An Identified Case of COVID-19 in Chase County Schools

For any COVID cases in the district, we will consult with and follow directions from the Chase County Health Department and provide the necessary notification on a case-by-case basis. Quarantines and quarantine dates are determined by the Chase County Health Department, not USD 284 or any USD 284 personnel.

USD 284 Chase County Schools will do the following:

- Notify the Chase County Health Department (unless they notified us).
- Assist the Chase County Health Department in identifying and contacting school-related close contacts (someone within 6 feet of a positive case for 10 cumulative minutes or longer) and their parents.
- Quarantine/isolate any identified positive cases or close contacts until they are able to leave the building to quarantine for the determined period.
- Work with the family/families involved to continue to provide a quality education, technology, and support.
- Conduct extra cleaning and disinfecting in areas of the building impacted.
- Monitor symptoms in students and staff. Send students and staff home when they are ill at school.
- Continue to provide health information to families.
- Verify vaccination status of close contacts for quarantine purposes.
- Update the COVID Dashboard on the USD 284 website weekly.

USD 284 Chase County Schools will NOT do the following:

- Inform parents/guardians of a positive case unless their student is identified as a close contact. Please refer to the USD 284 COVID Dashboard for weekly updates.
- Provide personally identifiable information of an infected person to school personnel or the community unless necessary as part of the educational process.
