Independent Auditor's Report

To the Board of Education
Van Dyke Public Schools

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Van Dyke Public Schools (the "School District") as of and for the year ended June 30, 2020 and the related notes to the financial statements, which collectively comprise Van Dyke Public Schools' basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of Van Dyke Public Schools as of June 30, 2020 and the respective changes in its financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As described in Note 2 to the financial statements, as of July 1, 2019, the School District adopted the provisions of Governmental Accounting Standards Board (GASB) Statement No. 84, *Fiduciary Activities*. Our opinion is not modified with respect to this matter.

To the Board of Education
Van Dyke Public Schools

Required Supplemental Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and other required supplemental information, as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplemental information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplemental Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Van Dyke Public Schools' basic financial statements. The other supplemental information, as identified in the table of contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements.

The other supplemental information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplemental information is fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated September 14, 2020 on our consideration of Van Dyke Public Schools' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Van Dyke Public Schools' internal control over financial reporting and compliance.

Plante & Moran, PLLC

September 14, 2020

This section of the annual financial report for Van Dyke Public Schools (the "School District") presents our discussion and analysis of the School District's financial performance during the year ended June 30, 2020. Please read it in conjunction with the School District's financial statements, which immediately follow this section.

Using This Annual Report

This annual report consists of a series of financial statements and notes to those financial statements. These statements are organized so the reader can understand Van Dyke Public Schools financially as a whole. The government-wide financial statements provide information about the activities of the whole School District, presenting both an aggregate view of the School District's finances and a longer-term view of those finances. The fund financial statements provide the next level of detail. For governmental activities, these statements tell how services were financed in the short term and what remains for future spending. The fund financial statements look at the School District's operations in more detail than the government-wide financial statements by providing information about the School District's most significant funds - the General Fund and the Bond Debt Service Fund - with all other funds presented in one column as nonmajor funds. This report is composed of the following elements:

Management's Discussion and Analysis (MD&A) (Required Supplemental Information)

Basic Financial Statements

Government-wide Financial Statements

Fund Financial Statements

Notes to Financial Statements

Required Supplemental Information

Budgetary Comparison Schedule - General Fund

Schedule of the School District's Proportionate Share of the Net Pension Liability

Schedule of Pension Contributions

Schedule of the School District's Proportionate Share of the Net OPEB Liability

Schedule of OPEB Contributions

Other Supplemental Information

Reporting the School District as a Whole - Government-wide Financial Statements

One of the most important questions asked about the School District is, "As a whole, what is the School District's financial condition as a result of the year's activities?" The statement of net position and the statement of activities, which appear first in the School District's financial statements, report information on the School District as a whole and its activities in a way that helps you answer this question. We prepare these statements to include all assets, deferred outflows of resources, liabilities, and deferred inflows of resources using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenue and expenses are taken into account, regardless of when cash is received or paid.

These two statements report the School District's net position - the difference between assets plus deferred outflows of resources and liabilities plus deferred inflows of resources, as reported in the statement of net position - as one way to measure the School District's financial health or financial position. Over time, increases or decreases in the School District's net position - as reported in the statement of activities - are indicators of whether its financial health is improving or deteriorating. The relationship between revenue and expenses is the School District's operating results. However, the School District's goal is to provide services to our students, not to generate profits as commercial entities do. One must consider many other nonfinancial factors, such as the quality of the education provided and the safety of the schools, to assess the overall health of the School District.

The statement of net position and the statement of activities report the governmental activities for the School District, which encompass all of the School District's services, including instruction, support services, community services, athletics, and food services. Property taxes, unrestricted state aid (foundation allowance revenue), and state and federal grants finance most of these activities.

Reporting the School District's Fund Financial Statements

The School District's fund financial statements provide detailed information about the most significant funds, not the School District as a whole. Some funds are required to be established by state law and by bond covenants. However, the School District establishes many other funds to help it control and manage money for particular purposes (the Food Service Fund is an example) or to show that it is meeting legal responsibilities for using certain taxes, grants, and other money (such as bond-funded construction funds used for voter-approved capital projects).

Governmental Funds

Governmental fund reporting focuses on showing how money flows into and out of funds and the balances left at year end that are available for spending. They are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the operations of the School District and the services it provides. Governmental fund information helps determine whether there are more or fewer financial resources that can be spent in the near future to finance the School District's programs. We describe the relationship (or differences) between governmental activities (reported in the statement of net position and the statement of activities) and governmental funds in a reconciliation.

The School District as a Whole

Recall that the statement of net position provides the perspective of the School District as a whole. The following table provides a summary of the School District's net position as of June 30, 2020 and 2019:

	Governmental Activities	
	2020	2019
	(in millions)	
Assets		
Current and other assets	\$ 10.5	\$ 9.6
Capital assets	70.6	72.5
Total assets	81.1	82.1
Deferred Outflows of Resources	19.2	20.0
Liabilities		
Current liabilities	3.4	3.7
Noncurrent liabilities	58.2	60.9
Net pension liability	54.7	51.9
Net OPEB liability	11.7	13.4
Total liabilities	128.0	129.9
Deferred Inflows of Resources	12.0	11.4
Net Position		
Net investment in capital assets	14.5	13.6
Restricted	0.5	0.2
Unrestricted	(54.7)	(53.0)
Total net position	\$ (39.7)	\$ (39.2)

The above analysis focuses on net position. The change in net position of the School District's governmental activities is discussed below. The School District's net position was \$(39.7) million at June 30, 2020. Net investment in capital assets totaling \$14.5 million compares the original cost, less depreciation of the School District's capital assets, to long-term debt used to finance the acquisition of those assets. Most of the debt will be repaid from voter-approved property taxes collected as the debt service comes due. Restricted net position is reported separately to show legal constraints from debt covenants and enabling legislation that limit the School District's ability to use that net position for day-to-day operations. The remaining amount of net position (\$(54.7) million) was unrestricted.

The \$(54.7) million in unrestricted net position of governmental activities represents the accumulated results of all past years' operations and the impact from adoption of GASB Statement Nos. 68 and 75 (recording the School District's share of the net pension and OPEB liabilities from the state-managed retirement system). Unrestricted net position, when available, would enable the School District to meet working capital and cash flow requirements, as well as to provide for future uncertainties. The operating results of the General Fund and the change in the net pension/OPEB liabilities will have significant impacts on the change in unrestricted net position from year to year.

Management's Discussion and Analysis (Continued)

As required by the Governmental Accounting Standards Board (GASB), the School District adopted GASB Statement No. 84, *Fiduciary Activities*, as of July 1, 2019. This standard provides guidance on the identification and reporting of fiduciary activities and required the School District to evaluate activities to determine if they were fiduciary in nature. The standard also changed the reporting and presentation requirements of fiduciary activities. The effect of the adoption on the governmental activities was to increase July 1, 2019 beginning net position by \$199,215, which represents the activities that used to be reported as fiduciary but are now reported as governmental under GASB 84. The governmental statement of net position at June 30, 2020 and statement of activities for the year ended June 30, 2020 include all the balances and transactions for those activities that used to be reported as fiduciary but are now reported as governmental. All school districts were required to adopt this new standard unless they elected to defer for one year, as allowed under GASB Statement No. 95.

