## TABLE OF CONTENTS

$\qquad$
II. Student Enrollment Projections and Analysis

- District-Wide Growth Projections
- Analysis for Various Grade-Level Organizational Plans..............................................
III. Program Analysis of Individual Elementary Schools
- Arnold Elementary .
- Blythe-Bower Elementary 32
- Candy's Creek Cherokee Elementary40

- Ross Elementary - 58
- Stuart Elementary
IV. New Intermediate School (5th~6th)
- Program Meeting Notes.
- Program Space Requirement Analysis ...................................... 76
V. Cleveland Middle School (7th~8th)
- Program Meeting Notes
- Floor Plan Utilization Diagrams
VI. Cleveland High School (9th~12th) Additions \& Renovations
- Program Meeting Notes
- Floor Plan "Block Scheduling" Diagrams
- Program Space Requirement Analysis 98
- Space Relationship Diagrams.

## I. EXECUTIVE SUMMARY

## Executive Summary

## INTRODUCTION

he purpose of the following Educational Facilities Masterplan Document is to identify and communicate the educationa and physical needs of the Cleveland City School District to the community it serves.

The recommendations of the Master Plan can serve as a "guide" or "roadmap" for the incremental funding and mplementation of a comprehensive Capital Improvements Plan over the next 15-20 years.

In January 2021, a planning process began to explore current and future educational program needs for each grade leve and to determine the ability of each school building to accommodate program requirements. This study is intended to expand and compliment the Comprehensive 5 -Year Capital Improvement Plan developed by the school district in Octobe 2020, not to replace it.

Based on the school district's historical data from 2009/10 until 2021/22, the student enrollment grew from 4,764 to 5,539 tudents. Community Tectonics' analysis and projections indicate the total student enrollment may continue growing to 6,637 students by the school year 2035/36. This growth would be about $1.3 \%$ per year. The system-wide grade leve projected student enrollment allocation by grade levels would be as follows. $\mathrm{K}-5$ grades @ 2,940 students, $6 \mathrm{th}-8 \mathrm{th}$ grade @ 1,468 students; and 9th-12th grades @ 2,229 students. (Refer to District-wide Growth Projections, Section II.)

## PLANNING PROCESS

n the initial planning workshops with Dr. Dyer and the Administrative Staff, several options were explored to identify potential solutions that can address both current and future educational program needs. Four (4) Educational Organizational Plans were considered:

OPTION \#1: K-5th; 6th-8th; 9th-12th
This current plan would require additions and renovations at all schools; however, not all school sites have available area to build adequate additions.

OPTION \#2: K-5th ;6th; 7th-8th; 9th-12th
This plan addresses the middle school overcrowding issue but not the K-5th issue.
OPTION \#3: K-4th; 5th-6th; 7th-8th; 9th-12th
This plan appears to achieve the desired results in the most effective way. A new intermediate facility would immediately address the critical overcrowding at the middle school and all K-5 elementary schools.

OPTION \#4: 9th Grade Academy
This suggestion could be a viable part of any of the other three options. It was noted as being worthy of consideration in planning future additions and renovations at Cleveland High School.

The Administrative Group agreed Option \#3 was the preferred grade-level organization plan, and that it should be furthe evaluated to determine: its ability to adequately respond to the impacts of student enrollment projections and classroom capacity analysis for each school, critical path scheduling for implementation, relative order of magnitude in potentia construction cost, and the priorities of a capital improvements plan.

Further analysis and development of District-Wide Growth Projections along with Student Enrollment Projections for various grade levels (Section 2) encouraged the planning team to recommend a 600 Student Grade-Level Planning Model for a total maximum capacity of 7,800 students.

- Elementary Schools (K-4 or 5 grades @ 600 Students $=3,000$ Students)
- Intermediate School (2 grades @ 600 Students = 1,200 Students)
- Middle School ( 2 grades @ 600 Students $=1,200$ Students)
- High School (4 grades @ 600 Students = 2,400 Students)

Interviews with principals were conducted to establish the current needs of each school and to determine the classroom requirements for both K-5 and K-4 facilities to determine both Classroom Capacity and Optimal Planning Capacity. Thi grade level organization and planning model was reviewed with school principals/staff, and school board members to gain feedback. Agreement was unanimous in all our interviews and workshops that Option \#3 is the preferred organization plan for the district.

