

Adding popplets to live binder

1. Complete Popplet
2. Click on Export -

The screenshot shows a web browser window displaying the Popplet application. The URL is <http://popplet.com/app/index.php#/776501>. The page title is "popplet: TEST POPPLET". The interface includes a navigation bar with "home", "view all", and "zoom" controls. A central workspace contains four popplets: "Engaging", "Technology", "Cutting Edge", and "Creating". A context menu is open over the "Technology" popplet, listing options such as "pop in", "new popple", "save", "edit", "organize", "add content", "view", "export", "labs", "popplet linker", and "print". The "export" option is expanded, showing "export as pdf" and "export as jpeg". A "share" panel on the right includes social media icons and an "add collaborator" button. At the bottom, there is a banner for "New Weight Loss Secret" by Dr. Oz.