The results of this year's operations for the School District as a whole are reported in the condensed statement of activities below, which shows the changes in net position for the years ended June 30, 2020 and 2019:

	Governmental Activities	
	2020	2019
	(in millions)	
Revenue		
Program revenue:		
Charges for services	\$ -	\$ 0.1
Operating grants	10.3	11.9
Capital grants	-	(1.2)
General revenue:		
Taxes	9.1	8.1
State aid not restricted to specific purposes	15.8	16.6
Other	0.3	1.3
Total revenue	35.5	36.8
Expenses		
Instruction	17.3	17.5
Support services	12.5	12.0
Athletics	0.4	0.4
Food services	1.6	1.6
Community services	0.1	0.1
Debt service	2.1	2.8
Depreciation expense (unallocated)	2.2	2.2
Total expenses	36.2	36.6
Change in Net Position	(0.7)	0.2
Net Position - Beginning of year, as restated	(39.0)	(39.5)
Net Position - End of year	<u>\$ (39.7)</u>	<u>\$ (39.3)</u>

As reported in the statement of activities, the cost of all of our governmental activities this year was \$36.2 million. Certain activities were partially funded from those who benefited from the programs or by other governments and organizations that subsidized certain programs with grants and contributions (\$10.3 million). We paid for the remaining public benefit portion of our governmental activities with \$9.1 million in taxes, \$15.8 million in state foundation allowance, and our other revenue (i.e., interest and general entitlements).

The School District experienced a decrease in net position of \$0.7 million.

As discussed above, the net cost shows the financial burden that was placed on the State and the School District's taxpayers by each of these functions. Since property taxes for operations and unrestricted state aid constitute the vast majority of district operating revenue sources, the Board of Education and administration must annually evaluate the needs of the School District and balance those needs with state-prescribed available unrestricted resources.

The School District's Funds

As we noted earlier, the School District uses funds to help it control and manage money for particular purposes. Looking at funds helps the reader consider whether the School District is being accountable for the resources taxpayers and others provide to it and may provide more insight into the School District's overall financial health.

As the School District completed this year, the governmental funds reported a combined fund balance of \$7.3 million, which is an increase of \$1.1 million from last year. The primary reasons for the increase are as follows:

In the General Fund, our principal operating fund, the fund balance increased by \$0.7 million. The change is due mainly to a reduction in expenditures due to the COVID-19 school closure in March of this fiscal year.

Combined, the fund balance of our capital project funds had a net increase of \$0.3 million. The main component of this change is the November 2018 passage of the new Sinking Fund. This was the first year taxes were levied, and funds are earmarked for an upgrade in the security camera system. Due to COVID-19 closure, this project has been postponed until the 2020-2021 school year.

With the adoption of GASB 84, the School District created the Student Activities Fund, a special revenue fund, to account for activities previously reported as fiduciary funds. The effect of the adoption was to increase the July 1, 2019 beginning fund balance by \$199,215. Fund balance increased for the year ended June 30, 2020 as a result of the change from GASB 84 and current year operations.

Budgetary Highlights

Over the course of the year, the School District revises its budget as it attempts to deal with unexpected changes in revenue and expenditures. State law requires that the budget be amended to ensure that expenditures do not exceed appropriations. This year was unusual due to the timing of the COVID-19 pandemic and the uncertainty of the financial impact it would have on our economy. The State periodically holds a Consensus Revenue Estimating Conference (CREC) to estimate revenue. Normally, these conferences are held two times per year, in January and May. The results of the May CREC were bleak, showing a significant shortfall in both the State's General Fund and School Aid Fund. Due to the uncertainty, a special August CREC was held, which estimated that funds were sufficient, as the impact of federal stimulus packages was underestimated and tax revenue did not decline to the extent originally projected. The School District's final budget was based on the May CREC, while the school aid budget was based on the August CREC.

The final amendment to the budget was adopted in June 2020. A schedule showing the School District's original and final budget amounts compared with amounts actually paid and received is provided in the required supplemental information section to these financial statements

There were significant revisions made to the 2019-2020 original budget. Budgeted revenue was decreased by \$706,000 primarily due to an estimated decrease in funding from state sources. Budgeted expenditures decreased by \$107,000 to account for the decrease resulting from the School District's revised operating plan due to the fluctuations in revenue.

There were significant variances between the final budget and actual amounts. The 2019-2020 School Aid Fund budget was not finalized until August, two months after the close of the fiscal year. The total revenue increased by approximately \$987,000 due to revenue from state sources coming in higher than projected. Expenditures decreased by approximately \$1,200,000 mainly due to the COVID-19 shutdown from March through June. It is expected that these savings are temporary and will catch up in the following fiscal year.

Capital Assets and Debt Administration**Capital Assets**

As of June 30, 2020 and 2019, the School District had \$70.6 million and \$72.5 million, respectively, invested in a broad range of capital assets, including land, buildings, vehicles, furniture, and equipment. This represents a net decrease (including additions, disposals, and depreciation) of approximately \$1.9 million from 2019 to 2020.

	2020	2019
Land	\$ 263,562	\$ 263,562
Buildings and improvements	66,166,173	67,761,950
Furniture and equipment	3,219,428	3,391,594
Buses and other vehicles	196,894	205,043
Land improvements	774,907	914,301
Total capital assets - Net of accumulated depreciation	\$ 70,620,964	\$ 72,536,450

This year's additions of \$0.3 million included cafeteria equipment, technology, building renovations, and classroom equipment. There is a technology network project planned for the 2020-2021 fiscal year. We present more detailed information about our capital assets in the notes to the financial statements.

Debt

At the end of this year, the School District had \$48.6 million in bonds outstanding versus \$50.7 million in the previous year.

The School District's general obligation bond rating continues to be A- with a stable outlook. The State limits the amount of general obligation debt that schools can issue to 15 percent of the assessed value of all taxable property within the School District's boundaries. If the School District issues qualified debt (i.e., debt backed by the State of Michigan), such obligations are not subject to this debt limit. The School District's outstanding unqualified general obligation debt is significantly below this statutorily imposed limit.

Other obligations include accrued vacation pay and sick leave. We present more detailed information about our long-term liabilities in the notes to the financial statements.

Economic Factors and Next Year's Budgets and Rates

Our elected officials and administration consider many factors when setting the School District's 2020-2021 fiscal year budget. One of the most important factors affecting the budget is our student count. The state foundation revenue is determined by multiplying the blended student count by the foundation allowance per pupil. Approximately 62.0 percent of total General Fund revenue is from the foundation allowance per pupil. Under state law, the School District cannot access additional property tax revenue for general operations. As a result, district funding is heavily dependent on the State's ability to fund local school operations. The School District is projecting a blended enrollment of 2,202 for the 2020-2021 school year, approximately 3.9 percent less than the current year. This number is an estimate based on historical information and projections prepared by an outside consultant.