## K-5 VS. K-4 ELEMENTARY SCHOOLS

According to individual school enrollment projections (Section III), all seven of the K-5 schools may exceed optimum planned capacity by the years 2025 and 2030. District-wide student projections in the year 2025/26 indicate the total student enrollment of 2,719 will exceed the optimal planned capacity of 2,556 students.

A six-classroom expansion at Candy's Creek Cherokee Elementary is possible but it's questionable to consider expansion at any of the other schools due to limited site area

K-4 elementary schools will gain a total of 20 classrooms once 5 th grade is removed. Individual school projections indicate only one school, Yates Primary, will exceed the school's calculated classroom capacity prior to 2035. The district-wide student projections indicate total classroom capacity of the seven schools $(2,489)$ is not expected to be exceeded prior to the year 2035

It is important to recognize that student enrollment and projections for individual schools should be monitored on a yearly basis to determine the potential impact of many other community variables such as: annexations, migration, housing starts, birth rates etc. Recently, there has been a trend at some schools for a status quo or decline in student enrollmen even though the district-wide student enrollment has shown a steady growth in the past 10 years.

Refer to Program Analysis of Individual Schools, Section III for more detail.

| ELEMENTARY SCHOOLS K-5 | Total \# of Classrooms Utilized for Support | Total \# of Academic Classrooms | $\begin{aligned} & \text { Classıom } \\ & \text { Capacity } \end{aligned}$ | $\begin{gathered} \text { Optimal } \\ \text { Planned } \\ \text { Capacity @ } \\ 90 \% \% \end{gathered}$ 90\% | $\begin{gathered} 2021 / 2022 \\ \text { K.5h } \\ \text { Student } \\ \text { Enroliment } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| ARNOLD ELEMENTARY | 13 | 14 | 300 | 270 | 248 |
| BLYTHE-BOWER ELEMENTARY | 3 | 34 | 730 | 657 | 623 |
| CANDY'S CREEK CHEROKEE ELEMENTARY | 11 | 24 | 520 | 468 | 452 |

| 2030 District-Wide Projections for $\mathrm{K}-4$ Student Enrollment |  |  |  |  |  |
| 2035 District-Wide Projections for K -4 Student Enrollment |  |  |  |  |  |
| K-4 NOTES: |  |  |  |  |  |
| 1. K-4 gains 20 classrooms w/o 5th grade. <br> 2. Potential expansion @ Candy's Creek Cherokee (6 Classrooms @ 20 Students) increases K-4 total by 120 students. <br> 3. Not all support areas are regular size classrooms. |  |  |  |  |  |

## CLEVELAND MIDDLE - 3 GRADES VS. 2 GRADES

The current student enrollment $(1,302)$ at the middle school already exceeds optimal planned capacity of 1,080 students and the classroom capacity of 1,200 . Even if 7 th and 8 th grades could increase their classroom capacity to 30 students, the ptimal planned capacity of 1,224 would still be exceeded. Unfortunately, the middle school cannot easily be expanded to accommodate the planning model of 500-600 students per grade level due to limited site area. It is also questionable as whether the size of the middle school ( 1,500 to 1,800 students) is educationally and socially desirable for this age group.

A middle school with two grade levels (7th \& 8th) would have a classroom capacity of 1,200 to 1,440 students depending n whether it is calculated at 25 or 30 students per classroom. With a current student enrollment of 875 this facility could easily accommodate future growth based on a planning model of 500-600 students per grade level.

A new intermediate school (5th~6th) should be designed to accommodate 48 classrooms with a classroom capacity of 1200 students. Based on projected enrollment of 1058 students in 2030, the planning model of 500-600 students per grade-level will serve the community for many years to come. Refer to intermediate school space requirement analysis in section IV.

| CLEVELAND MIDDLE SCHOOL$6-8$ | $\begin{aligned} & \text { Total \# of } \\ & \text { Teaching } \\ & \text { Stations } \end{aligned}$ | Total \# of Classrooms Utilized for Support Functions | Total \# of <br> Academic <br> Classroms <br> (25/Class) | $\begin{aligned} & \text { Classrom } \\ & \text { Capacity } \end{aligned}$ | $\begin{gathered} \text { Optimal } \\ \text { Planned } \\ \text { Capacity @ } \\ 90 \% \end{gathered}$ | $\begin{gathered} \text { 2021/2022 } \\ 6 \text { th-8th } \\ \text { Student } \\ \text { Enrollment } \end{gathered}$ | Projections UtilizingDistrict GrowthRatio (1.013) |  |  |

|  |  |  | (30/class) | 1440 | 1296 |  |  |  |  |

[^0]
## CLEVELAND HIGH (9TH~12TH)

