

ANNUAL IMMUNIZATION NOTICE

Kansas law requires that public school districts provide information regarding immunization requirements to families twice annually; one notice prior to May 15 and another in August. This notice is the first of these for 2023 and includes board of education policy as well as applicable Kansas regulations.

Student immunization records that have been submitted to the school may be accessed by parents through the Infinite Campus (IC) parent portal, under the "Health" link. Compliance or non-compliance with required immunizations is noted in this record. If you have any questions about your child's immunizations, please contact Tammi Krehbiel, school nurse, at (620) 327-7102. For questions regarding IC, contact the building secretary of your child's school.

HESSTON USD 460 POLICY JGCB – INOCULATIONS

Unless provided otherwise herein, all students enrolling in any district school shall provide the building principal with proof of immunization of certain diseases or furnish documents to satisfy statutory requirements. Booster shots mandated by the Secretary of the Department of Health and Environment are also required.

Notice of this policy and the applicable state law shall be distributed to parents or guardians of current and prospective district students on or before May 15th of each school year. The superintendent shall issue a news release each August explaining the required inoculations and booster shots. Parents may delegate in writing their authority to consent to immunizations.

At the beginning of a school year, school boards shall provide information on immunizations applicable to school age children to parents and guardians of students in grades six through 12. The information on immunizations shall include:

- (1) A list of sources for additional information; and
- (2) related standards issued by the national centers for disease control and prevention.

Students who fail to provide the documentation required by law may be excluded from school by the superintendent until statutory requirements are satisfied. Notice of exclusion shall be given to the parents/guardians as pre-scribed by law. Students who are not immunized against a particular disease(es) may be excluded from school during any outbreak.

The above requirements are not to serve as barriers to immediate enrollment of students designated as homeless or foster children as required by the Every Student Succeeds Act (ESSA) and the McKinney-Vento Act as amended by ESSA. The district shall work with the Department for Children and Families, the school last attended, or other relevant agencies to obtain necessary documentation of inoculations.

Each principal shall forward evidence of compliance with the inoculation law to other schools or school districts when requested by the school or by the student's parents/guardians and shall work cooperatively with local, county, and state health agencies to disseminate materials related to the availability of inoculations.

Kansas School Kindergarten Through Grade 12 Immunization Requirements for 2023-2024 School Year

Immunization requirements and recommendations for the 2023-2024 school year are based on the Advisory Committee on Immunization Practices (ACIP) and the Centers for Disease Control and Prevention (CDC) recommendations. The current recommended and minimum interval immunization schedules may be found on the [CDC webpage](#). The best disease prevention is achieved by adhering to the recommended schedule. However, if a child falls behind, the [catch-up schedule](#) is implemented. To avoid missed opportunities, immunization providers may use a [4-day grace period](#), in most instances, per age and interval between doses. In such cases, these doses may be counted as valid.

[K.S.A. 72 - 6261](#) - Kansas Statutes Related to School Immunizations Requirements and [K.A.R. 28-1-20](#), published July 18, 2019 in the [Kansas Register](#), defines the immunizations required for school and early childhood program attendance.

- **Diphtheria, Tetanus, Pertussis (DTaP/Tdap):** Five doses required. Doses should be given at 2 months, 4 months, 6 months, 15-18 months, and 4-6 years (prior to kindergarten entry). The 4th dose may be given as early as 12 months of age, if at least 6 months have elapsed since dose 3. The 5th dose is not necessary if the 4th dose was administered at age 4 years or older. A dose of **Tdap** is required at entry to 7th grade (11-12 years).
- **Hepatitis A (Hep A):** Two doses required. Doses should be given at 12 months with a minimum interval of 6 months between the 1st and 2nd dose.
- **Hepatitis B (Hep B):** Three doses required. Doses should be given at birth, 1-2 months, and 6-18 months. Minimum age for the final dose is 24 weeks.
- **Measles, Mumps, and Rubella (MMR):** Two doses required. Doses should be given at 12-15 months and 4-6 years (prior to kindergarten entry). Minimum age is 12 months and interval between doses may be as short as 28 days.
- **Meningococcal-Serogroup A,C,W,Y (MenACWY):** Two doses required. Doses should be given at entry to 7th grade (11-12 years) and 11th grade (16-18 years). For children 16-18 years, with no previous MenACWY, only one dose is required.
- **Poliomyelitis (IPV/tOPV):** Four doses required. Doses should be given at 2 months, 4 months, 6-18 months, and 4-6 years (prior to kindergarten entry). Three doses are acceptable if 3rd dose was given after 4 years of age and at least 6 months have elapsed since dose 2.
- **Varicella (Chickenpox):** Two doses are required. Doses should be given at 12-15 months and 4-6 years (prior to kindergarten entry). The 2nd dose may be administered as early as 3 months after the 1st dose, however, a dose administered after a 4-week interval is considered valid. No doses are required when student has history of varicella disease documented by a licensed physician.

Legal alternatives to school vaccination requirements are found in [K.S.A. 72-6262](#).

In addition, to the immunizations required for school entry the following vaccines are recommended to protect students:

- **Human Papillomavirus (HPV):** Two doses *recommended* at 11 years of age or three doses if the series is started after 15 years.
- **Influenza:** Annual vaccination *recommended* for all ages ≥ 6 months of age. Number of doses is dependent on age and number of doses given in previous years.

Vaccination efforts by school and public health officials, immunization providers and parents are key to the success of protecting our children and communities from vaccine preventable diseases.
