

New Quarantine Guidelines for Individuals Exposed to a Positive COVID-19 Person

Option 1: 14 day quarantine from last point of contact with positive person.

Option 2: 10 day quarantine from last point of contact with positive person.

- Individuals must be symptom free through the entire 14 day period (beginning with last point of contact with positive person).

Option 3: 7 day quarantine from last point of contact with positive person.

- Must be symptom free through the entire 14 day period (beginning with last point of contact with positive person).
- Must have a negative molecular (PCR) or a negative antigen (rapid) test taken no earlier than day 5 of last contact with a positive person to return.
- Daily symptom assessment may be completed by school nurse upon return through the 14 day period.
- Proof of negative test must be submitted (emailed) to building principal and school nurse prior to return.

90 Day Immunity: Individuals who have tested positive with a molecular (PCR) test or Antigen (rapid) test are not required to quarantine for 90 days beginning on the date of symptom onset, or testing date for an asymptomatic positive person. Proof of a positive molecular (PCR) or positive antigen test is required to qualify for immunity. An Antibodies test is **NOT** acceptable.

Note: Guidelines are based on new guidelines developed by the Center for Disease Control and Prevention and the Ohio Department of Health and are subject to change