Based on interviews and workshops with high school principals and teachers, it appears the existing high school can accommodate the current enrollment of 1,788 students but not without some concerns. It was noted that many of the existing "classroom" spaces are not sized adequately to accommodate the programs utilizing the spaces; the West Win of the high school has a variety of building deficiencies that impede the desired educational program and might best be addressed by demolition and new additions. (Refer to Section VI, Block Scheduling Diagrams)

More quality spaces were suggested for expanded CTE programs, "Core" Classrooms (math, science, English, social studies, world languages), Theater, Performance, Band, Choral, Art, as well as special student services areas (Refer to Section VI, Program Analysis for Cleveland High School).

Considering the projected student growth in the school district, it may not be long before the high school enrollment exceeds the calculated classroom capacity of 1,865 students. Therefore, a classroom capacity of 2,400 students and an optimal planned capacity of 2,040 should become a priority in a Capital Improvements Plan.

| CLEVELAND HIGH SCHOOL | Total \# of Teaching Stations |  | Total \# of Core Academic Classrooms | $\begin{aligned} & \text { Classrom } \\ & \text { Capacity } \end{aligned}$ | OptimalPlannedCapacity @ 85\% | $\begin{gathered} \text { 2021/2022 } \\ \text { 9hthelth } \\ \text { Student } \\ \text { Enrollment } \end{gathered}$ | Projections UtilizingDistrict GrowthRatio (1.013) |  |  |

## Executive Summary Option \#3 and Existing Comparison

| INTERMEDIATE SCHOOL | Total \# of Planned Teaching Stations | Total \# of Classrooms Utilized for Support Functions | $\begin{array}{\|c} \hline \text { Total \# of } \\ \text { Academic } \\ \text { Classrooms } \\ \text { (25/Class) } \end{array}$ | $\begin{aligned} & \text { Classrom } \\ & \text { Capacity } \end{aligned}$ | $\begin{gathered} \text { Optimal } \\ \text { Planned } \\ \text { Capacity } \\ \text { OO\% } \end{gathered}$ | $\begin{array}{\|c\|c\|} \hline 2021 / 2022 \\ \text { 5th-6th } \\ \text { Student } \\ \text { Enroliment } \end{array}$ | Projections Utilizing District GrowthRatio (1.013) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 5-6 |  |  |  |  |  |  | 2025 | 2030 | 2035 |
|  | 74 | 26 | 48 | 1200 | 1080 | 812 | 866 | 1058 | 959 |
| FutureExpansion |  |  |  | 1400 | 1260 |  |  |  |  |

STH $\quad$ TH NOTES:

1. Classroom capacity and optimal planned capacity of a new intermediate school should not be a concern anytime prior to 2035
2. Classroom capacity and optimal planned capacity of n new intermediate school should not be a concern anytime prior to 2035 .
3. Intermediate school should be designed for expansion of 2 teams with 4 classrooms each; this would increase classroom capacity to 1400 students.

Middle School (7th~8th) Facility and Enrollment Analysis

| MIDDLE SCHOOL7-8 | Total \# of <br> Planned <br> Teaching <br> Stations | Total \# of <br> Classrooms Utilized for Support Functions | Total \# of <br> Academic <br> Classrooms <br> (25/Class) | Classrom Capacity | $\begin{aligned} & \text { Optimal } \\ & \text { Planned } \\ & \text { Capacity @ } \end{aligned}$$\begin{aligned} & \text { Capactiy } \\ & 90 \% \end{aligned}$ | $\begin{array}{\|c\|} \hline \text { 2021/2022 } \\ 7 \text { the8th } \\ \text { Student } \\ \text { Enrollment } \end{array}$ | Projections UtilizingDistrict GrowthRatio Ratio (1.013) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | 2025 | 2030 | 2035 |
|  | 74 | 26 | 48 | 1200 | 1080 | 875 | 886 | 950 | 1006 |
|  |  |  | (30/Class) | 1440 | 1296 |  |  |  |  |

7TH~8TH NOTES:

1. Existing BEP classroom capacity can be increased by 240 students if 7 th \& 8 th grade assume 30 students per classroom.

