ENERGY CONSERVATION

It is the responsibility of the Lake Forest Board of Education and the Lake Forest School District to ensure that every effort is made to conserve energy and natural resources while exercising sound financial management.

The Board directs the Superintendent or designee to maintain short and long-range strategies in the areas of energy management. The success of this policy is the joint responsibility of the Board, District Administration, staff and students.

To ensure the overall success of the energy management program, the following specific areas of emphasis will be adopted:

- The District will maintain accurate records of energy consumption and cost.
- All students and staff members will be expected to contribute to energy efficiency.
- The night custodians at each school will be responsible for a complete and total shutdown of the facility when closing each evening.