The 2020-2021 budget assumes a foundation allowance of \$7,849 in 2020-2021, no change from the 2019-2020 final budget, and \$456 less than 2018-2019. The budget also assumes all other state categorical funding will remain the same. For the first time in nine years, the state Legislature did not pass a budget prior to the start of the School District's fiscal year. Since the School District's revenue is heavily dependent on state funding and the health of the State's School Aid Fund, the actual revenue received depends on the State's ability to collect revenue to fund its appropriation to the School District. As previously mentioned, the School District based the budget on the May Consensus Revenue Estimating Conference, which estimated a significant shortfall in the School Aid Fund. Since then, a special August CREC was held, and funds were adjusted positively. The School District is still not at the level of revenue expected prior to the COVID-19 pandemic; however, the revenue outlook has improved and is estimated to be sufficient to fund the estimated appropriation with no reduction to foundation allowance.

Once the State's school aid budget is final and student count and related per pupil funding are validated, state law requires the School District to amend the budget if actual district resources are not sufficient to fund original appropriations.

On March 10, 2020, a county-wide regional enhancement millage was passed by voters in Macomb, authorizing 1.9 mills to be collected for a period of 10 years. This millage will allow districts to continue to provide quality programs, as the State School Aid Fund continues to dedicate funds for other governmental obligations.

The School District has five union groups as part of its workforce and has successfully negotiated contracts with each group. Three expire on June 30, 2021, and two will expire on June 30, 2022.

Contacting the School District's Management

This financial report is intended to provide our taxpayers, parents, and investors with a general overview of the School District's finances and to show the School District's accountability for the money it receives. If you have any questions about this report or need additional information, we welcome you to contact the business office at 23500 MacArthur Blvd, Warren, MI 48089.

Governmental Funds

Reconciliation of the Balance Sheet to the Statement of Net Position

June 30, 2020

Fund Balances Reported in Governmental Funds	\$ 7,255,634
Amounts reported for governmental activities in the statement of net position are different because:	
Capital assets used in governmental activities are not financial resources and are not reported in the funds:	
Cost of capital assets	118,701,106
Accumulated depreciation	<u>(48,080,142)</u>
Net capital assets used in governmental activities	70,620,964
Receivables that are not collected soon after year end are not available to pay for current period expenditures and, therefore, are reported as unavailable revenue in the funds	115,654
Deferred outflows related to bond refundings are not reported in the funds	955,062
Bonds payable and the associated premium are not due and payable in the current period and are not reported in the funds	(54,549,436)
Accrued interest is not due and payable in the current period and is not reported in the funds	(263,749)
Some employee fringe benefits are payable over a long period of years and do not represent a claim on current financial resources; therefore, they are not reported as fund liabilities:	
Employee compensated absences	(485,806)
Self-insurance	(752,350)
Net pension liability and related deferred inflows and outflows	(44,422,293)
Net OPEB liability and related deferred inflows and outflows	(13,850,861)
Revenue in support of pension contributions made subsequent to the measurement date is reported as a deferred inflow of resources in the statement of net position and is not reported in the funds	(1,786,765)
Other long-term liabilities, such as installment purchase agreements, do not present a claim on current financial resources and are not reported as fund liabilities	<u>(2,540,000)</u>
Net Position of Governmental Activities	<u>\$ (39,703,946)</u>

Governmental Funds

Statement of Revenue, Expenditures, and Changes in Fund Balances

Year Ended June 30, 2020

	General Fund	Bond Debt Service Fund	Nonmajor Funds	Total Governmental Funds
Revenue				
Local sources	\$ 4,753,030	\$ 4,273,723	\$ 517,622	\$ 9,544,375

Governmental Funds

**Reconciliation of the Statement of Revenue, Expenditures, and Changes in
Fund Balances to the Statement of Activities**

Year Ended June 30, 2020

Net Change in Fund Balances Reported in Governmental Funds	\$ 1,071,042
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures; however, in the statement of activities, these costs are allocated over their estimated useful lives as depreciation:	
Capitalized capital outlay	276,915
Depreciation expense	(2,192,401)
Revenue in the statement of activities that does not provide current financial resources is not reported as revenue in the funds until it is available	13,947
Revenue in support of pension contributions made subsequent to the measurement date	77,243
Repayment of bond principal is an expenditure in the governmental funds but not in the statement of activities (where it reduces long-term debt); amortization of premium/discounts and inflows/outflows related to bond refundings are not expenses in the governmental funds	2,511,658
Interest expense is recognized in the government-wide statements as it accrues	12,295
Some employee costs (pension, OPEB, and compensated absences) do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds	(2,715,011)
Repayment of installment purchase agreement is an expenditure in the governmental funds but not in the statement of activities (where it reduces long-term debt)	244,000
Change in Net Position of Governmental Activities	<u>\$ (700,312)</u>

June 30, 2020**Note 1 - Nature of Business**

Van Dyke Public Schools (the "School District") is a school district in the state of Michigan that provides educational services to students.

Note 2 - Significant Accounting Policies***Accounting and Reporting Principles***

The School District follows accounting principles generally accepted in the United States of America (GAAP), as applicable to governmental units. Accounting and financial reporting pronouncements are promulgated by the Governmental Accounting Standards Board (GASB). The following is a summary of the significant accounting policies used by the School District:

Reporting Entity

The School District is governed by an elected seven-member Board of Education. In accordance with government accounting principles, there are no separate legal entities appropriate to be reported within these financial statements.

Report Presentation

Governmental accounting principles require that financial reports include two different perspectives - the government-wide perspective and the fund-based perspective. The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units, as applicable. The government-wide financial statements are presented on the economic resources measurement focus and the full accrual basis of accounting. Property taxes are recognized as revenue in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. The statements also present a schedule reconciling these amounts to the modified accrual-based presentation found in the fund-based statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenue includes: (1) charges to customers or applicants for goods, services, or privileges provided; (2) operating grants and contributions; and (3) capital grants and contributions, including special assessments. Taxes, unrestricted intergovernmental receipts, and other items not properly included among program revenue are reported instead as general revenue.

As a general rule, the effect of interfund activity has been removed from the government-wide financial statements.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds, if any, are reported as separate columns in the fund financial statements.

June 30, 2020**Note 2 - Significant Accounting Policies (Continued)*****Fund Accounting***

The School District accounts for its various activities in several different funds in order to demonstrate accountability for how it spends certain resources; separate funds allow the School District to show the particular expenditures for which specific revenue is used. The various funds are aggregated into the following fund types:

Governmental Funds

Governmental funds include all activities that provide general governmental services that are not business-type activities. Governmental funds can include the General Fund, special revenue funds, debt service funds, capital project funds, and permanent funds. The School District reports the following funds as major governmental funds:

- The General Fund is the primary operating fund because it accounts for all financial resources used to provide government services other than those specifically assigned to another fund.
- The Bond Debt Service Fund is used to record tax, interest, and other revenue for payment of bond interest, principal, and other expenditures.

Additionally, the School District reports the following nonmajor governmental fund types:

- The Sinking Funds report capital project activities funded with the Sinking Fund millage. The 2001 Sinking Fund Levy has expired, and there is no continued source of revenue to the fund. The 2018 Sinking Fund started collecting revenue in 2019 and will continue to do so.
- Special revenue funds are used to account for the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes. The School District has two special revenue funds: the Food Service Fund and Student Activities Fund. Revenue sources for the Food Service Fund include sales to customers and dedicated grants from federal sources. Revenue sources for the Student Activity Fund includes fundraising revenue and donations earned and received by student groups. Any operating deficit generated by this activity is the responsibility of the General Fund.

Interfund Activity

During the course of operations, the School District has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column.

