We carry the following childhood vaccines all the time!

Vaccine	Does my child need this?
Hepatitis A (HepA)	Yes! Anybody that was not vaccinated as a toddler needs 2 doses of this vaccine.
Hepatitis B (HepB)	Yes! Anybody that was not vaccinated as an infant needs 3 doses of this vaccine
Human papillomavirus (HPV)	Yes! All preteens need 2 doses of HPV vaccine at age 11-12 years. Older teens who haven't been vaccinated will need 2 or 3 doses.
Influenza (Flu)	Yes! Everyone aged 6 months and older needs an annual flu vaccine every fall or winter for the rest of their lives.
Measles, mumps, rubella (MMR)	Yes! All children require 2 doses of MMR vaccine, the first at 12-15 months and the second at 4-6 years. <i>(also see MMRV recommendations below)</i>
Meningococcal ACWY (MenACWY, MCV4)	Yes! All preteens and teens need 2 doses of MenACWY vaccine, the first at 11-12 years and the second at 16 years. First-year college students living in residence halls and those with certain risk factors may need a booster dose. Ask your pharmacist or doctor for more information.
Pneumococcal (Pneumovax, PPSV23; Prevnar, PCV13)	Maybe, anybody that was not vaccinated as an infant or with certain risk factors should receive the PCV13 and/or PPSV23 vaccine. Ask your pharmacist or doctor for more information.
Tetanus, diphtheria, whooping cough (Tdap) <small>*For people 7 years and older</small>	Yes! All preteens and teens need a dose. Thereafter, everyone needs a Tdap booster shot at least every ten years

Please call ahead to make sure we have the following vaccines in stock:

Vaccine	Does my child need this?
Chickenpox (varicella; VAR)	Yes! Anybody that has not been vaccinated or had chickenpox needs 2 doses of VAR vaccine, the first at 12-15 months and the second at 4-6 years. <i>(also see MMRV recommendations below)</i>
Haemophilus influenzae type b (Hib)	Maybe, anybody that was not vaccinated as an infant or with certain risk factors might require this vaccine. Ask your pharmacist or doctor for more information.
Meningococcal B (MenB)	Maybe, teens who want to be protected or with certain risk factors should receive 2 doses of MenB vaccine starting at age 16 years. Ask your doctor or pharmacist for more information.
Polio (IPV)	Yes! All kids require a booster dose when they are 4-6 years old. Also, anybody that was not vaccinated as an infant should complete the 3-dose series as soon as possible!
Diphtheria, tetanus, whooping cough (DTaP) <small>*For children 0-6 years old</small>	Yes! All kids require a booster dose when they are 4-6 years old.
Measles, mumps, rubella, varicella (MMRV)	Maybe, anybody that has not received 2 doses of the Chickenpox and MMR vaccine can get two doses of this combination vaccine instead

 All insurance accepted
 Discounted prices for cash payers
 Not sure if your child received a recommended vaccine? We can look at their history for free!

Vaccines: Just one of the many things you do to protect your kids!
