

FACILITIES COMMITTEE

The Facilities Committee met twice this year. We have updated the Committee on the RI Department of Education grant we secured to conduct a district wide facilities study. RIDE is requiring every District in RI to have a facilities plan in order to be able to qualify for reimbursements on projects which include identified immediate health and safety concerns.

We secured a RIDE Technical Assistance Grant and were awarded of up to \$150,000, to fund the facilities study. Our next step is to work off of the State bid list, which will save us time and money, to identify vendors to perform the facilities study. We then request identified vendors we wish to solicit proposals from.

Our next step is to reconvene the committee and begin the vendor selection process.
