

Vision To Learn

As a healthcare organization, Vision To Learn is following expert guidance to minimize COVID-19 risk. Our priority is to keep students, school staff, employees and anyone who comes in contact with our clinics safe and healthy as we provide vision care to our patients.

HEALTH & SAFETY PRACTICES

Health guidelines: We follow Centers for Disease Control (CDC) and local guidelines.

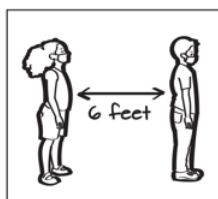

COVID-19 screening: Staff must pass health and wellness screening and infrared temperature checks before working.

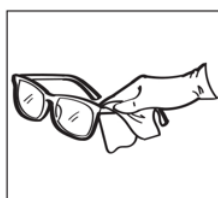

Personal protective equipment: Staff wear shields and masks. New disposable gloves used for each patient in exams and dispensing. Masks provided to students if they do not have one.

Touchless exams: Screenings and exams have been redesigned to be touchless.

Social distancing: One patient allowed on the mobile clinic at a time. Number of students limited and spaced appropriately while waiting to enter the clinic.

Sanitizing: Before each patient, we disinfect all optometric equipment and surfaces that could come into contact with the patient, including frames.
