

We will continue to hold school in as safe and sanitary way as possible to continue the progress that we have made on the health front. We ask for your continued cooperation as you go about each day in the community outside of school hours. We can make this work and finish the school year with the help of each and every one of us.

Finally, our COVID-related numbers for Friday included no students reporting positive COVID results with six students under quarantine. We also had one staff member reporting positive results with three under quarantine.

Until our next post tomorrow night, please be safe.

Sincerely,

Matt Donkin

Superintendent of Schools

P.S. Underlying medical conditions indicated by the Center for Disease Control (CDC) for **Students** includes obesity, medical complexity, severe genetic disorders, severe neurologic disorders, inherited metabolic disorders, sickle cell disease, congenital (since birth) heart disease, diabetes, chronic kidney disease, asthma and other chronic lung disease, and immunosuppression due to malignancy or immune-weakening medications.
