiry are at the heart of a student's development throughout the course. Students may earn the following college credits:

FALL

Business 1101 Intro to Business

Entrepreneurship 1210 Intro to Entrepreneurship

SPRING

Entrepreneurship 1298 Entrepreneur Topics & Issues

Entrepreneurship 2210 Business Portfolio

**Twin Rivers Course Name*

DRIVER ED/HEALTH/PE

Driver Education

DRE N 103 (08152A000) G

Length: 1 Semester

Periods: 1

Grade: 9-12

Prerequisite: Pass at least 8 classes during the previous 2 semesters

The driver education course will include the following: Detailed review of the Illinois Rules of the Road Handbook, detailed review of additional driver education and safety supplementary textbook and related resources, and detailed Illinois Driver's Permit Test preparation and examination completion. Classroom course completion requirements include a minimum 30 hours of Illinois Secretary of State mandated classroom seat time; preparation and successful completion of the Illinois Driver's Permit examination with passing designation; successful completion of all Driver Education supplementary classwork with a passing grade.

NOTE: "A" or "B" grade is required to qualify to attempt Cooperative Driver Testing Program road test with District 20/LHS Driver Education instructor.

NOTE: Successful completion of classroom Driver's Education portion will allow the student to progress to the Behind the Wheel portion of Driver's Education.

Behind the Wheel Course completion requirements include 6 hours of detailed Behind the Wheel instruction and CDTP Road Test preparation and Testing - (if student has met the "A" or "B" requirement in the classroom portion).

NOTE: Chronic absence that results in students not completing the SOS mandated minimum 30 hours of classroom seat time will result in a failing designation and require repeating the classroom portion. There is no "excused" designation for excessive absences.

Driver Education does not count toward LHS District 20 Student GPA.

Health

HLT N 103 (08051A000) G
Length: 1 Semester Periods: 1
Grade: 9-12 Prerequisite: None

The health class presents a variety of topics selected to assist high school students in their understanding of how to become and stay healthy. The class stresses healthy choices and decision-making. A few of the topics included are the latest information on diseases, nutrition, violence prevention, drugs, and alcoholism.

Physical Education

PE N 101A&B (08001A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: None

Physical Education is an integral part of the school curriculum. Among the many benefits of the program to students are increased physical fitness, improved general health, and greater social and emotional development. Psychomotor, cognitive, and affective development are objectives of the physical education curriculum. Physical education is required by the State of Illinois as part of the student's daily schedule and is also a school graduation requirement unless exempt by law. Grades are based on participation and attitude, demonstration of skills, and performance on written tests. A physical education uniform is required.

ENGLISH

English I

ENG N 101 A&B (01001A000) G
Length: 2 Semesters Periods: 1
Grade: 9 Prerequisite: None

This course builds upon students' prior knowledge of grammar, vocabulary, word usage, and the mechanics of writing and includes the four aspects of language use: reading, writing, speaking, and listening. This course introduces and defines various genres of literature, with writing exercises often linked to reading selections. (This class meets the computer literacy requirement of P.A. 101-3654.)

English II

ENG N 201 A&B (1002A001) G
Length: 2 Semesters Periods: 1
Grade: 10 Prerequisite: English I
may be taken
concurrently

The English II curriculum focuses on composition, literature and vocabulary. Grammar and basic sentence structure will be emphasized in this course. Students will learn to construct various types of essays including writing research papers using MLA format. The literature covered is focused on world literature that encompasses both classic and contemporary authors. Journal writing is required. (This class meets the writing intensive requirement of P.A. 94-0676 and computer literacy requirement P.A. 101-0654.)

Enriched English II

ENG N 205 A&B (1002A001) E
Length: 2 Semesters Periods: 1
Grade: 10 Prerequisite: A in
English I or teacher
Recommendation

The English II curriculum focuses on composition, literature and vocabulary. Grammar and basic sentence structure will be

emphasized in this course as students learn to construct various types of essays and journal responses. The literature focuses on both classic and contemporary authors as well as non-fiction reading to begin preparing for the SAT. (This class meets the writing intensive requirement of P.A. 94-0676 and computer literacy requirement P.A. 101-0654.)