Furthermore, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements, these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column.

Basis of Accounting

The governmental funds use the current financial resources measurement focus and the modified accrual basis of accounting. This basis of accounting is intended to better demonstrate accountability for how the School District has spent its resources.

June 30, 2020**Note 2 - Significant Accounting Policies (Continued)**

Expenditures are reported when the goods are received or the services are rendered. Capital outlays are reported as expenditures (rather than as capital assets) because they reduce the ability to spend resources in the future; conversely, employee benefit costs that will be funded in the future (such as pension and retiree health care-related costs or sick and vacation pay) are not counted until they come due for payment. In addition, debt service expenditures, claims, and judgments are recorded only when payment is due.

Revenue is not recognized until it is collected or collected soon enough after the end of the year that it is available to pay for obligations outstanding at the end of the year. For this purpose, the School District considers amounts collected within 60 days of year end to be available for recognition. Revenue not meeting this definition is classified as a deferred inflow of resources.

Proprietary funds and fiduciary funds, as applicable, use the economic resources measurement focus and the full accrual basis of accounting. Revenue is recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows.

Specific Balances and Transactions**Cash and Investments**

Cash and cash equivalents include cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value except for investments in external investment pools, which are valued at amortized cost.

Inventories and Prepaid Items

Inventories are valued at cost, on a first-in, first-out basis. Inventories accounted for using the purchase method are recorded as expenditures when purchased and include all inventories of governmental funds other than commodities within the Food Service Fund. Inventories accounted for using the consumption method are recorded as expenditures when consumed rather than when purchased and include commodities within the Food Service Fund. Certain payments to vendors reflect costs applicable to future fiscal years and are recorded as prepaid items in both government-wide and fund financial statements, when applicable.

Restricted Assets

The following amounts are reported as restricted assets:

- Unspent property taxes levied held in the debt service funds required to be set aside for future bond principal and interest payments
- Unspent property taxes levied and held in the Sinking Fund required to be set aside for construction or allowable purchases

Capital Assets

Capital assets are reported in the applicable governmental activities column in the government-wide financial statements. Capital assets are defined by the School District as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation. Costs of normal repair and maintenance that do not add to the value or materially extend asset life are not capitalized. The School District does not have infrastructure-type assets.

June 30, 2020

Note 2 - Significant Accounting Policies (Continued)

Capital assets are depreciated using the straight-line method over the following useful lives:

	Depreciable Life - Years
Buildings and improvements	20 to 50
Furniture and equipment	5 to 15
Buses and other vehicles	8
Land improvements	20

Long-term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed at the time they are incurred. In the fund financial statements, governmental fund types recognize bond issuances and premiums as other financing sources and bond discounts as other financing uses.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element represents a consumption of net position that applies to future periods and will not be recognized as an outflow of resources (expense/expenditure) until then.

The School District reports deferred outflows related to deferred charges on refundings and deferred pension and OPEB plan costs.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element represents an acquisition of net position that applies to future periods and will not be recognized as an inflow of resources (revenue) until that time.

The School District reports deferred inflows related to revenue in support of pension contributions made subsequent to the measurement date and deferred pension and OPEB plan cost reductions.

Net Position

Net position of the School District is classified in three components. Net investment in capital assets consists of capital assets net of accumulated depreciation and is reduced by the current balances of any outstanding borrowings used to finance the purchase or construction of those assets. The restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Unrestricted net position is the remaining net position that does not meet the definition of invested in capital or restricted.

Net Position Flow Assumption

The School District will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements (as applicable), a flow assumption must be made about the order in which the resources are considered to be applied. It is the School District's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

June 30, 2020**Note 2 - Significant Accounting Policies (Continued)****Fund Balance Flow Assumptions**

The School District will sometimes fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the School District's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Furthermore, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The nonspendable fund balance component represents amounts that are not in spendable form or are legally or contractually required to be maintained intact. Restricted fund balance represents amounts that are legally restricted by outside parties, constitutional provisions, or enabling legislation for use for a specific purpose. The School District itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the School District's highest level of decision-making authority. The Board of Education is the highest level of decision-making authority for the School District that can, by passing a resolution prior to the end of the fiscal year, commit fund balance. Once passed, the limitation imposed by the resolution remains in place until a similar action is taken (the passing of another resolution) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes, but do not meet the criteria to be classified as committed. The School District has, by resolution, authorized the finance director to assign fund balance. The Board of Education may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

The fund balance policy prescribes no minimum fund balance of budgeted annual expenditures in the General Fund, with the goal to increase the annual minimum fund balance to 15 percent of budgeted annual expenditures by 2022. This is deemed by the School District to be the prudent amount to maintain the ability to meet obligations as they come due throughout the year.

Property Tax Revenue

All trade and property tax receivables are shown net of an allowance for uncollectible amounts. The School District considers all receivables to be fully collectible; accordingly, no allowance for uncollectible amounts is recorded. Property taxes are assessed as of December 31, and the related property taxes become a lien on December 1 of the following year. These taxes are billed on July 1 for approximately 50 percent of the taxes and on December 1 for the remainder of the property taxes. Taxes are considered delinquent on March 1 of the following year. At this time, penalties and interest are assessed, and the total obligation is added to the county tax rolls.

Note 2 - Significant Accounting Policies (Continued)

Pension and Other Postemployment Benefit (OPEB) Plans

For purposes of measuring the net pension and net OPEB liabilities, deferred outflows of resources and deferred inflows of resources related to each plan, and pension and OPEB expense, information about the fiduciary net position of the Michigan Public School Employees' Retirement System (MPERS) and additions to/deductions from MPERS fiduciary net position have been determined on the same basis as they are reported by MPERS. MPERS uses the economic resources measurement focus and the full accrual basis of accounting. Contribution revenue is recorded as contributions are due, pursuant to legal requirements. Benefit payments (including refunds of employee contributions) are recognized as expenses when due and payable in accordance with the plan benefit terms. Related plan investments are reported at fair value.

Compensated Absences (Vacation and Sick Leave)

It is the School District's policy to permit employees to accumulate earned but unused sick and vacation pay benefits. Sick pay is accrued for the estimated amount that the School District will pay upon employment termination; vacation pay is accrued when incurred. Both of these are reported in the government-wide statements. A liability for these amounts is reported in governmental funds only for employee terminations as of year end. Generally, the funds that report each employee's compensation are used to liquidate the obligations.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

Upcoming Accounting Pronouncement

In June 2017, the GASB issued Statement No. 87, *Leases*, which improves accounting and financial reporting for leases by governments. This statement requires recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The School District does not believe this standard will have a significant impact on the financial statements when adopted. The provisions of this statement were originally effective for the School District's financial statements for the year ending June 30, 2021 but were extended to June 30, 2022 with the issuance of GASB Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance*.

Adoption of New Accounting Pronouncement

During the current year, the School District adopted GASB Statement No. 84, *Fiduciary Activities*, which establishes criteria for identifying and reporting fiduciary activities. As a result of implementing this standard, the following activities were previously reported as fiduciary activities but no longer meet the definition of such; therefore, these activities are now reported within a nonmajor governmental special revenue fund.

