

Why Masks?

Not only do masks help prevent the spread of COVID-19, but they can also **prevent** students and staff from being placed in **quarantine** if worn **correctly** and **consistently**!

"L" and "H" are sitting next to each other in class. They are within 6 feet of each other for more than 15 minutes.

Person "L" is wearing her mask correctly.

Person "L" tests **positive** for COVID-19.

Person "H" is wearing his mask correctly.

Person "H" does **not** show symptoms.

Person "H" does **not** have to quarantine since he was wearing his mask correctly **and** shows no symptoms of COVID-19. Person "L" must isolate for 10 days since she tested positive for COVID-19.
