

TECHNOLOGY

Technology Update | Friday Report | March 24, 2023

Fire Alarm & PA

All fire inspections have been completed, deficiencies recorded and sent to appropriate repair vendors.

TES-A Wing and Part of B back down, Reliable Fire is working on this currently.

Cameras

After the Network Upgrade some cameras went down at AHS, we are currently removing camera patch cables and running them to their new locations.

RSMS - Multipurpose Room camera was removed and replaced by a Verkada camera, and we are in the process of switching it back and moving the Verkada camera to a new location that is better suited to watching the restroom doors.

Network

The network upgrade is 99% completed, just tidying up a few issues that do not have any impact on the clients.

Ticket System

This past week our technicians have resolved 145 work orders this week, as well as many issues that were not reported in our system, such as camera repair, phone repair and installing tv monitors.

ELPAC Testing

The technicians have been busy with assisting AHS Students with ELPAC testing and updates. This work will benefit us when it comes to the future CAASPP Testing as well.