June 30, 2020

Note 2 - Significant Accounting Policies (Continued)

The effect of this new standard on net position/fund balance was as follows:

	Governmental Activities	Nonmajor funds
Net position/fund balance - June 30, 2019 - As previously reported	\$ (39,202,849)	\$ 689,787
Adjustment for GASB Statement No. 84 - To change fund type	199,215	199,215
Net position/fund balance - June 30, 2019 - As restated	<u>\$ (39,003,634)</u>	<u>\$ 889,002</u>

Note 3 - Stewardship, Compliance, and Accountability

Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles and state law for the General Fund and all special revenue funds. All annual appropriations lapse at fiscal year end.

The budget document presents information by fund and function. The legal level of budgetary control adopted by the governing body (i.e., the level at which expenditures may not legally exceed appropriations) is the function level. State law requires the School District to have its budget in place by July 1. Expenditures in excess of amounts budgeted are a violation of Michigan law. State law permits districts to amend their budgets during the year. During the year, the budget was amended in a legally permissible manner to decrease the budgeted state revenue by approximately \$737,000, decrease instructional expenditures (basic program) by approximately \$234,000, and decrease instructional expenditures (added needs) by approximately \$236,000. The budget statements contain expenditure classification differences from the basic financial statements due to capital outlay expense being presented on a functional basis for budget purposes.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g., purchase orders or contracts) outstanding at year end are reported as restrictions, commitments, or assignments of fund balances and do not constitute expenditures or liabilities because the goods or services have not been received as of year end; the commitments will be reappropriated and honored during the subsequent year.

Excess of Expenditures Over Appropriations in Budgeted Funds

The School District did not have significant expenditure budget variances.

Sinking Fund Compliance

The 2001 and 2018 Sinking funds record capital project activities funded with the Sinking Fund millage. For the both of these funds, authorized prior to March 29, 2017, the School District has complied with the applicable provisions of §1212 of the State of Michigan Revised School Code.

Note 4 - Deposits and Investments

State statutes and the School District's investment policy authorize the School District to make deposits in the accounts of federally insured banks, credit unions, and savings and loan associations that have offices in Michigan. The School District is allowed to invest in U.S. Treasury or agency obligations, U.S. government repurchase agreements, bankers' acceptances, certificates of deposit, commercial paper rated prime at the time of purchase that matures not more than 270 days after the date of purchase, mutual funds, and investment pools that are composed of authorized investment vehicles. The School District's deposits and investments are in accordance with statutory authority.

The School District has designated four banks for the deposit of its funds.

There are no limitations or restrictions on participant withdrawals for the investment pools that are recorded at amortized cost except for a one-day minimum investment period on MILAF cash management funds and a 14-day redemption limitation on MILAF MAX Class funds.

June 30, 2020

Note 4 - Deposits and Investments (Continued)

The School District's cash and investments are subject to several types of risk, which are examined in more detail below:

Custodial Credit Risk of Bank Deposits

Custodial credit risk is the risk that, in the event of a bank failure, the School District's deposits may not be returned to it. The School District's investment policy requires that financial institutions be evaluated and only those with an acceptable risk level be used for the School District's deposits for custodial credit risk. At year end, the School District had \$4,584,966 of bank deposits (certificates of deposit and checking and savings accounts) that were uninsured and uncollateralized. The School District believes that, due to the dollar amounts of cash deposits and the limits of FDIC insurance, it is impractical to insure all deposits. As a result, the School District evaluates each financial institution with which it deposits funds and assesses the level of risk of each institution; only those institutions with an acceptable estimated risk level are used as depositories.

Custodial Credit Risk of Investments

Custodial credit risk is the risk that, in the event of the failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The School District's investment policy for custodial credit risk states custodial credit risk will be minimized by prequalifying the financial institutions, broker/dealers, intermediaries, and advisors with which the School District will do business using the criteria established in the investment policy. At June 30, 2020, the School District does not have investments with custodial credit risk.

Interest Rate Risk

Interest rate risk is the risk that the value of investments will decrease as a result of a rise in interest rates. The School District's investment policy does not restrict investment maturities, other than commercial paper, which can only be purchased with a 270-day maturity. The School District's policy minimizes interest rate risk by structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities in the open market, and investing operating funds primarily in shorter-term securities, liquid asset funds, money market mutual funds, or similar investment pools and limiting the average maturity in accordance with the School District's cash requirements.

Credit Risk

State law limits investments in commercial paper to the top two ratings issued by nationally recognized statistical rating organizations. The School District's investment policy does not further limit its investment choices. As of June 30, 2020, the credit quality ratings of debt securities (other than the U.S. government) are as follows:

Investment	Carrying Value	Rating	Rating Organization
MILAF+ MAX Class funds	\$ 783,847	AAAm	S&P

June 30, 2020

Note 5 - Unavailable/Unearned Revenue

Governmental funds report unavailable revenue in connection with receivables for revenue that is not considered to be available to liquidate liabilities of the current period. Governmental funds also report unearned revenue recognition in connection with resources that have been received but not yet earned.

At June 30, 2020, the various components of unearned and unavailable revenue were as follows:

	Governmental Funds	
	Deferred Inflow - Unavailable	Liability - Unearned
Delinquent property taxes	\$ 115,654	\$ -
Grant and categorical aid payments received prior to meeting all eligibility requirements	-	148,775
Total	<u>\$ 115,654</u>	<u>\$ 148,775</u>

Note 6 - Capital Assets

Capital asset activity of the School District's governmental activities was as follows:

Governmental Activities

	Balance July 1, 2019	Transfers	Additions	Disposals and Adjustments	Balance June 30, 2020
Capital assets not being depreciated - Land	\$ 263,562	\$ -	\$ -	\$ -	\$ 263,562
Capital assets being depreciated:					
Buildings and improvements	97,969,976	-	7,597	-	97,977,573

Furniture and equipment	9,470,951	-	441,484	-	9,912,435
Buses and other vehicles	1,478,673	-	8,149	-	1,486,822
Land improvements	4,730,091	-	139,394	-	4,869,485
Subtotal	45,887,741	-	2,192,401	-	48,080,142
Net capital assets being depreciated	72,272,888	-	(1,915,486)	-	70,357,402
Net governmental activities capital assets	<u>\$ 72,536,450</u>	<u>\$ -</u>	<u>\$ (1,915,486)</u>	<u>\$ -</u>	<u>\$ 70,620,964</u>

Depreciation expense was not charged to activities, as the School District considers its assets to benefit multiple activities, and allocation is not practical.

June 30, 2020

Note 7 - Interfund Receivables, Payables, and Transfers

The composition of interfund balances is as follows:

Fund Due To	Fund Due From		
	Bond Debt Service Fund	Nonmajor Governmental Funds	Total
General Fund	\$ 222	\$ 52,681	\$ 52,903

These balances result from the time lag between the dates that goods and services are provided or reimbursable expenditures occur, transactions are recorded in the accounting system, and payments between funds are made.

Interfund transfers reported in the fund financial statements are composed of the following:

General Fund transfers are used to support and maintain the operations of the funds for the purpose for which they were created. During the year ended June 30, 2020, transfers to the General Fund from the Food Service Fund in the amount of \$103,698 represent the reimbursement of costs paid by the General Fund.