English III

ENG N 301 A&B (01003A000) G

Length: 2 Semesters Periods: 1
Grade: 11 Prerequisite:
 English II;
 May be taken
 concurrently with
 Eng.I and/or II

The English III curriculum focuses on composition and American literature. Grammar and basic sentence structure will be emphasized in this course. Students will learn to construct various types of essays. The curriculum will also focus on writing research papers in MLA format. Journal writing is required. Strong emphasis is placed on improving comprehension and writing. (This class meets the writing intensive requirement of P.A. 94-0676 and computer literacy requirement P.A. 101-0654.)

Enriched English III

ENG N 305 A&B (01003A000) E Weighted

Length: 2 Semesters Periods: 1
Grade: 11 Prerequisite: B in
 Enriched English II
 or teacher rec.

Enriched English III Composition and Literature follows the Enriched English II curriculum. Throughout the course of two semesters, students in Enriched English III will integrate writing and vocabulary skills developed in earlier classes. The Enriched program seeks to provide a more in-depth study of the writing process through journal, reading response, compare/contrast, persuasive, research, and timed prompts. Vocabulary building and

grammar lessons are also regular fixtures in the course. Strong emphasis is placed on improving writing and comprehension skills necessary for the SAT exam. The Enriched English III reading list focuses entirely on American literature ranging from Colonial to Contemporary. (This class meets the writing intensive requirement of PA 94-0676 and computer literacy requirement 101-0654.)

English IV

ENG 401 A&B (01004A000) G

Length: 2 Semesters Periods: 1
Grade: 12 Prerequisite: English
 I,II,III may be taken
 concurrently.

English IV is a culmination of the fundamentals of speech, creative writing, literature, and the components of Standard American English. Students will be expected to participate in public speaking (in the classroom), writing for both creative and technical purposes, and reading a variety of texts. (This class meets the writing intensive requirement of P.A. 94-0676 and computer literacy requirement 101-0654.)

Enriched English IV

ENG N 405A&B (01004A000) E Weighted

Length: 2 Semesters Periods: 1
Grade: 12 Prerequisite: B or
 better in previous
 English courses,
 Speech (taken jr.
 year or
 concurrently 1st
 senior semester
 with minimum B)

Enriched English IV focuses extensively on the writing styles that will be required of college students and is designed for students who are college bound. Seniors will write the following types of essays: reflective, compare/contrast, cause/effect, persuasive, and problem/solution. Also covered is the development of the research paper, involving the use and analysis of various

sources, the synthesis of information, and documentation. Grammar and writing effectively are also covered. (This class meets the writing intensive requirement of P.A. 94-676 and computer literacy requirement 101-0654.)

ENGLISH ELECTIVES

Creative Writing

ENG N 1506 (01104A000)

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: None

Through frequent writing exercises, this unconventional writing course will focus on creative expression and the craft of writing instead of solely concentrating on the technicalities of writing. Students will practice developing their unique writer's voice through characterization, dialogue, and narration in fiction and creative non-fiction. Writing is shared in a workshop atmosphere, critiqued, and discussed. Students will research contests and publishing opportunities and will compile a portfolio of original work by the end of the course.

Drama

ENG N 1503 (05055A000)

Length: 1 Semester Periods: 1
Grade: 9-12 Prerequisite: None

This hands-on learning course introduces the basic principles of acting and character analysis. Through studying scripts, performing monologues, directing peers in a performance, and everyday improvisation activities, students will learn the fundamentals of voice and body control. Through cooperative learning and individual practice, students will gain poise and confidence as well as an appreciation for performing arts.

Emerging Media

ENG N 1501 (11056A000) G

Length: 1 Semester Periods: 1
Grade: 9-12 Prerequisite: None

This course provides students with the knowledge and skills to create, design, and produce interactive media products and services. The courses may emphasize the development of digitally generated and/or computer-enhanced media. Topics covered include social media, basic cinematography, advertising layout and design, and digital photography. (Enrollment limit of 15 students.)

Poetry

ENG N 1500 (01061A000) G

Length: 1 Semester Periods: 1
Grade: 9-12 Prerequisite: None

In this course, students will explore poetic form by examining classical and contemporary poems, and writing original poems. Students will be expected to discuss and write analyses of assigned readings on a weekly basis. Students will prepare and share original poetry compositions on a weekly basis. Assessment will be based on weekly response writings, discussion, original poems, various projects, and a final poetry portfolio. No enrollment limit.