Cleveland High School (9th~12th with New CTE Wing) Facility and Enrollment Analysis

| CLEVELAND HIGH SCHOOL9-12 | $\begin{aligned} & \text { Total \# of } \\ & \text { Planned } \\ & \text { Teaching } \\ & \text { Stations } \end{aligned}$ | Total \# of Classrooms Utilized for Support Functions | Total \# of Core Academic Classroom | Classrom Capacity | $\begin{aligned} & \text { Optimal } \\ & \begin{array}{c} \text { Planned } \\ \text { Capacity@ } \end{array} \end{aligned}$$\begin{gathered} \text { Capactiy } \\ 855 \end{gathered}$ | $\begin{array}{\|c} \hline \text { 2021/2022 } \\ \text { Shht-12th } \\ \text { Student } \\ \text { Enrolliment } \end{array}$ | Projections Utilizing District Growth Ratio (1.013) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | 2025 | 2030 | 2035 |
|  | 133 |  | 60 | 2400 | 2040 | 1788 | 1776 | 1852 | 2229 |

$\frac{\text { 9TH } \sim 12 \text { TH NOTES: }}{\text { 1. Total teaching }}$ $\qquad$

1. Total teaching stations includes expanded CTE programmed spaces (29 @ 600 Students).

Various participants in the planning process agree that the Educational Facilities Master Plan should contain the following priority components:

## I. NEW INTERMEDIATE SCHOOL

A. Recommended Program Space Requirements:

- Net Area: 114,820 sf.
- Gross Area:176,646 sf
B. Recommended Project Budget: \$79,000,000
- Statement of Probable Construction Cost: $\$ 61,850,000$
- Contingency \& "Soft Costs": $\$ 8,150,000$
- Additional Land Cost: TBD (Recommended Acres Totaling 30~35)
C. Recommended Schedule:
- Occupy by the year 2030
- Design \& Construction ( 3.5 years)
D. Classroom capacity of a 7th~8th grade facility will have a classroom capacity of 1200 students @ 25 students/class or 1440 students @ 30 students/class. Student enrollment in the 7th~8th grade middle school is not expected to reach 1200 students anytime in the near future.

## I. ELEMENTARY SCHOOLS (Convert K-5 schools to K-4 schools)

A. According to the K-5 facility and enrollment analysis (section II), all seven (7) K-5 schools may experience overcrowdin between years 2025 and 2030 .
B. The district-wide K - 5 student projection indicates the total classroom capacity, and the total optimal planned capacity ( 2840 students \& 2556 students respectively) may be exceeded by the year 2025 ( 2719 students).
C. Aside from Ross \& Yates Elementary schools, with the K-4th grade organization plan (section 3) these schools can accommodate anticipated student growth to beyond 2035.
D. Since many unknown variables such as: annexations, migration, housing starts, birth rates, etc. can impact student growth, a new school or redistricting may be required in the future
E. Candy's Creek Cherokee is the one elementary school which can easily accommodate a six (6) classroom addition, an increase of 120-130 students.

## III. CLEVELAND MIDDLE SCHOOL (Convert 6th-8th to 7th- 8th)

Current Enrollment: 1302 Students
BEP Classroom Capacity: 1360 Students
Optimal Planned Capacity: 1224 Students
A. Current middle school student enrollment exceeds both classroom capacity and optimal planned capacity of the school.
B. HVAC replacement, minor updates, and maintenance issues will remain a need over the next $5 \sim 10$ years

## IV. CLEVELAND HIGH PHASE ONE: New East Wing, CTE Addition - 32,300 S

This addition would relocate the current West Wing CTE spaces and allow for space improvements to some othe CTE programs. Additional property would be necessary to accommodate the full desired $57,800 \mathrm{sf}$. CTE program requirements in the East Wing.
A. Recommended Program Space Requirements

- Net Area: 21,000 sf.
- Gross Area: 32,300 sf
B. Recommended Project Budget: $\$ 12,700,000$
- Statement of Probable Construction Cost: $\$ 11,305,000$
- Contingency \& "Soft Costs": $\$ 1,400,000$
C. Recommended Schedule:
- Occupy: TBD
- Design \& Construction (2.5 years)
D. Site Planning Concept

Note: Total space requirements for CTE program is 57,800 sf. (refer to Section VI). If adequate funding became available, it would be cost effective to construct the total CTE program requirements at the same time.

