

PROFESSSSSIONAL VISITORS AND OBSERVERS

One of the ways Board Members and staff members can improve their effectiveness, and thus the quality of the education received by the student of the county, is through visitation of school systems and districts with novel, experimental, or innovative programs. For this reason, the Board has made it a practice to visit other systems throughout the County as time and finances permit.

It shall be the e policy of the Board to welcome professional visitors to our system. However, to insure the continuity of the educational program of our youngsters, the Board requests that delegations desiring to visit our system or any particular part of it make arrangements through the County Office. The Superintendent then can make the necessary arrangements to have someone knowledgeable in the area they wish to see, assist in their visit. This will also insure that the part of the program they wish to visit will be operational on their arrival, and will guarantee that their request will not be denied because of some uninterruptible activity such as standardized testing going on during their scheduled stay in the County.
