

# April Science

## STAAR Review Folder Grade 5

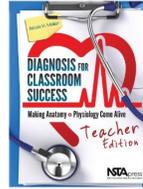

Looking for a unique and comprehensive way to help your students review for the Science STAAR? In this hands-on workshop participants will create a review folder that includes concept diagrams, sample questions, vocabulary, and process skill examples. Teachers will leave with a completed folder that covers all science content for their grade level as well as a master copy that can be reproduced for students.

*Day 2: Uses and Evaluation*  
**Apr 18, 2017**

## Diagnosis for Classroom Success

Diagnosis for Classroom Success: Making Anatomy and Physiology Come Alive offers educators support to make the most of classroom time and make students sit up and take notice of science. Educators will acquire the knowledge and skills to get their students deeply involved in inquiry-based science as they learn about major body systems. All the activities within the workshop are structured to supplement and simplify the work the teachers currently do in their classrooms, whether their class is 45 or 90 minutes.

*Day 2: Dissection and Public Service Announcements*  
**Apr 30, 2018**