## V. CLEVELAND HIGH PHASE TWO: West Wing Performing Arts Addition - 36,500 SF

This addition would facilitate desired improvements to the Fine Arts and Performance Arts programs.

- Net Area: TBD sf.
- Gross Area: TBD sf
- Statement of Probable Construction Cost: TBD
- Statement of Probable Project Cost: TBD

## VI. CLEVELAND HIGH PHASE THREE: West Wing Addition - 28,000~40,000 SF

This addition would replace the existing academic spaces in the current West Wing. It would also for core classroom growth, additional CTE programs, and spaces for special student services.

- Actual size TBD based on future growth.

## VII. ALL SCHOOL DISTRICT FACILITIES:

- HVAC Updates, Repairs, and Maintenance Items as noted in the Comprehensive 5-year Capital Improvements Plan dated October 2020.

[^1]II. Student Enrollment Projections and Analysis

## Annual District Growth Projection 1.013\%

| School Year | $\mathbf{K}$ | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ | $\mathbf{1 0}$ | $\mathbf{1 1}$ | $\mathbf{1 2}$ | District |

III. PROGRAM ANALYSIS OF INDIVIDUAL ELEMENTARY SCHOOLS

## ARNOLD <br> ELEMENTARY <br> SCHOOL

May 3, 2021
PARTICIPANTS MEETING NOTES
Michael Chai 1. Current School Population $-259 \mathrm{w} / 20$ virtual included
Hal Taylor 2. There are 15 existing classrooms.
Don Shell 3. There are currently 2 classrooms per grade level (except second grade which has 3 ),
Brian Templeton 4. Current zoned capacity -250
5. Pulling the 5th grade out of the school would potentially open up 2 classrooms.
5. Pulling the 5th grade out of the school would
6 . $40 \%$ of the student population is transient.
6. $40 \%$ of the student population is tr
7. The school zone is fully developed.
7. The school zone is fully developed
8. Prior to rezoning the school had ballooned to 350-380 with 3 teachers per grade.
9. Rezoning allowed space for:

- Art
- Counseling Classroom
- Professional development Flex Room
- Small instruction for RTI/ERC
- 2 full time ELS Rooms

10. Average class size is 700 square feet
11. The Art Teacher is not full time, so the Art room is used as a flex space.
12. There is currently 1 PK Classroom.
13. Mr. Chai was not opposed to the $5 / 6$ grade school concept. He believes that $5 / 6$ grades have closer similarities than 6/7.

MAINTENANCE ITEMS

- Heat exchangers are being changed out over the next 5 years (a spare classroom is needed to relocate students temporarily).
- Treatment of Restroom walls
- Flooring in Halls and Cafeteria

## BLYTHE-BOWER

ELEMENTARY

## SCHOOL

April 28, 2021
PARTICIPANTS MEETING NOTES
Prisavia Croft 1. Current School Population $-625 \mathrm{w} / 780$ projected by 2030-2035
Hal Taylor 2. There are 34 existing classrooms. 31 general $/ 1$ village $/ 2$ PK
$\begin{array}{lll}\text { Hal Taylor } & \text { 2. There are } 34 \text { existing classrooms. } 31 \text { general/ levag } \\ \text { Don Shell } & \text { 3. There are currently } 5 / 6 \text { classrooms per grade level. }\end{array}$
Brian Templeton 4. 5 year growth forecast is 690 as a K5
5. Pulling the 5 th grade out of the school would potentially open up 4 classrooms.

Current space needs

- cafeteria seating space
- Serving starts at 10:30 and ends at 1:30
- Lunch periods are staggered and last 30 minutes.
- There are currently two ERC classrooms and one more is needed
- There is currently one ELS classroom and one more is needed.
- A sensory room is desired.
- More gym space for PE would be helpful.