Speech

ENG N 1504 (01004A000) G

Length: 1 Semester Periods: 1
Grade: 11-12 Prerequisite: None

The goal of the speech course is to enable the student to understand and apply speech principles. Students will learn how to plan, prepare, rehearse, and present several types of speeches, such as impromptu, informative, persuasive, demonstration, and debate. Students may take speech and English III or English IV concurrently. Effective 2021-2022 school year, speech will be a prerequisite for Enriched English IV (those taking Enriched English IV concurrently must take speech first semester and

developing child. Students interested in the Child and Day Care class as well as any career dealing with children should take this class.

Foods & Nutrition

FCS N 201 (16054A001) *Nutrition & Culinary Arts I**

Length: 2 Semesters Periods: 1
Grade: 10-12 Prerequisite:
Orientation to Home Ec

Foods and Nutrition introduces the students to a more in-depth study of nutrition and the body. The course informs the students of elements of food choice and develops skills in food selection and preparation.

Living Environments

FCS N 303 (19206A001) *Facilities Planning & Management Services**

Length: 1 Semester Periods: 1 (Odd-numbered years)
Grade: 11-12 Prerequisite:
Orientation to Home Ec

Living Environments allows students the opportunity to explore the various facets of securing a home. Students study housing styles, design terminology, and consumer aspects of securing and maintaining a home.

Parenting

FCS 203 (19052A001) *Parenting**

Length: 1 Semester Periods: 1 (Even-numbered years)
Grade: 11-12 Prerequisite:
Orientation to Home Ec

The Parenting class is designed to familiarize students with the various aspects of parenting, including birth, child development, and child care. Students receive hands-on experience with “Real Care Infant Simulator”

**Twin Rivers Course Name*

Foundations to Teaching

FCS 600 (19151A001)

Length: 1 semester Period: 1
Grade: 10-12 Prerequisite: None

This course introduces students to the principles underlying teaching and learning, responsibilities and duties of teachers, and strategies and techniques to deliver knowledge and information. A combination of classroom and field experiences will enable the student to gain skilled knowledge and understanding of the education profession. Course content includes projects to develop an understanding of the learner and the learning process, instructional planning, the learning environment, assessment and instructional strategies, career opportunities in the field of education, and Illinois regulations and licensing requirements.

Classroom Management 101

FCS 610 (19154A001)

Length: 1 semester Period: 1
Grade: 10-12 Prerequisite:
Foundations to Teaching

This course presents best practices in classroom and behavior management. Topics will include: organizing time, instruction, materials, and classroom space; strategies for managing individual and large group student behaviors; developing relationships with students, staff, and parents; managing transitions, lab activities, and other arrangements for classrooms in general and special education.

FOREIGN LANGUAGE

Spanish I

SPA N 101 A&B (06101A000) G

Length: 2 Semesters

Periods: 1

Grade: 9- 12

Prerequisite: C or
better in English I

Spanish I is an introductory course to the Spanish language, customs, and civilization. This course will enable students to reach a measurable degree of proficiency in each of the four language skills: listening, speaking, reading, and writing. Grades are based on participation, reading, quizzes, chapter and unit tests

Spanish II

SPA N 201 A&B (06102A000) G

Length: 2 Semesters

Periods: 1

Grade: 10-12

Prerequisite: C or
better in Spanish I

Spanish II is an intermediate course in the Spanish language, customs and civilization of the Spanish-speaking world. This is a more intensive study in the four language skills. Grades are based on participation, reading, quizzes, chapter and unit tests, vocabulary quizzes and tests.

Spanish III

SPA N 301 A&B (06103A000) E Weighted

Length: 2 Semesters

Periods: 1

Grade: 11-12

Prerequisite: C or
better in Spanish II

Given the expectation of an advanced Spanish course, the student's prior grammar and language arts performance will be considered. Performance in core language arts has a direct correlation to potential for success in advanced foreign language. Spanish 3 is a college/university prep level course as opposed to the introductory/intermediate focus of Spanish I and II.

