

MEASURE X - \$79 Million FACILITIES BOND MEASURE

In a comprehensive effort to improve student achievement for San Bruno children, District staff, parents and community members came together in 2016-2017 to evaluate existing educational programs and facilities. The vision for *Schools with Tomorrow Inside* was born to accomplish, over time, educational and facilities transformation.

Believing that consolidating, modernizing and/or rebuilding schools for San Bruno children will support the District's goal to "implement 21st century learning strategies and methodologies to ensure academic and personal success for all students while maintaining fiscal solvency", the Board of Trustees recommended a phased plan to improve aging San Bruno Schools (52-76 years old) that would include asking the voters to support a bond measure and making decisions on disposition of surplus property to leverage the bond in order to accomplish:

- Modernization/repair/upgrade of aging classrooms and school facilities including deteriorating roofs, plumbing, and electrical systems;
- Improving access to school facilities for students with disabilities; and
- Providing classrooms, labs and technology needed to support high quality instruction in math, science, engineering and technology

In November 2018, voters in San Bruno Park School District of all ages sent a strong message to the children of San Bruno: "We care about giving you good schools in which to learn and thrive!". A resounding 69.7% of the votes cast were in favor of Measure X. The Measure X campaign was an extraordinary grass roots effort with support coming from all sectors: senior citizens, parents, elected officials, service clubs, the community college and high school districts, and businesses.

A [Citizen's Oversight Committee](#) was appointed and charged with ensuring the community that the expenditure of bond monies authorized by the voters is consistent with the purposes approved by the voters.