Note 8 - Long-term Debt

Long-term debt activity for the year ended June 30, 2020 can be summarized as follows:

	Beginning Balance	Additions	Reductions	Ending Balance	Due within One Year
Bonds payable:					
Direct borrowings and direct placements - School bond loan fund	\$ 98,639	\$ -	\$ (98,639)	\$ -	\$ -
Other debt - General obligations	50,700,000	-	(2,115,000)	48,585,000	2,070,000
Unamortized bond premiums	6,315,973	-	(351,537)	5,964,436	351,537
Total bonds payable	57,114,612	-	(2,565,176)	54,549,436	2,421,537
Compensated absences	376,603	130,227	(21,024)	485,806	-
Self-insurance	646,500	2,392,013	(2,286,163)	752,350	-
Installment purchase agreement	2,784,000	-	(244,000)	2,540,000	252,000
Total long-term debt	\$ 60,921,715	\$ 2,522,240	\$ (5,116,363)	\$ 58,327,592	\$ 2,673,537

The School District had deferred outflows of \$955,062 related to deferred charges on bond refundings at June 30, 2020.

June 30, 2020

Note 8 - Long-term Debt (Continued)

General Obligation Bonds and Contracts

The School District issues general obligation bonds to provide for the acquisition and construction of major capital facilities. General obligations have been issued for governmental activities. General obligation bonds are direct obligations and pledge the full faith and credit of the School District. The School District's qualified bonds are fully guaranteed by the State of Michigan. The primary source of any required repayment is from the School District's property tax levy; however, the State of Michigan may withhold the School District's state aid funding in order to recover amounts it has paid on behalf of the School District. General obligations outstanding at June 30, 2020 are as follows:

	Remaining Annual Installments	Interest Rates	Maturing	Outstanding
\$27,010,000 refunding bonds (2017 Refunding, Series A)	\$500,000 - \$2,255,000	3.0 - 5.0%	May 1, 2038	\$ 26,060,000
\$5,155,000 refunding bonds (2017 Refunding, Series B)	\$1,000,000	1.7 - 2.7%	May 1, 2023	3,000,000
\$12,350,000 refunding bonds (2017 Refunding, Series C)	\$570,000 - \$1,130,000	4.0 - 5.0%	May 1, 2035	12,350,000
\$7,175,000 refunding bonds (2019 Refunding)	\$1,245,000 - \$1,650,000	4.0%	May 1, 2040	7,175,000
Total governmental activities				<u>\$ 48,585,000</u>

Other Long-term Liabilities

The employee compensated absences obligation as of June 30, 2020 in the amount of \$485,806 will be liquidated primarily by the General Fund. The liability for compensated absences reported in the government-wide statements consists of earned but not used accumulated vacation and sick leave benefits. A liability for these amounts is reported in governmental funds as it comes due for payment. The liability has been calculated using the vesting method, in which leave amounts for both employees who are currently eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination are included.

Debt Service Requirements to Maturity

Annual debt service requirements to maturity for the above bonds and installment purchase agreement obligations are as follows:

Years Ending June 30	Governmental Activities		
	Other Debt		Total
	Principal	Interest	
2021	\$ 2,322,000	\$ 2,330,446	\$ 4,652,446
2022	2,358,000	2,257,548	4,615,548
2023	2,396,000	2,181,268	4,577,268
2024	2,069,000	2,089,974	4,158,974
2025	2,167,000	1,992,496	4,159,496
2026-2030	12,193,000	8,324,224	20,517,224
2031-2035	14,000,000	5,214,000	19,214,000
2036-2040	13,620,000	1,562,800	15,182,800
Total	<u>\$ 51,125,000</u>	<u>\$ 25,952,756</u>	<u>\$ 77,077,756</u>

June 30, 2020

Note 8 - Long-term Debt (Continued)

School Loan Revolving Fund

The School Loan Revolving Fund payable represents notes a direct borrowing from the State of Michigan for loans made to the School District, as authorized by the 1963 State of Michigan Constitution, for the purpose of paying principal and interest on general obligation bonds of the School District issued for capital expenditures. Interest rates are to be annually determined by the State Administrative Board in accordance with Section 9 of Act No. 92 of the Public Acts of 2005 (the "Act"), as amended. The School Loan Revolving Fund is accessible to school districts for borrowings that initiated after July 19, 2015. Interest during the year ended June 30, 2020 was 3.44213 percent. Repayment begins as soon as annual tax collections exceed annual debt service payment requirements. The predetermined mandatory final loan repayment date is May 1, 2046. If the School District fails to levy the appropriate debt mills in accordance with the agreement or defaults in loan repayment, the School District shall increase its debt levy in the next succeeding year, and a default late charge of 3 percent will apply. Due to the variability of the factors that affect the timing of repayment, including the future amount of state equalized value of property in the School District, no provision for repayment has been included in the above debt maturity schedule. If the School District is in default of the loan agreement, the State of Michigan may withhold state aid funding until repayment terms satisfactory to the State of Michigan have been made. The School Loan Revolving Fund was paid off during the fiscal year.

Note 9 - Risk Management

The School District is exposed to various risks of loss related to property loss, torts, errors and omissions, and employee injuries (workers' compensation), as well as medical benefits provided to employees. The School District has purchased commercial insurance for property loss claims and participates in the Metropolitan Association for Improved School Legislation (MAISL) risk pool for claims relating to workers' compensation and general liability. The School District's maximum loss is limited to an aggregate loss amount based on a stop-loss formula outlined in the insurance agreement. All claims filed on a calendar-year basis in excess of the loss funded are paid by an excess insurer. The School District is partially insured for health claims and dental claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

The shared risk pool program in which the School District participates operates as a common risk-sharing management program for school districts in Michigan; member premiums are used to purchase commercial excess insurance coverage and to pay member claims in excess of deductible amounts.

The School District estimates the liability for health and dental claims that have been incurred through the end of the fiscal year, including claims that have been reported and those that have not yet been reported. Changes in the estimated liability for the past two fiscal years were as follows:

	Health and Dental	
	2020	2019
Estimated liability - Beginning of year	\$ 646,500	\$ 650,700
Estimated claims incurred, including changes in estimates	2,392,013	2,821,196
Claim payments	(2,286,163)	(2,825,396)
Estimated liability - End of year	<u>\$ 752,350</u>	<u>\$ 646,500</u>

Note 10 - Michigan Public School Employees' Retirement System***Plan Description***

The School District participates in the Michigan Public School Employees' Retirement System (the "System"), a statewide, cost-sharing, multiple-employer defined benefit public employee retirement system governed by the State of Michigan that covers substantially all employees of the School District. Certain school district employees also receive defined contribution retirement and health care benefits through the System. The System provides retirement, survivor, and disability benefits to plan members and their beneficiaries. The System also provides postemployment health care benefits to retirees and beneficiaries who elect to receive those benefits.

The System is administered by the Office of Retirement Services (ORS). The Michigan Public School Employees' Retirement System issues a publicly available financial report that includes financial statements and required supplemental information for the pension and postemployment health care plans. That report is available on the web at <http://www.michigan.gov/orsschools>, or by writing to the Office of Retirement Services at 7150 Harris Drive, P.O. Box 30171, Lansing, MI 48909.