7. Ms. Croft was not opposed to the $5 / 6$ grade school concept. She has had previous experience at CMS and felt that parents would expect team sports and band to be available.
8. Ms. Croft said the exterior courtyard space was being utilized

## MAINTENANCE ITEMS

- Flooring replacement throughout the school will take place during the Summer.
- HVAC units need to be replaced throughout

## MAYFIELD

## ELEMENTARY

## SCHOOL

May 3, 2021
PARTICIPANTS MEETING NOTES
Randall Stephens 1. Current School Population - 365
Hal Taylor 2. There are 21 existing classrooms.
Don Shell 3. There are currently 3 classrooms per grade level
Brian Templeton 4. Current zoned capacity -420
5. Pulling the 5th grade out of the school would potentially open up 3 classrooms.
5. Pulling the 5 th grade out of the school would potentially op
6. Prior to rezoning the school population had grown to 500 .
7. Rezoning allowed space for:

- Special areas such as art, music, etc.
- One extra classroom

8. Mr. Stephens was not opposed to the $5 / 6$ grade school concept. He mentioned that busing complexity could be challenging. He also felt that athletics would need to be a part of a 5/6 grade school.
9. A K-4 grade structure at Mayfield:

- 4 classrooms per grade level -80 students
- The 3 existing 5 th grade classrooms would be open on the upper level.
- Intervention class space could move upstairs closer to students.
- Currently there are 57 students in 5 th grade

MAINTENANCE ITEMS

- Monitoring potential geothermal loop loss. Future losses could require the addition of a boiler.

## YATES <br> PRIMARY <br> SCHOOL

May 6, 2021
PARTICIPANTS MEETING NOTES
Stephanie Stone 1. Current School Populations - Ross 240 \& Yates 240
Zachery Riggins 2. Yates serves K-2 and Ross serves PK \& 3-5
Hal Taylor 3. There are 13 existing classrooms at Ross and 15 existing classrooms at Yates.
Don Shell 4. There are currently 3 classrooms per grade level expect 1st which has 4 .
Brian Templeton 5. Yates is full and Ross has space. The buildings are not currently proportional.
5. Yates is full and Ross has space. The buildin
6. There are currently 805 th graders at Ross.
7. Ms. Stone \& Mr. Riggins were not opposed to the $5 / 6$ grade school concept but they did offer some pro's and con's.

- The con was Ross/Yates students would have 4 school transitions (all others would have 3)
- Pro's would be more space in all the schools and homogeneous ages at $4 / 5$ would offer lots of educational opportunities.

8. The Ross/Yates students and faculty do not have access to an auditorium like other schools. Ms. Stone would like to have a space to gather the entire staff together (100 occupants).
9. The Yates office area lacks space. SRO doesn't have close proximity and view of the entrance.
10. Yates needs more dining space in the Cafeteria. Ms. Stone suggested opening up the current music room like what was done at Ross.

## ROSS <br> ELEMENTARY <br> SCHOOL

May 6, 2021
PARTICIPANTS MEETING NOTES
Stephanie Stone 1. Current School Populations - Ross 240 \& Yates 240
Zachery Riggins 2. Yates serves K-2 and Ross serves PK \& 3-5
Hal Taylor 3. There are 13 existing classrooms at Ross and 15 existing classrooms at Yates.
Don Shell 4. There are currently 3 classrooms per grade level expect 1 st which has 4 .
Brian Templeton 5. Yates is full and Ross has space. The buildings are not currently proportional,
5. Yates is full and Ross has space. The buildin
6. There are currently 80 5th graders at Ross.
7. Ms. Stone \& Mr. Riggins were not opposed to the $5 / 6$ grade school concept but they did offer some pro's and con's.

- The con was Ross/Yates students would have 4 school transitions (all others would have 3)
- Pro's would be more space in all the schools and homogeneous ages at $4 / 5$ would offer lots of educational opportunities.

8. The Ross/Yates students and faculty do not have access to an auditorium like other schools. Ms. Stone would like to have a space to gather the entire staff together (100 occupants).
9. The Yates office area lacks space. SRO doesn't have close proximity and view of the entrance
10. Yates needs more dining space in the Cafeteria. Ms. Stone suggested opening up the current music room like what was done at Ross.

## STUART

## ELEMENTARY

## SCHOOL

May 3, 2021
PARTICIPANTS Richelle Shelton

Hal Taylor
Hal Taylor 2. There are 26 existing classroom sized spaces in the building. 12 are used as general $k$ - 5 Don Shell

1. Current School Population - 252 classrooms and 4 are used for special ed. There is currently one open classroom. The remaining are used for special areas.
2. There are currently 2 classrooms per grade level.
3. Stuart has 2 classrooms used for district-wide pre-k and 1 classroom used for district-wide CDC
4. The current neighborhoods zoned for Stuart were older homes with a predominately older population. The Hispanic population within the school continues to rise. It has grown from $13 \%$ to $30 \%$ in 13 years.
5. Rezoning pulled most of the affluent families from Stuart to Candy's Creek.
6. Pulling the 5th grade out of the school would potentially open up 2 classrooms.
7. Ms. Shelton was not opposed to the $5 / 6$ grade school concept. She believes the 5 th and 6 th grades pair well academically. She suggested 5th grade CDC students stay at the K-4 level.
8. Stuart is the most central K-5 school in the district
9. There is adjacent property to the school, but its development is restricted by the Army Corps of Engineers.