In addition, a Level 3 foreign language course brings in an independent study aspect. The student's ability to take initiative and work independently is not only an expectation, but a requirement. At this level as opposed to introductory/intermediate courses (Spanish I or II), it is assumed the student not only has the prerequisite language and grammar skills, but also the ability to complete assignments and projects independently with the instructor functioning as facilitator. In this situation, the student takes the primary responsibility for successfully completing the coursework. In addition, there are peripheral reading assignments and projects that require a strong grammar and language arts background and a strong skill set from the introductory and intermediate Spanish courses, making developed independent organizational skills mandatory. Past performance in any/all coursework is to be reviewed when considering enrollment in the course. If the student has an extensive record of late work or incomplete work, attendance and/or behavioral issues that indicate potential disruption to the class, this can and will be a consideration before they are allowed to enroll in the course. This is also paramount in that the individual student's past performance in these areas not only affects their potential for success but also the other students in the class as well.

Spanish IV

SPA N 301 A&B (06104A000) E Weighted

Length: 2 Semesters

Periods: 1

Grade: 12

Prerequisite: C or
better in Spanish III

Given the expectation of an advanced Spanish course, the student's prior grammar and language arts performance will be considered. Performance in core language arts has a direct correlation to potential for success in advanced foreign language. Spanish III is a college/university prep level course as opposed to the introductory/intermediate focus of Spanish I and II.

In addition, a level 4 foreign language course brings in an independent study aspect. The student's ability to take initiative and work independently is not only an expectation, but a requirement. At this level as opposed to introductory/intermediate courses (Spanish I or II), it is assumed the student not only has the prerequisite language and grammar skills, but also the ability to complete assignments and projects independently with the instructor functioning as facilitator. In this situation, the student takes the primary responsibility for successfully completing the coursework. In addition, there are peripheral reading assignments and projects that require a strong grammar and language arts background and a strong skill set from the introductory and intermediate Spanish courses, making developed independent organizational skills mandatory. Past performance in any/all coursework is to be reviewed when considering enrollment in the course. If the student has an extensive record of late work or incomplete work, attendance and/or behavioral issues that indicate potential disruption to the class, this can and will be a consideration before they are allowed to enroll in the course. This is also paramount in that the individual student's past performance in these areas not only affects their potential for success but also the other students in the class as well.

Foreign language may be required for admission to many four-year universities. Admission requirements for individual universities may be researched on college websites or through resources available in the guidance office.

HEALTH OCCUPATIONS

Health Occupations I

HLT N 301 A&B (14051A000) *G Nursing Assistant 1 **

Length: 2 Semesters

Grade: 11-12

Periods: 2

Prerequisite:

Interest in health as a career, application & interview

Health Occupations will provide students with the opportunity to become a certified nursing assistant. All students must meet the Illinois Department of Public Health requirements. Excellent attendance is required for IDPH, and students must be able to demonstrate learned skills as mandated by IDPH. Students will learn skills required and gain knowledge of disease processes. Clinical rotations are required by IDPH, students will be required to provide uniforms, and other possible fees required by state. Regular attendance is mandatory. The IDPH mandates the required hours needed to be eligible to take the CNA exam. Absences beyond the required hours will result in failure to obtain certification.

**Twin Rivers Course Name*

INDUSTRIAL ARTS

Introduction to Industrial Arts

IND N 101 (13303A000) G

Length: 2 semesters Periods: 1
Grade: 9-12 Prerequisite: None

This course introduces students to the care and maintenance of a wide range of industrial equipment, including chain and gear drives, couplings, and fluid power equipment. Course topics may include lubricants and lubrication, the replacement of seals and bearings, and the correct application and selection of hand and power tools. Advanced courses may emphasize motor alignment using laser alignment, milling operations, turning operations, welding, technical drawings, and quality control. Successful completion of this class is needed to enter the Introduction to Welding class and Metal and Wood Processing/Production.

