

Annual Public Notification of Compliance
Triennial Progress Assessment for Local Wellness Program
2022-2023

How well does SSD's Local Wellness Policy align with the model policy?

The language in our Local Wellness Program–EFA policy is similar to the model policy but not as specific in some areas. The most notable differences are in the level of specificity in the language for Implementation, Community Involvement, Outreach and Communication, as well as the Wellness Advisory Committee.

Progress towards attaining the goals of SSD's Local Wellness Policy:

Stanfield School District has made some progress in attaining the goals of the wellness policy.

The progress includes:

- Establishing a Wellness Committee
- Maintaining a safe and healthy food service environment for students and staff to eat meals at school each day
- Foods and beverages sold at school during the school day comply with the Smart Snacks final rule
- The District utilized the 2019 Bond project to remove leaded plumbing to be able to offer safe drinking water to students throughout the day in all schools in several locations
- Each school site has been in compliance with Oregon Department of Education's physical education minutes requirement
- SSD partners with Stanfield Park and Recreation to encourage youth participation in activities outside of school
- SSD received an OEA Choice grant to purchase exercise equipment for staff wellness purposes to be utilized in the newly established staff wellness/workout area
