

School-Level Communicable Disease Management Plan

Template For School Year 2023-2024

School/District/Program Information

District or Education Service District Name and ID: Harrisburg School District No. 7

School or Program Name: Harrisburg High School

Contact Name and Title: Richard Fielder, Principal

Contact Phone: 541-995-6632

Contact Email: Richard.fielder@harrisburg.k12.or.us

Table 1.

Policies, protocols, procedures and plans already in place

Provide hyperlinks to any documents or other resources currently utilized in your school/district. Consider adding a brief description about how each is used within your school.

| Plan Types | Hyperlinks and Descriptions |
|--|---|
| School District Communicable Disease Management Plan OAR 581-022-2220 | https://core-docs.s3.amazonaws.com/documents/asset/uploaded_file/1490205/Comm_Dis_Mgmt_PlanHSD_3.pdf |
| Exclusion Measures Exclusion of students and staff who are diagnosed with certain communicable diseases. OAR 333-019-0010 | https://core-docs.s3.amazonaws.com/documents/asset/uploaded_file/1057540/Protocol_for_Isolation_Measures.pdf |
| Isolation Space Requires a prevention-oriented health services program including a dedicated space to isolate sick students and to provide services for students with special health care needs. OAR 581-022-2220 | <p>Anyone developing cough, fever, chills, shortness of breath, difficulty breathing, or sore throat while at school must be given a face covering to wear, isolated from others immediately; and sent home as soon as possible.</p> <ol style="list-style-type: none"> 1. Designated space to isolate student or staff members who develop COVID-19 symptoms. Isolate students and staff who report or develop symptoms, with staff supervision and symptom monitoring by a school nurse or other school-based health care provider, until they are able to go home. While waiting to go home, people displaying symptoms should wear a face covering, as should supervising staff. *If students are nauseous, struggling breathing, or in distress, they should not wear any face covering while waiting to go home. 2. Designated space for students to receive non-COVID-19 health services that is separate from COVID-19 isolation space. |

SECTION 1. Clarifying Roles and Responsibilities

Identifying roles central to communicable disease management. Clarifying responsibilities related to communicable disease response is a first step in keeping communities healthy and safe. In general, decisions of school health and safety reside with school and district officials. Together with local public health officials, school/district administrators should consult a variety of individuals when making decisions about health and safety in school.

Table 2. Roles and Responsibilities

| School planning team members | Responsibilities: | Primary Contact (Name/Title): | Alternative Contact: |
|--|--|---|----------------------|
| Building Lead / Administrator | <ul style="list-style-type: none">• Educates staff, families, and students on policies regarding visitors and volunteers, ensuring health and safety are being maintained.• In consultation with district leadership and LPHA staff, determines the level and type of response that is required/necessary.• Acts as key spokesperson to communicate health-related matters within school community members, health partners, and other local partners. | Richard Fielder, HS Principal | |
| School Safety Team Representative (<i>or staff member knowledgeable about risks within a school, emergency response, or operations planning</i>) | <ul style="list-style-type: none">• Trains staff at the start of the academic year and at periodic intervals on communicable disease management procedures.• Leads debrief of communicable disease event, informing continuous improvement of the planning, prevention, response, and recovery system. | Richard Fielder, HS Principal Stephanie Sather, Health teacher Suzan Jackson, Custodian | |

| School planning team members | Responsibilities: | Primary Contact (Name/Title): | Alternative Contact: |
|--|--|--|----------------------|
| Health Representative (<i>health aid, administrator, school/district nurse, ESD support</i>) | <ul style="list-style-type: none"> Supports building lead/administrator in determining the level and type of response that is necessary. Reports to the LPHA any cluster of illness among staff or students. Provides requested logs and information to the LPHA in a timely manner. | Rochelle Warren, District Nurse | |
| School Support Staff as needed (<i>transportation, food service, maintenance/custodial</i>) | <ul style="list-style-type: none"> Advises on prevention/response procedures that are required to maintain student services. | Amy Traw, Transportation Supervisor Barbara Perry, Food Service Supervisor Terry Thorn, Maintenance Supervisor | |
| Communications Lead (<i>staff member responsible for ensuring internal/external messaging is completed</i>) | <ul style="list-style-type: none"> Ensures accurate, clear, and timely information is communicated including those who may have been exposed, a description of how the school is responding, and action community members can take to protect their health. Shares communications in all languages relevant to school community. | Steve Woods, Superintendent | |
| District Level Leadership Support (<i>staff member in which to consult surrounding a</i> | <ul style="list-style-type: none"> Has responsibility over communicable disease response during periods of high transmission in community at large. May act as school level support to Building lead/Administrator activating a scaled response. | Steve Woods, Superintendent Darcey Edwards, HES Principal | |