Introduction to Industry Basics CE (Construction/Electricity) G

IND N 110 A&B (IN101)

Length: 2 semesters Periods: 1
Grade: 9-12 Prerequisite: None

This course includes two 9-week segments, with the two courses being Construction/Drafting and Electricity. Each segment will cover the resources, technical processes, industrial applications, technological impact and occupations encompassed by that system. (A shop safety test must be passed in order to earn shop privileges. Be advised: Misconduct in the shop can result in removal from the course.) Successful completion of this two-segment course provides the orientation needed to enter into the Introduction to Construction and Introduction to Electricity courses.

Metal and Wood Processing/Production

IND N 250 (13053A000) G

Length: 2 Semesters Periods: 1
Grade: 10-12 Prerequisite: Intro to Industrial Arts and/or Intro to Ag (2023-2024 school year)

Metal and Wood Processing/Production courses allow students to study the physical and chemical properties of metals, woods, and composites and to use these materials to construct usable products according to industry standards. These courses enable students to experience the process of translating an idea into a finished product, with instruction in planning, designing, selecting materials, and using tools and machines.

Introduction to Welding

IND N 200 A&B (13207A003) G

Length: 2 semesters Periods: 1
Grade: 10-12 Prerequisite: Intro to Industrial Arts and/or Intro to Ag (2023-2024 school year)

This course enables students to gain knowledge of the properties, uses, and applications of various metals, skills in various processes used to join and cut metals (such as oxyacetylene, shielded metal, metal inert gas, and tungsten arc processes), and experience in identifying, selecting, and rating appropriate techniques. Welding courses often include instruction interpreting blueprints or other types of specifications. Students who took Intro to Ag or Intro to CTE prior to the 2023-24 school year may enroll.

Introduction to Construction

IND 210 (13052A001) G

Length: 1 semester Periods: 1
Grade: 10-12 Prerequisite: Intro to Industry Basics CE

This course is designed to foster an awareness and understanding of construction technology. Through a variety of learning activities, students are exposed to many career opportunities in the production field. Students will be exposed to

product design, materials and processes, tools and equipment, procedures, site preparation, foundations, building structures, installing utilities, and finishing and servicing structures. (A shop safety test must be passed in order to earn shop privileges. Be advised: Misconduct in the shop can result in removal from the course.)

Introduction to Electricity

IND 220 (20101A001) G
 Length: 1 semester Periods: 1
 Grade: 10-12 Prerequisite: Intro to Industry Basics CE

Areas of study will include electrical fundamentals; conservation of energy, residential application in receptacles, single pole 3-way/4-way light switches, 120-volt power distribution and breaker boxes. Students will use laboratory experiences to become familiar with current energy technologies. (A shop safety test must be passed in order to earn shop privileges. Be advised: Misconduct in the shop can result in removal from the course.)

MATHEMATICS

Mathematics I

MTH N 1101 A&B (02301A000) G
 Length: 2 Semesters Periods: 1
 Grade: 9 Prerequisite: None

Mathematics I focuses on mathematical concepts such as signed numbers, fractions, decimals, estimation, etc. This course also covers algebra concepts such as solving linear equations, graphing lines and writing linear equations. This course will also integrate geometry concepts such as triangle and parallel line properties and proofs (This course meets P.A.94-0676(SB575) Geometry Concepts).

Mathematics II

MTH N 1205 A&B (02302A000) G
 Length: 2 Semesters Periods: 1
 Grade: 10- 12 Prerequisite: Math I
 Mathematics II is the study of absolute value

equations, rational exponents, quadratics, similar figures/dilation, volume, right triangles/trigonometry, probability, and circle geometry. The students learn to apply these concepts to real world situations. (This course meets P.A. 94-0676(SB575 Algebra I.)

Enriched Math II

MTH N 1210 A&B (02302A000) E
 Length: 2 Semesters Periods: 1
 Grade: 10 Prerequisite: B or better in Math I; Teacher Rec.

Enriched Mathematics II is the study of absolute value equations, rational exponents, quadratics, similar figures/dilation, volume, right triangles/trigonometry, probability, and circle geometry. The students learn to apply these concepts to real world situations. This class will work at a faster pace and may cover material more in depth. (This course meets P.A. 94-0676(SB575 Algebra I.)

Intermediate Math I

MTH N 210 A&B (02054A000) G
 Length: 2 semesters Periods: 1
 Grade: 10- 12 Prerequisite: Math I and Teacher Rec.

