BANGOR TOWNSHIP SCHOOLS INSTALLS STATE OF THE ART AUDIO, VIDEO, AND SAFETY SYSTEM IN ALL SCHOOL FACILITIES

September 1, 2021

In line with its mission to imagine, inspire, and innovate, Bangor Township Schools leads the way in teaching and learning by installing the SAFE system in all of its buildings this school year.

This cutting-edge system has three innovative components that are critical to teaching and learning:

- **Audio-** ensures every student receives proper volume and clarity of instruction, no matter where they are sitting in the classroom.
- **Video-** tapes all lessons so they can be shared with students and parents. It allows Bangor Township Schools to extend the walls of the school and allows students who are sick or quarantined to still be engaged in the lessons. It incorporates blended learning, and brings homebound students into the classroom discussion.
- **Safety-** a built-in building alarm system in case of an emergency. Simply push a button and the building locks down and emergency personnel, first responders, and administrators respond immediately.

The #BobcatNation is focused on providing the safest and most equitable educational opportunities for our students, families, and community. The SAFE system positions our district to provide the most innovative and effective tools to do that.