## MAINTENANCE ITEMS

Restroom upgrades - possible conversion to an observable group sink arrangement to deal with behavioral issues.

## NOTES

[^3]
## If we want to have a successful Intermediate School, our Facility must...

## GROUP RESPONSES

- Plan for technology
- Have flexible spaces
- Have related arts spaces
- Have spacious classrooms
- Have space for SPED \& CDC
- Have cohesive flow with spatial and functional relationships
- Have collaborative workspace for Staff - Workrooms
- Be safe and secure
- Have expandability with flexibility
- Have a "central site" location to the other schools

How can we establish a sense of Community in this New School?

## GROUP RESPONSES

- Name / Branding - "Intermediate"
- Include school-based student activities
- Connection to Community and other Schools

PROS for the 5/6 Grade School Concept
GROUP RESPONSES

- Instructional Alignment
- Eases the transition to Middle School
- Supports Parents
- Extra support for students, day-in to day-out
- Expand 5th Grade services and opportunities
- Extra support for both 5th and 6th Grade
- Helps with the transition to 7th-12th grades with soft skills
- Would help 5th Graders prepare for advanced academics (related arts)
- Smaller population at CMS and the Elementary Schools
- Better Traffic Flow
- Increase instructional time
- New options - expanded curriculum
- Logical way to help with overcrowding at CMS
- Master Scheduling
- Teacher Certification
- STEM School *Language
- New Facility upgrades

## CONS FOR THE 5 $5^{\text {TH }} / 6^{\text {TH }}$ GRADE SCHOOL CONCEPT

## GROUP RESPONSES

- Start/End times
- Transportation
- Personnel - How to determine? How to fund?
- Students at multiple schools - hybrid families
- Resources - New/Old "furniture"
- Zoning \& Tuition - possible future growth
- Money
- Rezone - small schools
- Involvement- extracurricular activities - "If we lose what we have"
- Adaptability of building for a different grade structure
- Coordination of Services
- More school transitions
- Possibility... Location
- 6th Grade Buy-In (students)
- Traffic consideration
- Re-structuring issues @ CMS or Elementary
- Perception of inequality within system? (Teacher issues)

## GROUP COMMENTS MADE DURING DISCUSSIONS

- There are currently 6th grade basketball teams, a baseball and a boys soccer team
- 65 Students on the CMS Wrestling Team $-1 / 3$ are 6th Graders
- 6th Graders don't play football at CMS
- 5th Grade sports are through community / recreation leagues
- The new exterior space for a practice soccer field and PE
- Stem Labs would be needed - not typical Science Labs
- The $5 / 6$ Grade School needs Choir and Band
- Steam Labs are needed - like the Art Room at CMS
- Much debate on number of man teams - settled on 2 man teams of ELA/MATH ( 90 min .)
- One Steam Lab is needed for every 2 teams for project-based learning (CKLA)
- Desire improved counseling of 6th graders - currently at CMS there is not time
- 1 Sensory room in needed per Grade Level
- 1 ERC is need per Grade Level w/ changing and restrooms????
V. CLEVELAND MIDDLE SCHOOL (7th~8th)

## CLEVELAND

## mout

SCHOOL

PARTICIPANTS
Dr. Leneda Liang
Hal Taylor
Don Shell
Brian Templeton
Aaron Grohol

## MEETING NOTES

1. Current School Population $-1,370$ (has fluctuated just below 1,400 )
2. There are 20 classrooms in each of the 3 wings.

Dr. Laing was open to the $5 / 6$ grade school concept and indicated it could work well academically. The potential hurdle would be how to handle sports and related arts

- The sixth grade currently participates in middle school basketball, cross country and track. - The sixth grade generally does not participate in middle school football.