This class is designed to serve as a bridge between Math I and Math II. This course covers algebra concepts such as solving linear equations and inequalities, graphing lines, writing linear equations, systems of linear equations and inequalities, distance, and midpoint. This course also covers exponent rules, radical rules, and introduces quadratics.

Intermediate Math II

MTH N 310 A&B (02055A000) G
 Length: 2 semesters
 Periods:1
 Grade: 11-12 Prerequisite: Math II and Teacher Rec.

MUSIC

Band

MUS N 101 A&B (05101A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: 8th Grade
Band or permission of
Instructor

Band is a class in which students learn their individual band instrument and techniques of performance and rehearsal in a large group. Students learn basic music theory, history and performance in accordance with the Illinois Learning Standards. Grades are determined by attendance, written and performance exams, and overall musicianship. First semester band students may be exempt from physical education requirements for being in the marching band.

Advanced Band

MUS N 107 A&B (05101A000) E Weighted
Length: 2 Semesters Periods: 1
Grade: 12 Prerequisite: 3 years
of high school band

Band is a class in which students learn their individual band instrument and techniques of performance and rehearsal in a large group. Students learn basic music theory, history and performance in accordance with the Illinois Learning Standards. Grades are determined by attendance, written and performance exams, and overall musicianship. First semester band students may be exempt from physical education requirements for being in the marching band.

Choir

MUS N 103 A&B (05110A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: Teacher
Rec.

Choir is mainly a performance ensemble, but students are also required to begin to have a basic knowledge of reading music, and increase that knowledge throughout their time in the class. There are typically 2 required performances per semester. These performances are considered test grades for the course. Occasional participation grades will be recorded in the grade book, and there will be music theory assignments due every class period. Students will not be required to sing alone in front of the class, but will be asked to make vocal recordings for assignments.

Advanced Choir

MUS N 109 A&B (05110A000) E Weighted
Length: 2 Semesters Periods: 1
Grades: 12 Prerequisite: 3 years
of high school choir

Advanced Choir requires more solo performance experiences to students who take the course. Students will be required to participate in 2 of the following opportunities: Millikin Vocal Fest and take a voice lesson if they are accepted, ILMEA Auditions, or Solo and Ensemble. There are typically 2 required ensemble performances per semester. These performances are considered test grades for the course. Occasional participation grades will be recorded in the grade book, and music theory assignments will be at a much more advanced level, mainly geared toward students interested in taking collegiate level music courses. Students will not be required to sing alone in front of the class, but will be asked to make vocal recordings for assignments.

SCIENCE

Integrated Lab Science

SCI N 105 A&B (03201A000) G
Length: 2 Semesters Periods: 1
Grade: 9-12 Prerequisite: Teacher
Rec., 8th Grade Science,
HS Biology I Teacher

Integrated Lab Science provides an introduction to the major concepts in the sciences of chemistry physics, biology, astronomy, and geology. Students study several different branches within each field. They also study how each of these fields of science benefit mankind.

Science Inquiry

SCI N 101 A&B (03204A000) G

Length: 2 Semesters Periods:1

Grade: 9-12 Prerequisite: None

This course emphasizes the process of science. Scientific process and experimentation will be emphasized. Students will develop their skills in developing hypotheses and experimental design. Data representation will be an emphasis as well. Students will create graphical representations of their data and articulate their underlying meaning. Scientific reading will also be emphasized.

Chemistry I

SCI N 203 A&B (03101A000) G

Length: 2 Semesters Periods: 1

Grade: 10- 12 Prerequisite: C in
Biology 1 and Math 1
or Teacher Rec.

Chemistry I is the next class in the standard sequence after Biology I for most college-bound students and serves as a prerequisite for all of the advanced science courses. Chemistry I explores the basic interactions of matter, including the mathematical descriptions of these interactions. Topics include the atomic structure of matter, chemical bonding and chemical reactions, along with introduction to various lab techniques.