Benefits Provided

Benefit provisions of the defined benefit (DB) pension plan and the postemployment health care plan are established by state statute, which may be amended. Public Act 300 of 1980, as amended, establishes eligibility and benefit provisions for the defined benefit pension plan and the postemployment health care plan.

Depending on the plan option selected, member retirement benefits are calculated as final average compensation times years of services times a pension factor ranging from 1.25 percent to 1.50 percent. The requirements to retire range from attaining the age of 46 to 60 with years of service ranging from 5 to 30 years, depending on when the employee became a member. Early retirement is computed in the same manner as a regular pension but is permanently reduced 0.50 percent for each full and partial month between the pension effective date and the date the member will attain age 60. There is no mandatory retirement age.

Depending on the member's date of hire, MPERS offers the option of participating in the defined contribution (DC) plan that provides a 50 percent employer match (up to 3 percent of salary) on employee contributions.

Members are eligible for nonduty disability benefits after 10 years of service and for duty-related disability benefits upon hire. Disability retirement benefits are determined in the same manner as retirement benefits but are payable immediately without an actuarial reduction. The disability benefits plus authorized outside earnings are limited to 100 percent of the participant's final average compensation, with an increase of 2 percent each year thereafter.

Benefits may transfer to a beneficiary upon death and are determined in the same manner as retirement benefits but with an actuarial reduction.

Benefit terms provide for annual cost of living adjustments to each employee's retirement allowance subsequent to the employee's retirement date. The annual adjustment, if applicable, is 3 percent. Some members who do not receive an annual increase are eligible to receive a supplemental payment in those years when investment earnings exceed actuarial assumptions.

MPERS provides medical, prescription drug, dental, and vision coverage for retirees and beneficiaries. A subsidized portion of the premium is paid by MPERS, with the balance deducted from the monthly pension of each retiree health care recipient. Depending on the member's date of hire, this subsidized portion ranges from 80 percent to the maximum allowed by the statute.

June 30, 2020

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Contributions

Public Act 300 of 1980, as amended, required the School District to contribute amounts necessary to finance the coverage of pension benefits of active and retired members. Contribution provisions are specified by state statute and may be amended only by action of the State Legislature. Under these provisions, each school district's contribution is expected to finance the costs of benefits earned by employees during the year, with an additional amount to finance a portion of the unfunded accrued liability.

Under the OPEB plan, retirees electing this coverage contribute an amount equivalent to the monthly cost for Part B Medicare and 10 percent, or 20 percent for those not Medicare eligible, of the monthly premium amount for the health, dental, and vision coverage at the time of receiving the benefits. The MPSERS board of trustees annually sets the employer contribution rate to fund the benefits. Participating employers are required to contribute at that rate.

Under Public Act 300 of 2012, members were given the choice between continuing the 3 percent contribution to the retiree health care and keeping the premium subsidy benefit described above, or choosing not to pay the 3 percent contribution and, instead, opting out of the subsidy benefit and becoming a participant in the Personal Healthcare Fund (PHF), a portable tax-deferred fund that can be used to pay health care expenses in retirement. Participants in the PHF are automatically enrolled in a 2 percent employee contribution into their 457 account as of their transition date, earning them a 2 percent employer match into a 401(k) account. Members who selected this option stopped paying the 3 percent contribution to the retiree health care as of the day before their transition date, and their prior contributions were deposited into their 401(k) account.

The School District's contributions are determined based on employee elections. There are multiple different pension and health care benefit options included in the plan available to employees based on date of hire and the elections available at that time. Contribution rates are adjusted annually by the ORS.

The range of rates is as follows:

	Pension	OPEB
February 1, 2018 - September 30, 2018	13.39% - 19.59%	7.57% - 7.93%
October 1, 2018 - September 30, 2019	13.39% - 19.59%	7.57% - 8.09%

Depending on the plan selected, member pension contributions range from 0 percent up to 7.0 percent of gross wages. For certain plan members, a 4 percent employer contribution to the defined contribution pension plan is required. In addition, for certain plan members, a 3 percent employer match is provided to the defined contribution pension plan.

The School District's required and actual pension contributions to the plan for the year ended June 30, 2020 were \$4,501,143, which include the School District's contributions required for those members with a defined contribution benefit. The School District's required and actual pension contributions include an allocation of \$1,786,765 in revenue received from the State of Michigan and remitted to the System to fund the MPSERS unfunded actuarial accrued liability (UAAL) stabilization rate for the year ended June 30, 2020.

The School District's required and actual OPEB contributions to the plan for the year ended June 30, 2020 were \$1,176,270, which include the School District's contributions required for those members with a defined contribution benefit.

June 30, 2020

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Net Pension Liability

At June 30, 2020, the School District reported a liability of \$54,659,322 for its proportionate share of the net pension liability. The net pension liability was measured as of September 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of September 30, 2018, which used update procedures to roll forward the estimated liability to September 30, 2019. The School District's proportion of the net pension liability was based on a projection of its long-term share of contributions to the pension plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2019 and 2018, the School District's proportion was 0.17 percent, representing a change of (4.32) percent.

Net OPEB Liability

At June 30, 2020, the School District reported a liability of \$11,655,702 for its proportionate share of the net OPEB liability. The net OPEB liability for fiscal year 2020 was measured as of September 30, 2019, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of September 30, 2018, which used update procedures to roll forward the estimated liability to September 30, 2019. The School District's proportion of the net OPEB liability was based on a projection of its long-term share of contributions to the OPEB plan relative to the projected contributions of all participating reporting units, actuarially determined. At September 30, 2019 and 2018, the School District's proportion was 0.16 and 0.17 percent, respectively, representing a change of (3.79) percent.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For 2020, the School District recognized pension expense of \$7,948,537 inclusive of payments to fund the MPSERS UAAL stabilization rate. At June 30, 2020, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 245,000	\$ (227,924)
Changes in assumptions	10,702,334	-
Net difference between projected and actual earnings on pension plan investments	-	(1,751,738)
Changes in proportion and differences between the School District's contributions and proportionate share of contributions	138,525	(2,671,345)
The School District's contributions to the plan subsequent to the measurement date	3,802,177	-
Total	<u>\$ 14,888,036</u>	<u>\$ (4,651,007)</u>

The \$1,786,765 reported as deferred inflows of resources resulting from the pension portion of state aid payments received pursuant to the UAAL payment will be recognized as state appropriations revenue for the year ending June 30, 2021. Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Years Ending	Amount
2021	\$ 2,706,582
2022	1,959,442
2023	1,241,568
2024	527,260
Total	<u>\$ 6,434,852</u>

June 30, 2020

Note 10 - Michigan Public School Employees' Retirement System (Continued)

In addition, the contributions subsequent to the measurement date will be included as a reduction of the net pension liability in the next year.

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended June 30, 2020, the School District recognized OPEB expense of \$28,048.

