01. You must be **21** to legally use marijuana.

02. Edibles cannot be sold in NYS.

- Indian Reservations in NYS state can legally sell all types of cannabis.
- It is anticipated that legal sales will start in NYS in Fall/Winter '22-'23.

03. In California, where edibles are legally sold, products like these are not allowed.

- They contain too much THC.
- They use packaging with cartoon characters.
- They are engaging in copyright infringement.

### SPOTTING LOOK-ALIKE EDIBLES

Look for this symbol. It is the symbol required on all edible packages in California.

Look for a THC label, usually on the front of the package.

Look for changes in the name of the snacks or brand name:

- "Double Stuf Stoneo"
- "Stoney Patch Kids"
- "Dabisco"

It takes longer for the body to absorb cannabis in edible form.

- It can take 1-2 hours for the effects of THC to kick in.
- The effects can last up to 12 hours.

## What you need to know about look-alike edibles.

They are not made in a factory!

- Packages are available for purchase online.
- Sellers buy snacks like Oreos in bulk and spray them with a THC concentrate.
- They could be packaged in someone's kitchen or bathroom!

They are made without any oversight!

- There is no way to know how much THC is in a package.
- THC levels can vary from one piece in the package to the next.
- Sellers can place additional chemicals or drugs in the package without anyone knowing.
- Fentanyl has recently been found in various substances in Tompkins County, including cannabis.

THC levels are extremely high!

- Advertised THC levels are around 500mg.
- A dose of medical marijuana has 2-5mg of THC.
- In California, legal edibles have 5-10mg of THC.