Chemistry II

SCI N 303 A&B (0312A000) E Weighted

Length: 2 Semesters Periods: 1

Grade: 11-12 Prerequisite: Chemistry I

This course covers atomic structure including the development of the atomic model, the

quantum mechanical nature of electrons, the corresponding structure of the periodic table, bonding and naming compounds, mole concept, chemical structures, kinetic theory of solids, liquids and gases, solutions, acids and bases, chemical kinetics, organic chemistry, redox reactions, and thermochemistry

Chemistry III

SCI N 406 A&B (03102A000) E Weighted

Length: 2 Semesters Periods:1

Grade: 12 Prerequisite: A in
Chem II and/or Teacher
Rec.

Chemistry III is offered only to very advanced students who have demonstrated a mastery of fundamental chemistry concepts. Class presumes that the student has mastered the skills of Chemistry I and Chemistry II. Class will be offered concurrent with another class that the instructor will be devoting most of the class time to. The instructor will offer guidance and feedback digitally and as much as possible during the other class. Students must be very self-motivated and remain in contact with the instructor for feedback via digital communications. Topics covered will include organic chemistry, advanced topics in equilibrium, redox reactions, kinetics and thermodynamics. Lab work will include qualitative and quantitative analysis.

Physics

SCI N 403 A&B (03151A000) E Weighted

Length: 2 Semesters Periods: 1

Grade: 12 Prerequisite:
Advanced Math

Physics is a lab course that investigates topics such as motion, energy, forces, and light and sound waves. The course also explores the mathematical relationships between matter, energy, and motions.

developing systems of life, along with the interaction of geography, helps students understand the world as it is today.

World History is a graduation requirement.

United States History

SOC N 201 A&B (0401A000) G

Length: 2 Semesters Periods: 1

Grade: 10-12 Prerequisite: None

United States History studies events from the American Revolutionary period through the present. Students will study the impact of historical events on people, as well as the impact people have had on historical events. The course focuses on primary general, historical concepts and applying them to specific historical content throughout the United States' history. Elements including political ideologies, socio political beliefs, and cultural practices are covered. The coursework not only covers United States history at large, but makes direct links to Illinois State history in relevant content and context. U.S. History is a graduation requirement.

Civics

SOC N 301 (0416A000) G

Length: 1 Semester Periods: 1

Grade Level: 11-12 Prerequisite: None

Civics class develops students' knowledge of government including both the function and the responsibilities. It also gives students the understanding of their own roles in government and other civic activities. The class will focus specifically on the relationship between the citizenry and their state and local government. During the course of study, students will display the knowledge learned in class first hand by attending civic meetings, writing op-eds for the local and/or regional newspapers and other service-learning activities. The class also compares our own government to those of other areas of the world. Civics will also include the discussion of current and controversial issues and simulations of the democratic process. Included within the course is the study of the

United States Constitution, the Flag Code, and the Illinois Constitution. This course is a graduation requirement. Transfer students who have passed the constitution exams are exempt from this course requirement.

In order to graduate, a student must pass Civics, a test on the United States Constitution, the Flag Code, and the Illinois Constitution.

** Students will provide their own means of attending civic meetings outside of school hours. Any student that does not have means of attending a civic meeting outside of class will NOT be penalized: however, the student will need to opt to do another service learning activity (ex.: write a letter to the editor on a specific topic).

SOCIAL STUDIES ELECTIVES

Economics

SOC N 1403 A&B (04201A000) E Weighted

Length: 2 Semesters Periods: 1

Grade: 11-12 Prerequisite: Min. B
in U.S. History

This course focuses on the economy of the United States and how it affects its citizens and the world as a whole. This course utilizes class discussions, readings, graphs and charts, group projects, study guides, and writings. This class satisfies the consumer education graduation requirement.

Psychology

SOC N 402 (04254A000) G

Length: 1 Semester Periods: 1

Grade: 11-12 Prerequisite: Min. C
in U.S. History

Psychology is the study of the behavior of the individual. Students learn the science of psychology, the biological basis of behavior, states of consciousness, lifespan development, learning, personality, and psychological

