

## **Garden Valley School District No. 71**

### **STUDENTS**

**3505**

#### Concussion Protocol

Many students within the Garden Valley School District, No. 71 participate in activities of a nature whereby physical injury may result. Though the District takes care to ensure all activities are as safe as practicable, it is not possible to remove all danger from such activities, and the District acknowledges that concussions may result. The purpose of this policy is to comply with the requirements of Idaho Code § 33-1625, and to prepare a procedure for addressing situations in which student concussions have occurred, or are suspected to have occurred.

This policy applies to all students who sustain a concussion regardless of where, when, age or grade level.

#### Pre-Season Education

The administration will work to ensure that, staff, students, parents, volunteers, coaches, and assistant coaches are educated about concussions. Prior to being allowed to engage or participate in any school athletic league or sport, as discussed above:

1. Each student desiring to participate in such school athletic league or sport, and the student's parents/guardians, shall be provided notice of or copies of any concussion guidelines or information available from the State Department of Education and the Idaho High School Activities Association, and also this policy.
2. Each student desiring to participate in such school athletic league or sport, and the student's parents or guardians, shall acknowledge that they have been provided the guidelines or information available from the State Department of Education and the Idaho High School Activities Association, as well as this policy, and have had the opportunity to review and have reviewed such information. Further, each student and the student's parents/guardians shall sign an applicable waiver for participating in such school athletic league or sport.
3. The signed waiver and acknowledgment of review of the appropriate information shall be returned to the District.
4. As part of any required pre-athletic league or sport participation medical examination of physical, the medical provider performing the examination shall check for signs of previous concussions. Such medical provider shall indicate whether signs of previous concussions are indicated, and whether the student should or should not be allowed to participate in the school athletic league or sport.
5. Concussion informational classes for students and parents wanting to participate in school sponsored sports will be offered 2-3 times a year. The objective of these classes is to inform the students and parents of the symptoms and dangers of concussions, and the procedures followed in Return to Learn and Return to Play protocols.

Students will not be allowed to participate in school athletic leagues or sports until the above steps are accomplished.

Coaches, referees, game officials, game judges, and athletic trainers shall review any concussion guidelines or information available from the State Department of Education and the Idaho High School Activities Association and information upon employment and biannually thereafter.

#### Protocol on Suspected Concussion

If, during any school athletic league or sport practice, game, competition, or activity, a student exhibits signs or symptoms of a concussion, makes any complaint indicative of a possible concussion, or a coach, assistant coach, volunteer coach, or other School District employee has reason to believe a concussion has occurred, such student shall be removed from play or participation in the practice, game, competition, or activity. According to the Centers for Disease Control and Prevention, and for the purposes of this policy, signs observed by coaching staff which could be indicative of a concussion include if the student:

1. Appears dazed or stunned;
2. Is confused about assignment or position;
3. Forgets an instruction;
4. Is unsure of game, score, or opponent;
5. Moves clumsily;
6. Answers questions slowly;
7. Loses consciousness (even briefly);
8. Shows mood, behavior, or personality changes;
9. Can't recall events prior to the hit or fall; or
10. Can't recall events after the hit or fall.

According to the Centers for Disease Control and Prevention, and for the purposes of this policy, symptoms reported by the student which could be indicative of a concussion include:

1. Headache or "pressure" in head;
2. Nausea or vomiting;
3. Balance problems or dizziness;
4. Double or blurry vision;
5. Sensitivity to light;
6. Sensitivity to noise;
7. Feeling sluggish, hazy, foggy, or groggy;
8. Concentration or memory problems;
9. Confusion; or
10. Does not "feel right" or is "feeling down".

Coaches and/or staff members should not try to judge the severity of the injury themselves. Health care professionals have a number of methods that they can use to assess the severity of concussions. Coaches and/or staff members should record the following information, if possible, to help health care professionals in assessing the athlete after the injury:

1. Cause of the injury and force of the hit or blow to the head or body;
2. Was there any loss of consciousness (passed out/knocked out) and if so, for how long;
3. Was there any memory loss immediately following the injury;
4. Were there any seizures immediately following the injury; and
5. The number of previous concussions (if any)

School principals shall ensure that a health record is maintained for each student.

The Concussion – Return to Participation Medical Release, 3505 F2, must be completed and provided to the District prior to the student returning to play.