| School planning team members | Responsibilities: | Primary Contact (Name/Title): | Alternative Contact: |
|--|--|---|----------------------|
| <i>communicable disease event)</i> | <ul style="list-style-type: none"> Responds to media inquiries during the communicable disease event and ensures that those responsible for communication are designated speakers. | Pat Jarman, MS Principal | |
| Main Contact within Local Public Health Authority (LPHA) | <ul style="list-style-type: none"> Notifies Building Lead/Administrator of communicable disease outbreak and offers recommendations for appropriate response. Key spokesperson to communicate on health-related matters with community members, health facility staff, and other local community partners. | <p><i>LPHA:</i></p> <p>Linn County: Neva Anderson, Emergency Preparedness Coordinator</p> <p>Email: nanderson@co.linn.or.us Phone: (541) 967-3888, ext. 2677</p> | |

Section 2. Equity and Continuity of Education

Preparing a plan that centers equity and supports mental health

Preparing a school to manage a communicable disease case or event requires an inclusive and holistic approach to protect access to in-person learning for all students. In this section suggested resources are offered to help prepare for communicable disease management while centering an equitable and caring response.

Centering Equity

Identify existing district or school plans and tools that can be utilized when centering equity in prevention, response, and recovery from incidents of outbreaks (e.g., district or school equity plans/stances/lenses/decision tools, Equity Committee or Team protocols, district or school systems for including student voice, existing agreements or community engagement or consultation models, Tribal Consultation¹, etc.)

- INSERT
- INSERT

Suggested Resources:

1. [Equity Decision Tools](#) for School Leaders
2. [Community Engagement Toolkit](#)
3. [Tribal Consultation Toolkit](#)

Table 3. Centering Educational Equity

¹ Tribal Consultation is a separate process from stakeholder engagement; consultation recognizes and affirms tribal rights of self-government and tribal sovereignty, and mandates state government to work with American Indian nations on a [government-to-government](#) basis.

| OHA/ODE Recommendation(s) | Response: |
|--|--|
| Describe how you will ensure continuity of instruction for students who may miss school due to illness. | Teachers use google classroom and post notes and daily assignments. Students who fall into this category will be identified by the school counselors, and administration. The school will provide homework and other assistance as needed. |
| Describe how you identify those in your school setting that are disproportionately impacted by communicable disease and which students and families may need differentiated or additional support. | By the beginning of the 2023-2024 school year school counselors, administration, and student support teams will utilize registration information and previous academic records to identify students who experience barriers to their education or who are disproportionately impacted by COVID-19 (e.g., students at increased risk of severe COVID-19 illness due to cognitive or developmental function, students at increased risk of negative impact/complications related to immunocompromised health status, etc.). |
| Describe the process by which the school will implement a differentiated plan for those that are disproportionately impacted, historically underserved or at higher risk of negative impacts or complications related to communicable disease. | By mid-September, 2023, counselors, administrators, and teachers will reach out to students' families to begin the process of developing a plan. For students who are identified later in the process, teachers will connect with families during conferences or by special appointment. By October, counselors in partnership with the teacher will develop a plan in consultation with the student and family based on the unique needs of each student. The plan will be written and reviewed periodically throughout the year to ensure that it continues to fulfill the support needs. |
| Describe what support, training or logistics need to be in place to ensure that the named strategies are understood, implemented, and monitored successfully. | All school staff will continue professional development to assist in this work, and to implement needed support for students disproportionately impacted, historically underserved or at higher risk of negative impacts or complications related to COVID-19. Selected professional development days will be dedicated to identification and support strategies school staff can use to serve ALL students |

Section 3. Communicable Disease Outbreak Prevention and Response:

Implementing mitigation activities, responding to periods of increased transmission, resuming baseline level mitigation, and debriefing actions to improve the process

Planning for and implementing proactive health and safety mitigation measures assists schools in reducing communicable disease transmission within the school environment for students, staff, and community members. Communicable disease, including norovirus, flu and COVID-19, will continue to circulate in our communities and our schools. Schools will utilize different mitigation measures based on local data, and observation of what is happening in their schools (e.g., transmission within their facilities and communities.) In the following section, teams will document their school's approach to the CDC, OHA and ODE advised health and safety measures at baseline, during increased transmission.

