

March 23, 2021

Good Afternoon,

We have received confirmation of some changes in the guidelines for travel and those vaccinated as related to COVID. The NYSDOH has approved the guidelines below.

Travel Guidance:

As of April 1, 2021 there is NO requirement for quarantine after domestic travel. The NYSDOH has updated its [Travel Guidance](#) accordingly. However, **International travelers are still subject to mandatory quarantines**. In addition, ALL travelers, domestic or international, still must complete the [NYS Traveler Health Form](#).

COVID Exposure Update:

● **For Those who are VACCINATED**

Consistent with recent CDC guidance, **asymptomatic individuals who have been fully vaccinated** against COVID-19 do not need to quarantine during the first 3 months after full vaccination, if the following criteria are met:

- o Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine); and
- o Are within 3 months following receipt of the last dose in the series; AND
- o Have remained asymptomatic since last COVID-19 exposure.

● **For Those who have Previously Tested Positive**

Consistent with CDC guidance from February 13, 2021, **asymptomatic individuals who have previously been diagnosed** with laboratory confirmed COVID-19 and have since recovered, are not required to retest and quarantine within 3 months after the date of symptom onset from the initial SARS-CoV-2 infection or date of first positive diagnostic test if asymptomatic during illness.

I hope this information helps to provide some clarity. If you have any questions, please reach out to me.

Thank you and Stay SAFE!
