

Eating Procedures 4/26/21

When students return to 5 day a week in-person learning, desks will be arranged 3 feet apart as directed by the new CDC guidelines. Per the framework: "6 feet of physical distancing is required for students while eating breakfast and lunch, as students will be unable to wear masks at that time."

Whenever possible, desks will be arranged during eating times in areas of the room or hallway (when fire codes allow) to keep students in their classrooms. Classrooms may choose to go outside for lunch and take advantage of the warm weather on many days.

Overflow areas (gym, cafeteria, conference room) have been designated for students that will not fit within the 6 foot distance guidelines. These areas will be supervised and students will return to their classrooms when masks can be put back on.