4. Pulling the 6th grade out of CMS would allow for the projected growth of 1,200 students over the next $5 / 10 / 15$ years. Ideal configuration would be 16 general academic classrooms of 25 students and 4 flex classrooms per wing.
5. Current School demographics: $25 \%$ of population is currently Hispanic and $12-15 \%$ is currently African American. Dr. Laing expects those numbers to continue to grow.
6. Currently CDC utilizes 2 classrooms. They have a larger restroom space with washer and dryer There are 4 ERC classes of $8 / 10$ students. The drop off for CDC could stand to be improved.
CMS is 1 to 1 , so the computer lab is used as a classroom.
7. Currently, 3 related arts teachers do not have classrooms (nutrition, health \& sports history and physical ed.)
. Planning periods are common among grade levels
8. Currently there is a lack of space for PE classes and team sports practices. Additional gym space is desired. CMS offers many diverse PE and extra-curricular options to students.

- 35 students in each P.E. class
- 4 classrooms in gym @ one time
- Theater space used for gym on bad weather days.
- Weight Training program needs gym space.
- Wresting team - Girls and Boys on same team but might change.
- Dance uses theater space
- Volleyball, Basketball, Cheerleading, Dance, Soccer, Track, Cross County, Tennis, Wrestling, Band, Color Guard etc. compete for Gym space

11. There are currently 3 ESL teachers providing pull out instruction in small groups for 90 minute periods. Dividers are used to separate the groups.
12. There is currently no space for life skills instruction.
13. The cafeteria currently seats 400 students per lunch period. They need more dining space. It appears that an addition to accommodate more seating would be possible.
14. Dr. Laing mentioned that a new stem classroom is in the works to be provided through ESSER funding but there was limited space available.
15. Music Wing (2 teachers) Currently not using all rooms for music.
16. Small groups / individual groups currently meet in teacher lounge and workroom spaces.

## ACADEMIC TEAMS

6TH GRADE
3-Man Teams (6)
2-Man Teams (1)

TH GRADE
4-Man Teams (4)
8TH GRADE
Language Arts (4)
Science (4)
Math (4)
English (4)

## MAINTENANCE ITEMS

20 year-old mechanical units are scheduled to be replaced.

- Bathrooms need to be refurbished.
- Gym bleachers need to be replaced.

VI. CLEVELAND HIGH SCHOOL (9th~12th) ADDITIONS AND RENOVATIONS

## CLEVELAND

## HIGH

SCHOOL

PARTICIPANTS MEETING NOTES
Autumn O'Bryan 1. Current School Population - 1,700
Hal Taylor 2. Projected Student Population by 2035-2,323
Don Shell 3. The building is currently organized as the west wing serving the lower grades 9 \& 10 and the Brian Templeton Aaron Grohol east wing serving the upper grades $11 \& 12$
4. The building lacks gathering space. The Commons isn't used for large group gathering during the school day due to common traffic between the East and West wings. Gathering space for groups of 600-800 is needed. A space or multiple spaces this size could also be used for testing.
5. The school has outgrown the Little Theater with what is currently being done with drama and choir productions.
6. East to West circulation through the school is challenging. A secure connector from the Science Wing to the Arena would be beneficial.
7. Lunch period is currently divided into 2 period of 2 grades each. The indoor dining capacity is 600. Outdoor dining is helps when usable. Covered areas would be even more helpful.
8. ROTC needs 2,500 square feet. The Band Room is too small for them to use. They also need access to two classrooms and a secured storage space.
9. The current Media Center is too big for how it is being used now.
10. The main entrance into the school needs improvement. Covered area would be nice.
11. Centralized space near the Commons for Counseling, Bookstore, Snack Shop and Health Clinic would improve accessibility.
12. Need more Administrative Space.
13. There are currently 4 ESL and 4 SPED Classrooms. Each has 15-20 students. Need to be separated.
14. The current marching band size is 100
15. CTE - Health Sciences has the largest participation.
16. Culinary program would ideally be located near the Commons / Snack Shop.
17. Raider Blue Academy (RBA) is the alternative school and is located in the west wing.
18. All departments have 10 teachers.
19. CHS uses block scheduling. Teachers use their classrooms for planning. There are no designated common workrooms.

## MAINTENANCE ITEMS

- West Wing Sewer
- Geothermal field loop leaks could lead to issues with system's heating capacity
- Ongoing issues with RTU's
- No reinforcing in masonry walls in both the east and west wings
- Principal's Office carpet