At June 30, 2020, the School District reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ -	\$ (4,276,807)
Changes in assumptions	2,525,555	-
Net difference between projected and actual earnings on OPEB plan investments	-	(202,698)
Changes in proportionate share or difference between amount contributed and proportionate share of contributions	2,726	(1,090,204)
Employer contributions to the plan subsequent to the measurement date	846,269	-
Total	<u>\$ 3,374,550</u>	<u>\$ (5,569,709)</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (note that employer contributions subsequent to the measurement date will reduce the net OPEB liability and, therefore, will not be included in future OPEB expense):

Years Ending	Amount
2021	\$ (812,707)
2022	(812,707)
2023	(712,040)
2024	(488,203)
2025	(215,771)
Total	<u>\$ (3,041,428)</u>

Actuarial Assumptions

The total pension liability and total OPEB liability as of September 30, 2019 are based on the results of an actuarial valuation as of September 30, 2018 and rolled forward. The total pension liability and OPEB liability were determined using the following actuarial assumptions:

Actuarial cost method		Entry age normal cost actuarial cost method
Investment rate of return - Pension	6.00% - 6.80%	Net of investment expenses based on the groups
Investment rate of return - OPEB	6.95%	Net of investment expenses based on the groups
Salary increases	2.75% - 11.55%	Including wage inflation of 2.75%
Health care cost trend rate - OPEB	7.50%	Year 1 graded to 3.5% year 12
Mortality basis		RP-2014 Male and Female Employee Annuitant Mortality tables, scaled 100% (retirees: 82% males and 78% for females) and adjusted for mortality improvements using projection scale MP-2017 from 2006
Cost of living pension adjustments	3.00%	Annual noncompounded for MIP members

June 30, 2020

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Assumption changes as a result of an experience study for the periods from 2012 to 2017 have been adopted by the System for use in the annual pension and OPEB valuations beginning with the September 30, 2014 valuation.

Significant assumption changes since the prior measurement date, September 2018, for pension and OPEB include a reduction in both discount rates, continued impact of the updated experience study that resulted in a lower than projected per person health benefit cost for OPEB, and favorable investment experience for both plans. There were no significant benefit terms changes for the pension or OPEB plans since the prior measurement date of September 30, 2018.

Discount Rate

The discount rate used to measure the total pension liability was 6.00 to 6.80 percent as of September 30, 2019 depending on the plan option. The discount rate used to measure the total OPEB liability was 6.95 percent as of September 30, 2019. The projection of cash flows used to determine the discount rate assumed that employee contributions will be made at the current contribution rate and that district contributions will be made at statutorily required rates.

Based on those assumptions, the pension plan's fiduciary net position and the OPEB plan's fiduciary net position were projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan and OPEB plan investments was applied to all periods of projected benefit payments to determine the total pension liability and total OPEB liability.

The long-term expected rate of return on pension plan and OPEB plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-term Expected Real Rate of Return
Domestic equity pools	28.00 %	5.50 %
Private equity pools	18.00	8.60
International equity pools	16.00	7.30
Fixed-income pools	10.50	1.20
Real estate and infrastructure pools	10.00	4.20
Absolute return pools	15.50	5.40
Short-term investment pools	2.00	0.80
Total	100.00 %	

Long-term rates of return are net of administrative expense and inflation of 2.3 percent.

June 30, 2020

Note 10 - Michigan Public School Employees' Retirement System (Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the School District, calculated using the discount rate depending on the plan option. The following also reflects what the School District's net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.00 - 5.80%)	Current Discount Rate (6.00 - 6.80%)	1 Percentage Point Increase (7.00 - 7.80%)
Net pension liability of the School District	\$ 71,060,615	\$ 54,659,322	\$ 41,062,085

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate

The following presents the net OPEB liability of the School District, calculated using the current discount rate. It also reflects what the School District's net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (5.95%)	Current Discount Rate (6.95%)	1 Percentage Point Increase (7.95%)
Net OPEB liability of the School District	\$ 14,297,470	\$ 11,655,702	\$ 9,437,351

Sensitivity of the Net OPEB Liability to Changes in the Health Care Cost Trend Rate

The following presents the net OPEB liability of the School District, calculated using the current health care cost trend rate. It also reflects what the School District's net OPEB liability would be if it were calculated using a health care cost trend rate that is 1 percentage point lower or 1 percentage point higher than the current rate:

	1 Percentage Point Decrease (6.50%)	Current Discount Rate (7.50%)	1 Percentage Point Increase (8.50%)
Net OPEB liability of the School District	\$ 9,343,302	\$ 11,655,702	\$ 14,297,157

Pension Plan and OPEB Plan Fiduciary Net Position

Detailed information about the plan's fiduciary net position is available in the separately issued MPSERS financial report.

Payable to the Pension Plan and OPEB Plan

At June 30, 2020, the School District reported a payable of \$667,283 and \$143,719 for the outstanding amount of contributions to the pension plan and OPEB plan, respectively, required for the year ended June 30, 2020.

Note 11 - Tax Abatements

The School District receives reduced property tax revenue as a result of industrial facilities tax exemptions (PA 198 of 1974) and brownfield redevelopment agreements granted by cities, villages, and townships within the boundaries of the School District. Industrial facility exemptions are intended to promote construction of new industrial facilities or to rehabilitate historical facilities; brownfield redevelopment agreements are intended to reimburse taxpayers that remediate environmental contamination on their properties.

June 30, 2020

Note 11 - Tax Abatements (Continued)

For the fiscal year ended June 30, 2020, the School District's property tax revenue was reduced by approximately \$92,000 under these programs.

The School District is reimbursed for lost revenue caused by tax abatements on the operating millage of nonhomestead properties from the State of Michigan under the School Aid formula. The School District received approximately \$56,000 in reimbursements from the State of Michigan. The School District is not reimbursed for lost revenue from debt service millages.

Note 12 - Subsequent Events

Following the passing of the Coronavirus Aid, Relief, and Economic Security (CARES) Act, which was signed into law on March 27, 2020 to combat the effects of the COVID-19 pandemic, the U.S. Department of Treasury distributed Coronavirus Relief Fund (CRF) payments to the State of Michigan. During July and August 2020, the School District received \$830,440 of these restricted CRF funds from the Michigan Department of Education. The CRF funds can be used only for eligible costs and are subject to certain Uniform Guidance and grant-specific reporting requirements.

Pension Information

Ultimately, 10 years of data will be presented in both of the pension-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

Benefit Changes

There were no changes of benefit terms for each of the reported plan years ended September 30.

Changes in Assumptions

There were no significant changes of assumptions for each of the reported plan years ended September 30, except for the following:

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.25 percentage points.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.45 percentage points. The valuation also includes the impact of an updated experience study for periods from 2012 to 2017.
- 2017 - The discount rate used in the September 30, 2016 actuarial valuation decreased by 0.50 percentage points.

OPEB Information

Ultimately, 10 years of data will be presented in both of the OPEB-related schedules. The number of years currently presented represents the number of years since the accounting standard requiring these schedules first became applicable.

Benefit Changes

There were no changes of benefit terms for each of the reported plan years ended September 30.

Changes in Assumptions

There were no significant changes of assumptions for each of the reported plan years ended September 30, except for the following:

- 2019 - The discount rate used in the September 30, 2018 actuarial valuation decreased by 0.20 percentage points. The valuation also includes the impact of an updated experience study for periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by an additional \$1.4 billion in 2019.
- 2018 - The discount rate used in the September 30, 2017 actuarial valuation decreased by 0.35 percentage points. The valuation also includes the impact of an updated experience study for periods from 2012 to 2017. This resulted in a lower than projected per person health benefit cost to reduce the plan's total OPEB liability by \$1.4 billion in 2018.
