

When to Stay Home

SOUTH VERMILLION SCHOOL CORPORATION

It does not matter if your child has a fever or not. If they are not feeling well, keep them home.

Does your child have one or more symptoms of COVID or does not feel well?

Sore throat, chills, cough, shortness of breath, new onset of severe headache, new loss of smell or taste, stuffy nose that is unusual for them, abdominal pain, nausea, vomiting or diarrhea, or temperature >100.4 F?

YES

Keep your child home and contact your school.

NO

Thank you for doing the daily screening. We look forward to seeing your student at school!

Has anyone in your household been tested for COVID and is currently awaiting their results because they were exposed to COVID or are sick?

YES

Please notify your school and keep any student that is a household contact at home until the results come back.

Return to School Options for the Student Experiencing COVID Symptoms

Contact your doctor. You can have your child seen and get a return to school note.

Remember: If your student had a temperature >100.4 F, vomiting, or diarrhea, even if you have a doctor's note stating they can return on a certain day, you must keep your child home until they have been fever or symptom-free for 24 hours without the use of medications.

Schedule an appointment to have a PCR test completed. It generally takes 48-72 hours for results. If the test is negative and your child's symptoms have improved, they can return once the school has a copy of your results.

We can no longer accept a rapid test result unless your child has been seen by a doctor to clinically correlate findings of the test.

Keep your child home for 10 days from onset of symptoms and have them complete their work daily on CANVAS. Symptoms must have improved prior to returning to school.
