

A Message from Principal, James Apicelli

On behalf of the faculty, staff and administrative team at Lyman Memorial High School, I would like to welcome you to our school website. I am honored to be the Principal and look forward to working with the students and parents of Lyman Memorial High School as we work in partnership with the community to prepare students for college and career readiness upon graduation.

Our dedicated faculty work tirelessly to ensure that all students are on track for success not only while they are here at Lyman, but they prepare for future successes as informed citizens in an ever changing technologically-driven world. At Lyman Memorial, we are proud of our ever growing course offerings which allow students to challenge themselves as they prepare for college and career opportunities as well as cultivate interests in fine arts. We offer an extensive array of Advanced Placement courses and college partnerships with local state colleges and community colleges for students to receive college credits while still in high school. We house an award winning Agricultural Science and Technology Center, drawing students from a number of neighboring communities, which prepares students for direct entry into an agricultural career or for advanced education in Agricultural field or Environmental Sciences. In addition, many Lyman students participate in a wide variety of extra-curricular activities such as athletics, clubs, drama, productions and much more.

We are a school that prides itself on developing students who will be capable of making an impact in the world in which we live. We prepare our students through rigorous academic coursework that stresses authentic application of skills necessary for success at the post-secondary level or in a career field. Lyman is a special place to learn, grow and pursue your dreams. What truly makes Lyman special is the wonderful students we have, supported by a caring staff, with a community that helps to provide the opportunities and essentials to meet their needs.
