Testing the feedback application.

Yes

Virtual for my 8th graders (Karlita and Alyssa was a great experience. They did everything just fine..

I thought it was okay. My child got got the hang of it pretty quick. I would go virtual again

I feel like virtual is a great choice for students who does not do well in a class room setting. Seems like my child has done very well at her own pace.

We are looking forward to another successful year of virtual learning. We are glad this opportunity is available for our family.

Yes, I will like the students to try Virtual learning again.
