

Summer passport to digital fun

Free virtual summer camps with Microsoft Store

Our free virtual camps are back! This summer, Microsoft Store has a fun collection of creative workshops and field trips to help kids ages 8+ practice digital skills and explore new concepts. Topics include:

Coding

Acquire basic coding concepts through game-based learning using Minecraft and MakeCode.

Space Jam: A New Legacy

Discover how video games are made and learn to code your own in this workshop inspired by the new movie with LeBron James.

Travel

Explore the beauty, charm, and character of our world through the power of Bing.

Museums

Go on virtual tours through a variety of natural history and space exploration exhibits at the Smithsonian.

Diversity & Inclusion

Learn about Black history through virtual experiences at renowned museums and learning institutions.

Flipgrid

Interact with celebrated authors, designers, scientists, and more as part of our innovative Flipgrid Live Events.

Social Emotional Learning

Discuss the importance of creating connections, using themes of the award-winning musical "Dear Evan Hansen."

Our free interactive virtual camps are taught live, and all participants will have a chance to ask questions, get support from our Microsoft Store associates, and receive a digital passport to collect camp badges and record their experiences.

Register today for one of our upcoming camps:
