**Charles E. Lawrence
Division Superintendent**

Dear NCPS Families,

This is a reminder that it is a state law requirement for your child or children to have their entrance physical (PreK and K only) and immunizations (shots) up to date prior to school enrollment to attend in the Fall.

This requirement must be met for school enrollment in Virginia regardless of how your child or children will be attending school in the fall. Students taking classes virtually or in-person must have this paperwork turned into their school.

Immunization (shot) requirements and Physical forms are listed on the division website under the department school health tab as well as attached to this letter.

Immunizations are needed for students in grades PreK, K, 7th and 12th grade. For 7th graders there is an optional HPV immunization available but not mandatory. Please see the educational informational letter included.

Please check with you child or children's doctor to make sure they are up to date and have a copy of their immunizations (shot record) and physical (PreK and K only) either dropped off to their school or sent directly to the school from the doctor by fax prior to starting school in the fall.
