

# Mt. Healthy City Schools

**“Our goal is your success”**

## Welcome from Dr. Reva Cosby

We are excited to share with you what makes Mt. Healthy City Schools a place where students want to belong; an Education Destination. I invite you to share in the rich educational and extracurricular opportunities offered to our students and our flourishing history.

Our students are challenged both academically and athletically to reach their highest potential. Our dedicated teachers, administrators, aides, and support staff provide safe, innovative, and diverse learning environments where students acquire new information and are inspired to reach their goals.

I invite you to see more that Mt. Healthy City Schools has to offer.

## Education Destination

Education Destination is our five-year strategic plan that focuses on academics through formative instructional practices, safety and behavior through Positive Behavior Intervention Supports (PBIS), and parental and community engagement.

## Mt. Healthy Stats

Number of students: **3,324**

**72.5%** 2017 graduates are attending college

One high school student documented over **200 hours** of community service

## Literacy Focus

Literacy is the key academic focus in all the Mt. Healthy School buildings this year. As we know reading is such a fundamental life skill, it is necessary to develop that skill early as it will create life-long readers and learners. PreK-2 is working to build essential foundational skills, because many students come to school with limited vocabulary and lack of exposure to letters and sounds. Mt. Healthy City Schools is committed to growing proficient readers early in their educational career; therefore, offering multiple opportunities to engage families in reading activities including family literacy nights.

## Did you know?

In 2017, Coordinating Council gave 19 seniors scholarships totaling \$26,000.

On the State Test, many of the district's proficiency increases were greater than the state's increases.

## Mt. Healthy Students in CCP Classes

College Credit Plus (CCP) classes allow high school students to gain college credit in addition to meeting high school graduation requirements. At Mt. Healthy High School, we have close to 100 students earning college credit. Of these students five are full-time and nine are part-time at local colleges. The other students are working on Mt. Healthy's campus earning credits in US History, Psychology, and Biology, as well as Business Pathways to begin in second semester. Local cooperating colleges include: Cincinnati State, University of Cincinnati - main campus and Blue Ash, Miami University-Hamilton, and Sinclair College. As these classes give our students a boost in the college game, we are encouraging more students to take advantage of this program.

## Mt. Healthy Band

Mt. Healthy offers band for students in grades 5-12. Students in elementary school band become familiar with the early band concepts and their instruments. In junior high and high school the opportunities include: concert or symphonic band, jazz band, marching band, and pep band. Students learn important skills such as analytics and math while mastering their instrument.

## Mt. Healthy Choir

Freshman Choir and Vocal Ensemble are offered at the high school. They perform several concerts per year both within the school and in the community.

Both North and South Elementary Schools offer choir as an extracurricular activity.

## Activities and Leadership

Mt. Healthy Jr/Sr High School has 32 extracurricular opportunities for students. These include National Honor Society, M2SE, Academic Team, Art Club, and Upward Bound, a program that develops academic and leadership skills for college-bound students.

Extracurricular activities at the elementary schools include choir, art club, and leadership development.

## Mt. Healthy Owls Athletics

Mt. Healthy Athletics offers 13 sports to junior high students and 18 sports to high school students. In 2016-2017, there were 104 scholar athletes in 18 sports. Mt. Healthy Youth Sports League serves students in grades 2-6.

We have a rich tradition of sports in Mt. Healthy with 57 alumni inducted into the Hall of Fame since 1995. Additionally many students continue their sport career in college and a few even play professionally.
