Subject: Employment Positions To Fill

1. Position One is a Manual Machining and some CNC Assist Milling, Manual Lathe, Surface, OD/ID, & Jig Grind of tooling details and small lot machining of all different types of materials. This will involve machining and grinding some very tight tolerance parts per blue print. Will be inspecting own parts. This can be an entry level job or entry with some experience. Candidate will need good math abilities or able to learn different types of shop math and have very good mechanical abilities. Candidate will be learning from a person with over 40 years experience and is a very good teacher. This will be a permanent full time position for right person. Candidate will also be required to acquire their own tools for this work within a period of time after hire in.
2. Position Two will be for one or two people for short run and semi production CNC and some manual machining of all types of materials per blue print. Some tight tolerance work and inspecting of own parts. This can be an entry level job or entry with some experience. Candidate will need good math abilities or able to learn different types of shop math and have very good mechanical abilities. Candidate will be trained on the job. This will be a permanent full time position for right person. Candidate will also be required to acquire their own tools for this work within a period of time after hire in.

Willing to consider experienced applicants also.

We are a small job shop that machines all types and quantities of materials. Some have very tight tolerances but have been producing most of these parts for years. We will be working with and training and additional education required or desired pertaining to work performed will be reimbursed. This is an excellent opportunity for an apprenticeship type job and excellent machining experience for the right candidate.

Sincerely,

Jeff Stringer  
President