Suggested Resources:

1. Communicable Disease Guidance for Schools which includes information regarding:
2. Symptom-Based Exclusion Guidelines (pages 8-12)
3. Transmission Routes (pages 29-32)
4. Prevention or Mitigation Measures (pages 5-6)
5. School Attendance Restrictions and Reporting (page 33)
6. [CDC Guidance for COVID-19 Prevention in K-12 Schools](#)
7. [Supports for Continuity of Services](#)

Table 4.

Communicable Disease Mitigation Measures

| OHA/ODE Recommendation(s) Layered Health and Safety Measures | Describe what mitigating measures the school will implement to reduce and respond to the spread of communicable disease and protect in-person instruction? |
|---|---|
| Immunizations | <i>CDC, OHA, and ODE recommend COVID-19 vaccination for all eligible individuals. Please include whether your school will offer COVID-19 vaccine clinics or notices about where to access vaccines in your community. Shots are required by law for children in attendance at public and private schools, preschools, child care facilities, and Head Start programs in Oregon. Nearly every place that provides care for a child outside the home requires shots or a medical or nonmedical exemption to stay enrolled.</i> |
| Face Coverings | For all individuals, the use of face coverings is not required, however their use is welcomed. |
| Isolation | Per OAR 581-022-2220 schools must maintain supervised space to isolate the sick that is separate from the space where other health care tasks take place. Isolation rooms are identified in Table 1 of this document. PSD will continue to monitor the latest recommendations from the CDC, OHA, and ODE. |
| Symptom Screening | In communication with families the school will include information to watch their student for symptoms of communicable disease, including COVID-19, influenza, respiratory syncytial virus (RSV), and gastrointestinal infections. If symptoms are present, families are asked to keep their student home and get tested for COVID-19. |
| COVID-19 Diagnostic Testing | <i>OHA offers schools a diagnostic testing program to all public and private K-12 schools in Oregon. Please indicate whether your school will offer diagnostic testing.</i> |
| Airflow and Circulation | District maintenance department tests and screens airflow and circulation effectiveness on a regular basis. The department also addresses any student, staff, or public concerns pertaining to issues with airflow and circulation |
| Cohorting | We will not use this mitigation strategy as it limits high school students ability to access their 7 period day schedule. |
| Physical Distancing | Physical distancing is encouraged but not required. |
| Hand Washing | Schools will provide adequate hand washing supplies, including soap and water to all school sinks and classrooms. <ul style="list-style-type: none"> • Every classroom will also have a supply of hand sanitizer containing at least 60% alcohol for use. Hand sanitizers will be stored up, away, and out of sight of younger children and will be used only with adult supervision for children ages 5 years and younger. |

| OHA/ODE Recommendation(s) Layered Health and Safety Measures | Describe what mitigating measures the school will implement to reduce and respond to the spread of communicable disease and protect in-person instruction? |
|---|---|
| Cleaning and Disinfection | Custodial staff maintain a comprehensive cleaning and disinfection schedule conducted on a daily basis. Surfaces (e.g., door handles, sink handles, drinking fountains, transport vehicles) will be cleaned daily to reduce the risk of germs spreading by touching surfaces. |
| Training and Public Health Education | The school posts updates received from Linn County Health Department on the website. These communications are meant to provide clarity and supporting materials to community members (in their preferred language) about the specific health and safety protocols in place at the school. |
| PRACTICING PLAN TO BE READY | |

Training exercises are essential to preparedness ensuring individuals understand their role in a communicable disease event. Exercises can also help identify gaps in the planning, thereby building upon and strengthening the plan over time. Schools, districts, and ESDs should schedule to exercise this plan annually and when any revisions are made to update the plan. The plan, or component(s) of the plan, can be tested through conversations, practice exercises, or other activities.
