

SCHOOL SAFETY PLANS AND TEAMS

() Required

(X) Local

(X) Notice

Emergencies and violent incidents in schools are critical issues that must be addressed in an expeditious and effective manner. The Board of Education recognizes its responsibility to adopt and keep current a comprehensive district wide school safety plan and building-level emergency response plan(s) which address violence prevention, crisis intervention, emergency response and management.

Taken together, the district-wide and building level plans provide a comprehensive approach to addressing school safety and violence prevention, and provide the structure where all individuals can fully understand their roles and responsibilities for promoting the safety of the entire school community. The plans will be designed to prevent or minimize the effects of serious violent incidents and emergencies, declared state disaster emergencies involving a communicable disease or local public health emergency declaration and other emergencies and to facilitate the district's coordination with local and county resources. The plans will also address risk reduction/prevention, response and recovery with respect to a variety of types of emergencies and violent incidents in district schools, and will address school closures and continuity of operations.

Comprehensive District-Wide School Safety Team and Plan

The Board will annually appoint a district-wide school safety team that includes, but is not be limited to, a representative from the following constituencies: the Board, teachers, administrators, and parent organizations, school safety personnel and other school personnel (including bus drivers and monitors). This team is responsible for the development and annual review of the comprehensive district-wide school safety plan. The plan will cover all district school buildings and will address violence prevention (taking into consideration a range of programs and approaches that are designed to create a positive school climate and culture), crisis intervention, emergency response and management including communication protocols, at the district level. It will include all those elements required by law and regulation, including protocols for responding to declared state disaster emergencies involving a communicable disease that are substantially consistent with the provisions of Labor Law §27-c.

The Superintendent of Schools or designee will be the district's chief emergency officer, and will coordinate communication between school staff and law enforcement and first responders. The

chief emergency officer will ensure that all staff understand the district-wide school safety plan and receive training on the building level emergency response plan, violence prevention and mental health, and will also ensure that district-wide and building-level plans are completed, reviewed annually, and updated as needed by the designated dates.

The chief emergency officer will ensure that the district-wide plan is coordinated with the building-level plans, and will ensure that required evacuation and lock-down drills are conducted.

Building-Level Emergency Response Plans and Teams

Each Building Principal is responsible for annually appointing a building-level emergency response team that includes representation from teachers, administrators, parent organizations, school safety personnel, other school personnel (including bus drivers and monitors), law enforcement officials, fire officials and other emergency response agencies. The emergency response team is responsible for the development and review of a building-level emergency response plan for each district building. The plan(s) will address response to emergency situations, such as those requiring evacuation, sheltering and lock-down at the building level and will include all components required by law and regulation, including measures necessary to comply with Labor Law § 27-c to respond to public health emergencies involving a communicable disease. These confidential plans will include evacuation routes, shelter sites, medical needs, transportation and emergency notification of parents and guardians

The Building Principal is responsible for conducting at least one test every school year of the emergency response procedures under this plan including procedures for sheltering and early dismissal.

To maintain security and in accordance with law, the building-level emergency response plan(s) are confidential and not subject to disclosure under the Freedom of Information Law or any other law.

.Building-level emergency response plans will include protocols in response to carbon monoxide alarms or detection. Alarm or detection of carbon monoxide will result in the appropriate actions as described by the emergency response plan.

Building-level emergency response plan will also include an emergency response team for incidents that includes appropriate school personnel, law enforcement officials, fire officials, and representatives from local, regional and/or state emergency response agencies to assist the school community in responding to a violent incident or emergency; and a post-incident response team that includes appropriate school personnel, medical personnel, mental health counselors and other related personnel to assist the community in coping with the aftermath of a serious violent incident or emergency.

During emergencies, staff are authorized to temporarily cover classroom door vision panels when it is likely to protect staff and students. For example, covering vision panels may prevent an

intruder from determining if a classroom is occupied, thereby discouraging attempts to gain access. During emergencies, staff are also authorized to temporarily block doors to slow the access of intruders. Building-level emergency response plans must address the temporary covering of door vision panels and the temporary blocking of doors during emergencies.

Threat Assessment Teams

1. The Building Administrator will notify the Emergency Coordinator and attempt to determine the nature of the alarm and the potential hazard involved through consultation with the appropriate County Emergency Services Director or the Local Volunteer Fire Departments and the State Police.
2. The Emergency Coordinator will follow the direction of the County Emergency Services Director and/or the Fire Chief.

Annual Review and Reporting

All plans will be annually reviewed and updated, if necessary, by the appropriate team by **May 15th**. In conducting the review, the teams will consider any changes in organization, local conditions and other factors including an evaluation of the results of the annual test of the emergency response procedures, which may necessitate updating of plans. If the plan requires no changes, then it will remain in effect. If the district-wide plan requires change, then the updated plan will be submitted to the Board of Education in time to allow 30-days of public comment and to hold a public hearing, which provides for the participation of school personnel, students and other interested parties prior to Board adoption. All plans must be adopted by the Board of Education by September 1.
