

GO Riteway is committed to the health and safety of your children.

To this end, **GO Riteway** has implemented the following recommended Best Practices to help protect our passengers and professional drivers:

- Vehicles will be sanitized daily to include all interior surfaces through the use of spray equipment that dispenses COVID-19 bacteria killing disinfectant. This process will occur between morning and afternoon routes and at the end of each day.
- The driver will wipe down high touch surfaces (railings, seat backs) between route tiers.
- Hand sanitizer will be available on each bus near the entry door.
- No food or beverages will be allowed.
- Passengers will not be able to use the seat directly behind the driver.
- 8 ½" x 11" COVID safety precaution poster will be displayed in each bus.

Drivers are trained and furnished with information about COVID-19:

- How it spreads
- Exposure risks
- Proper hand sanitizing practices and other routine infection control precautions

Drivers are provided with:

- Hand sanitizer in all vehicles
- Disposable disinfectant wipes so that commonly touched surfaces can be wiped down

All drivers are required to wear face masks when passengers are on the bus

Employees are reporting body temperature prior to shift to ensure those who are experiencing signs or symptoms of COVID-19 remain at home and do not report for duty.