Cooperative Education CTE Course

Elect N 100 A&B (22153A001) G

Length: 2 Semesters Periods:1

Grade: 11-12 Prerequisite: Intro CTE
Class, Application, &
Interview

Cooperative Education is a capstone course designed to assist students in the development of effective skills and attitudes through practical, advanced instruction in school and on the job through cooperative education. Students are released from school for their paid cooperative education work experience and participate in 200 minutes per week of related classroom instruction. Classroom instruction focuses on providing students with job survival skills and career exploration skills related to the job and improving students' abilities to interact positively with others. For skills related to the job, refer to the skill development course sequences, the task list or related occupational skill standards of the desired occupational program. The course content includes the following broad areas of emphasis: further career education opportunities, planning for the future, job-seeking skills, personal development, human relationships, legal protection and responsibilities, economics and the job, organizations, and job termination. A qualified career and technical education coordinator is responsible for supervision. Written training agreements and individual student training plans are developed and agreed upon by the employer, student and coordinator. The coordinator, student, and employer assume compliance with federal, state, and local laws and regulations.

Self-Management & Career Exploration

Elect N 500 A&B (22207A000) G

Length: 2 Semesters Periods:1

Grade:9-12 Prerequisite: None

This course introduces students to the skills and strategies helpful in becoming more focused,

productive individuals. This course may emphasize goal-setting; decision-making; managing time, energy, and stress; and identifying alternatives and coping strategies. Students will also explore various career opportunities.

STEP WORK I &II

Elect N 300 A&B (22998A000) R

Length: 2 Semesters Periods: 1 or 2

Grade:11-12 Prerequisite:
Individual
Education Plan
& Application

This Workplace Experience course provides students with work experience in a field related to their interests. Goals are typically set cooperatively by the student, teacher, and employer (although students are not necessarily paid). These courses may include classroom activities as well, involving further study of the field or discussion regarding experiences that students encounter in the workplace.

Aviation/Pilot

UAS N 1215 (20053A001) G

Length: 1 Semester Periods: 1

Grade: 11-12 Prerequisite: Must be
minimum 16 years of
age

In this class students will learn the Federal Aviation Administration's (FAA) rules of the road for drone flights. Subject matter students will be taught include: limits of drone use, airspace, weather, safety protocols, and mission planning. After successful completion of Unmanned Aerial Pilot I, students will be prepared to sit for the FAA 60 question knowledge exam to become a certified drone pilot. (Certification test not included in class)

Unmanned Aerial Mission Planning

UAS N 1210 (20053A000) G

Length: 1 Semester Periods: 1

Grade: 11-12 Prerequisite: UAS 1215

This course will get students familiar with how to prepare and perform drone flight missions both efficiently and safely. Students will build on their knowledge gained from Unmanned Aerial Pilot I and put it into action by creating plans for drone flight. These missions can include industries such as: Public safety, logistics, real estate, agriculture, and others.

On -Line Dual Credit/Wabash Valley Community College

Length: 1 Semester Periods: 1

Grades: 11-12 Prerequisite:
Qualifying SAT,
Accuplacer Score
or EV Form

Lawrenceville High School will be offering online dual credit courses in conjunction with the Illinois Eastern Community Colleges. Students will be scheduled a block of time dedicated to work on the course. Students must meet required Accuplacer score requirements and prerequisites prior to enrollment. Students are responsible for obtaining the textbook and any other required materials prior to day one of the semester. Students should contact the bookstore of the campus which offers the course to determine necessary supplies. Once a student enrolls in a class and maintains enrollment through the 10-day enrollment period, FCC will generate an invoice for the \$40 (per credit hour) Dual Credit Fee.

A list of courses is available in the guidance office

School within School

School within School (SWIS) is a credit recovery program that utilizes the Odyssey online curriculum. Students are referred to the program by the counseling office.

FireFighter I

Elect N 600 A&B (151152A001) G

Length: 2 semesters Periods: 1

Grade: 11-12 Prerequisite:
Minimum 16
years of age

This course is designed to provide students with the skills needed to prevent and extinguish fires, maintain and repair fire service-related equipment, provide basic emergency medical treatment, and prepare public service information concerning fires and hazardous materials. Instruction includes the physical characteristics of fire as well as general safety practices, basic fire behavior, and extinguishing principles. Students learn rescue and extrication procedures, types and use of ground ladders, proper ventilation techniques, and appropriate use of various water supply systems, and how to use ropes and tie knots. Students also learn basic emergency medical techniques and practices which include medical legal considerations, terminology, airway management, patient assessment and transportation, and emergency treatment. Students will complete the 40-Hour First Responder course.
